ACKNOWLEDGEMENTS

This "As-Is" Model was prepared under the direction of Tennessee's Integrated Criminal Justice Information Project Steering Committee.

This document was developed under the ICJ grant from the Bureau of Justice Assistance, Office of Justice Programs, U.S. Department of Justice.

Members of the ICJ project team wrote this document. The opinions, findings and conclusions or recommendations expressed in this document are those of the authors and do not necessarily represent the official positions or policies of the U.S. Department of Justice.

We gratefully acknowledge the Steering Committee leadership and contributions of a number of staff leaders who's shared in the ICJ vision.

ICJ Steering Committee

- The Honorable Rob Briley, Tennessee General Assembly - House of Representatives
- Cornelia Clark, Director, Administrative Office of the Courts
- Gayle Ray, Deputy Commissioner, Tennessee Department of Correction
- Jamie Etheridge, Executive Director, Office of Information Resources
- Andy Hardin, Executive Director, Tennessee District Public Defenders Conference
- James Wallace Kirby, Executive Director, Tennessee District Attorneys General Conference
- Jerry Humble, Major General, Director, Office of Homeland Security
- Norman Lewis, President, Tennessee Sheriffs Association, Sheriff, Montgomery County
- Tom Moore, Deputy Commissioner, Tennessee Department of Safety
- Fred Phillips, Commissioner, Tennessee Department of Safety
- Lee Reese, President, Tennessee Association of Chiefs of Police, Chief, Cleveland Police Dept.
- Mahailiah Hughes, Circuit Court Clerk, Sumner County
- Paul G. Summers, Attorney General and Reporter, Tennessee Attorney General
- Mark Gwyn, Director, Tennessee Bureau of Investigation
- Charles Traughber, Chairman, Board of Probation & Parole

ICJ Steering Committee Staff

- Kevin Batts, Director of Information Systems, Tennessee District Public Defenders Conference
- Patricia Dishman, Director, Office of Criminal Justice Programs
- Ann Lynn Walker, Assistant Director for Technology, Administrative Office of the Courts
- Don Baisden, Director of Information Systems, Tennessee Department of Safety
- Donna Blackburn, Tennessee Board of Probation & Parole
- Terry Hazard, Criminal Justice Consultant, County Technical Assistance Service
- Bruce Langsdon, Program Manager, Office of Criminal Justice Programs
- Ben Lindamood, Acting Director of Information Systems, Tennessee Department of Correction
- Judie Martin, Representative, Tennessee Association of Chiefs of Police

- Jeff McElroy, Integration/Project Coordinator, Tennessee District Attorneys General Conference

SUMMARY OF "AS-IS" MODEL

Introduction

The purpose of the "As-Is" Model is to help the ICJ project stakeholders to understand the current information exchange processes in Tennessee's criminal justice system. The "As-Is" Model supports the Vision Statement of the ICJ Steering Committee:

To enhance public safety through effective integration of criminal justice information throughout Tennessee by promoting practices that improves cost effectiveness, information sharing, and timely appropriate access to accurate information while recognizing the unique contribution of each criminal justice component.

Mission

The "As-Is" Model supports the Mission Statement of the ICJ Steering Committee:

(1) Provide a framework to integrate criminal justice information that is congruent with emerging technologies, national and state standards, while complementing local information sharing initiatives. (2) Minimize redundant criminal justice record information entry while identifying reengineering and automation opportunities. (3) Improve the use of the statewide individual identification number that would link together all local and state criminal justice information. (4) Develop methods to secure long term funding and support for integrated criminal justice record and information management.

Criminal Justice Processes Studied

The "As-Is" Model focuses on the high-level view of the criminal justice processes in Tennessee (see diagram on the right). More detailed perspectives of key criminal justice information exchanges entities are also included. These entities include:

Incidents & Investigation

Arrest Warrant Processing

Arrest & Booking

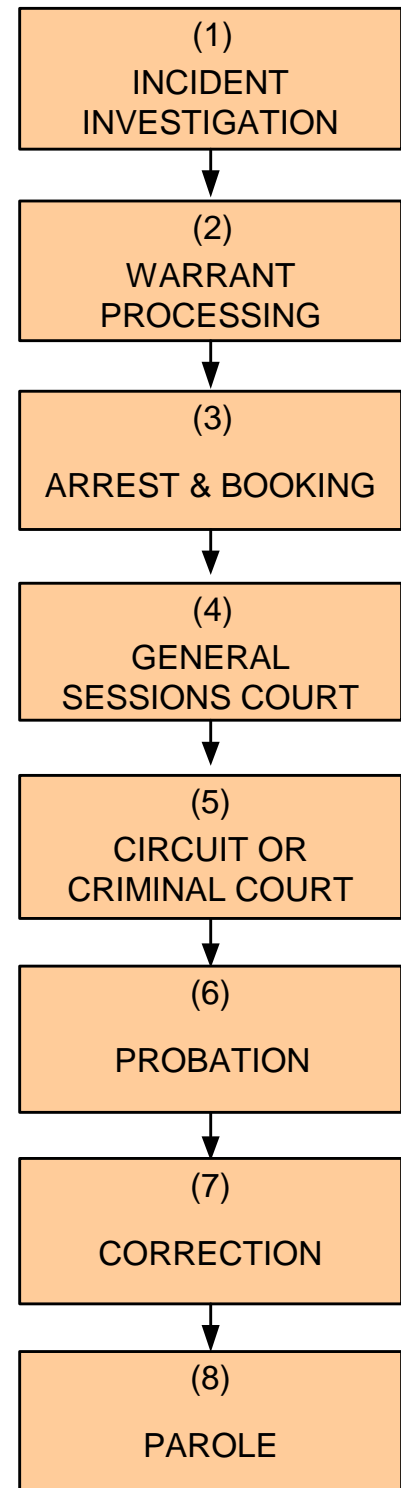

General Sessions Court

Circuit or Criminal Court

Probation

Correction

Parole

Topics within each Criminal Justice Process

The "As-Is" Model will be used by the project team to illustrate how the current information exchange is taking place and to lay the foundation for the development of the "To-Be" Model. The "To-Be" Model will define criminal justice information exchange and automation for the future. The project team will perform a "Gap Analysis" to determine the differences between the "As-Is" Model and the "To-Be" Model. From this information, the feasibility of future integration projects will be determined.

- **Process Diagram**
A diagram that depicts the origination, handling, and transfer of criminal justice information from within a criminal justice process.
- **Process Overview**
A description of the steps of the process using sentence and paragraph form.
- **Agency Roles & Responsibilities**
A listing of the Agencies and their roles and responsibilities regarding the process.
- **Information Exchange**
A table that describes the information that is exchanged during the process.
- **Data Elements**
A list and description of the data elements that are involved in the process.
- **Technology**
A general description of the technology that is used to complete the process.
- **Documents and Forms**
A placeholder for the key forms and documents utilized to complete the process.
- **Opportunities for Improvement**
A list of suggestions and observations that were gathered during the "As-Is" Model interviews.

Diagram Standards

The symbols below depict the various information exchanges within the Tennessee Criminal Justice System. The project team looked at a variety of modeling tools and developed a hybrid approach to simplify all processes down to a basic set of interactions. The following legend defines each.

	START/END	Manual: The first or last step in a process. Online: The first step in an automated, electronic or online process.
	QUERY/RESPONSE	Manual: Manually seek an answer from a person or agency that will determine the next step in a process. Online: Query a computer for an online response that will determine the next step in a process.
	ENTER DATA	Manual: Write information on a form or document. Online: Data entry into a computer system.
	TRANSFER OR EXCHANGE	Manual: Physically distribute information on a document from one agency, department or person to another. Online: Transmit information electronically over a computer system from one agency, department or person to another.
	STORE DATA	Manual: Organize paper in a file cabinet or archive room. Online: Save data on a computer database, repository, network or online file system.
	REPORT	Manual: Hand written report. Online: Computer-generated report.
	HANDLE	Manual: A physical action required by a person within the process. This includes folding or making copies of a document.
	BRANCH	Branch one-way or the other.
	GO TO	Go to the GO TO symbol on the next page.

Diagram Legend

The legend below depicts the various abbreviations used throughout each of the Process Diagrams.

BOPP	Board of Probation and Parole
C C	Court Clerk's Office
CIS	Court Information System
D	Defendant
D A	District Attorney
D C	Defendant Counsel
DFS	Director of Field Services (Parole)
J	Judge
J C	Judicial Commissioner
L E	Law Enforcement Agency
P	Probationer
P D	Public Defender
P O	Probation Officer
PRL O	Parole Officer
PRLE	Parolee
RMS	Records Management System
TBI	Tennessee Bureau of Investigation
TDOD	Tennessee Department of Correction

Information Exchange Documentation Standards

The As-Is Model summarizes the key interagency information exchange points within the:

(1) Incident & Investigation, (2) Arrest Warrant, (3) Arrest & Booking, (4) General Sessions Court, (5) Circuit or Criminal Court, (6) Probation, (7) Correction and (8) Parole processes. The definitions of the information exchange elements contained in these tables are shown below.

- **Event**

The action that triggers the exchange of information.

- **Information Exchanged**

The type of data that is exchanged.

- **Sending Agency**

The criminal justice agency that sends the information.

- **Receiving Agency**

The criminal justice agency that receives the information.

- **Method**

The manner or form in which information is exchanged.

- **Frequency**

When an event takes place in 80% or more of the total number of process occurrences; it has been assigned a Frequency value of "HIGH". When an event takes place in less than 20% of the total number of process occurrences; it has been assigned a Frequency value of "LOW". Otherwise, the Frequency value is unpopulated. The Frequency assignment is based on a composite view of all Tennessee Criminal Justice Agencies. Actual percentages of event occurrence may differ for some agencies or jurisdictions.

THE BIG PICTURE

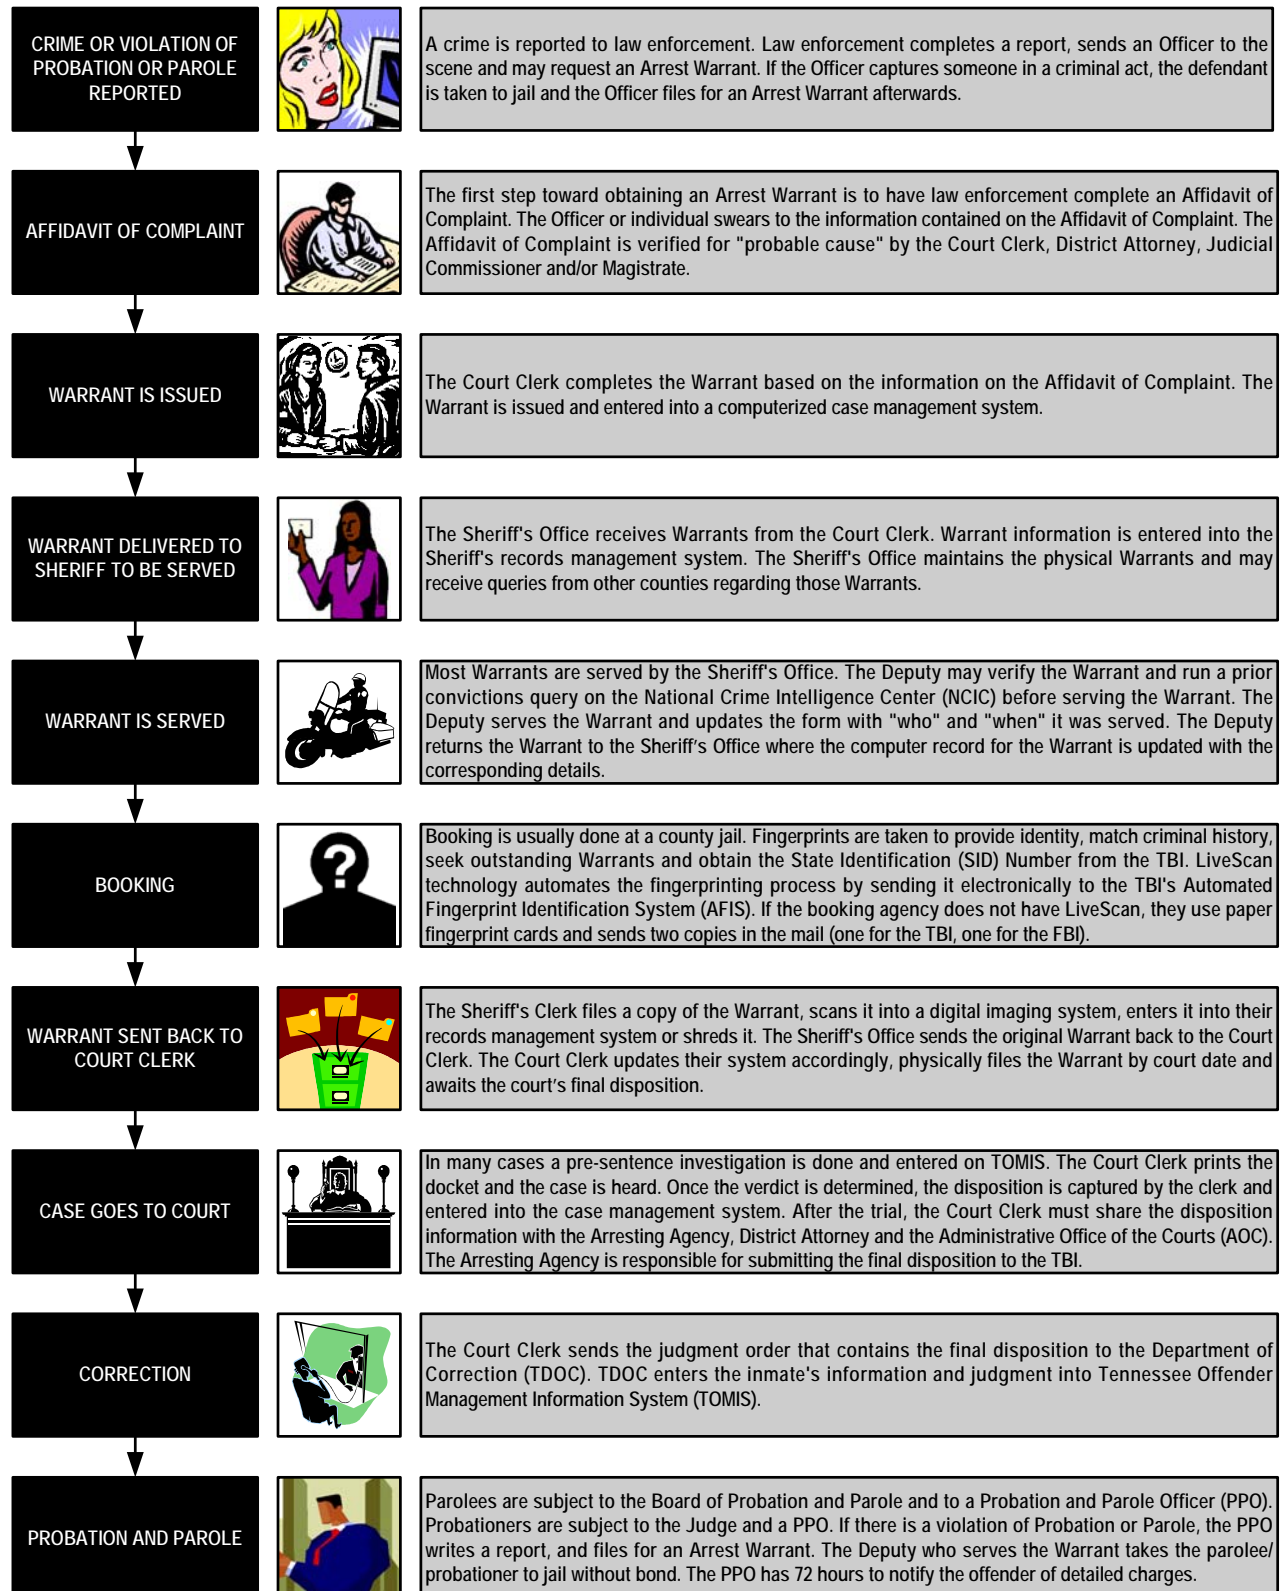

Criminal Justice Information Exchange in Tennessee

The diagram below shows the multiple criminal justice agencies that are involved in sharing criminal justice information.

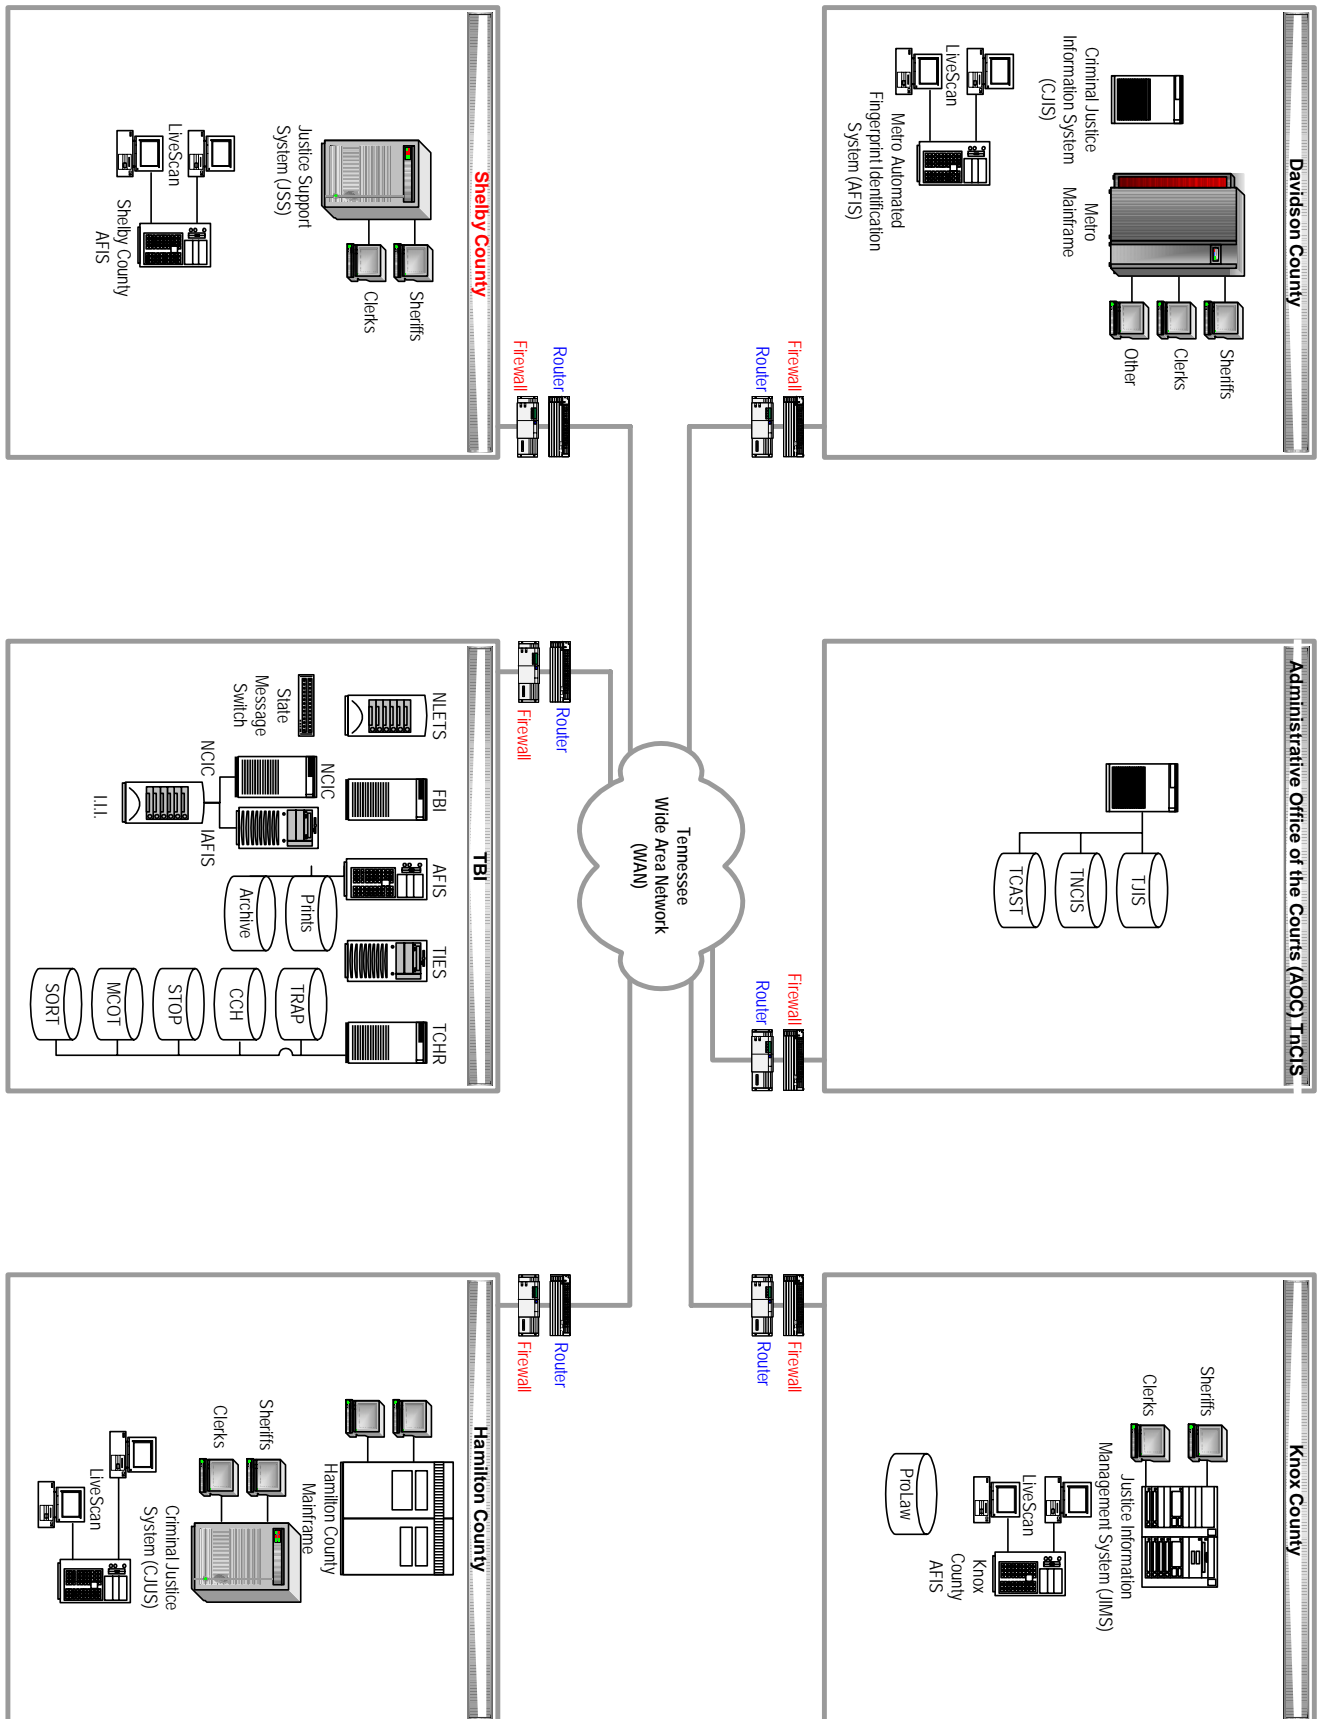

Criminal Justice Information Exchange in Tennessee									
AGENCY	ACTION	EXCHANGE DOCUMENTS	SYSTEM	NOTES	AGENCY	ACTION	EXCHANGE DOCUMENTS	SYSTEM	NOTES

Tennessee Criminal Justice Process Summary

High-Level Information Systems Diagram

INCIDENT AND INVESTIGATION

Incident & Investigation: Process Diagram

"As-Is" Model: Incident & Investigation

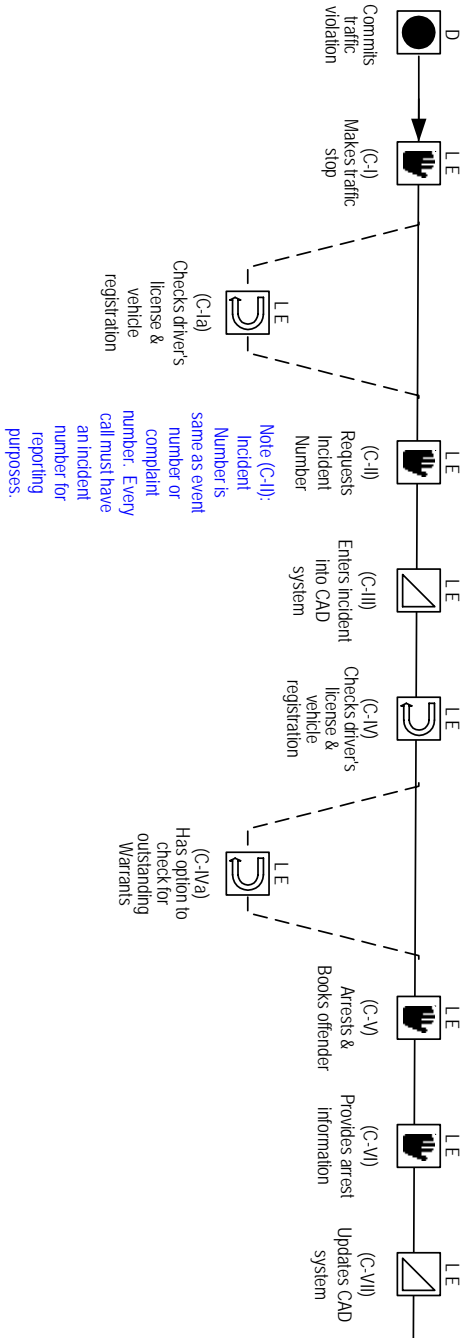

Path (A): CITIZEN REPORTS CRIME

Path (B): LAW ENFORCEMENT WITNESSES CRIME

Path (C): LAW ENFORCEMENT IDENTIFIES SUSPECT DURING A TRAFFIC STOP

Incident & Investigation: Process Overview

The "Incident and Investigation" process is initiated when: (A) Citizen Reports Crime, (B) Law Enforcement Witnesses Crime, or (C) Law Enforcement Identifies Suspect during a Traffic Stop.

Key information exchange events that occur during the **Incident & Investigation** process are described below.

A. Citizen Reports Crime

I. CITIZEN REPORTS A CRIME TO A LAW ENFORCEMENT AGENCY

A Citizen contacts a Law Enforcement Agency to report that a crime has been committed or that a crime is in progress. The Citizen notifies the Law Enforcement Agency by either:

- Making a "911" telephone call
- Making a call to the Law Enforcement Agency's listed telephone number.
- Reporting the incident to a Law Enforcement Officer in the vicinity of the incident
- Reporting the incident at the Law Enforcement Agency's site/station

II. LAW ENFORCEMENT RECEIVES CALL AND ENTERS INCIDENT INTO CAD SYSTEM

When the Law Enforcement Dispatcher gets contacted about an incident, he/she gathers basic information and enters it into the Computer Aided Dispatch (CAD) system.

III. LAW ENFORCEMENT DISPATCHES OFFICER

The Dispatcher contacts a Law Enforcement Officer using the agency's radio communications system and provides him with the information reported.

IV. LAW ENFORCEMENT OFFICER INTERVIEWS AND INVESTIGATES

When the Law Enforcement Officer arrives at the scene he/she interviews the reporting citizen and conducts an investigation. The Officer records the information reported by witnesses as well as his observations on an Incident Report. The Officer reviews the information collected and determines whether the incident merits further investigation. If the Officer deems that additional investigation is needed, he may conduct additional interviews with the citizen and other witnesses (if available) or further examine the incident area. The Officer will also gather material that appears to be evidence for the case. The evidence is returned to the Law Enforcement Agency where it is inventoried and cataloged. Evidence may be sent to another agency for additional analysis.

When the suspect(s) have been identified, the Officer will likely perform a background check. In this procedure, information about a suspect is queried from the statewide and federal Arrest Warrant databases (TRAP & NCIC), Tennessee's Criminal History Repository, and the agency's Records Management System. The background check provides insight on a suspect's prior/existing Arrest Warrants, prior criminal convictions and charges, and Probation/Parole status. Information obtained from a background check often proves to be helpful in determining a suspect's whereabouts. It may also influence the Law Enforcement Agency to request information about a suspect from other criminal justice agencies. These requests are typically initiated by phone or FAX and information is usually returned in a like manner.

If the Law Enforcement Officer determines that no crime has been committed or that there is not sufficient evidence to continue an investigation, he will document the reason for this decision on the Incident Report.

V. LAW ENFORCEMENT COMPLETES AFFIDAVIT OF COMPLAINT

If the Officer determines there is ample cause for an arrest, an Affidavit of Complaint is completed.

VI. LAW ENFORCEMENT ENTERS INFORMATION IN RECORDS MANAGEMENT SYSTEM

The Law Enforcement Officer submits a copy of the Incident Report to the Administrative/Records Management division of the Law Enforcement Agency. The administrative staff of the Law Enforcement Agency enters information contained on the Incident Report into the Law Enforcement Agency's Records Management System. The next step is Warrant Processing.

B. LAW ENFORCEMENT WITNESSES CRIME**I. LAW ENFORCEMENT WITNESSES CRIME**

When a Law Enforcement Officer observes a crime, the Officer uses radio communications to report the incident to a Dispatcher and request assistance, if necessary.

II. LAW ENFORCEMENT APPREHENDS SUSPECT

The Law Enforcement Officer will attempt to apprehend, question and detain the suspect(s).

III. LAW ENFORCEMENT COMPLETES AFFIDAVIT OF COMPLAINT

If the offense calls for an arrest, the Law Enforcement Officer will take the suspect into custody and completes an AFFIDAVIT OF COMPLAINT. If the crime does not necessitate an arrest, the Officer will issue a Citation or Summons to the Offender to appear at a stated time and place.

IV. LAW ENFORCEMENT BOOKS SUSPECT

If the suspect is arrested, the Law Enforcement Officer transports the suspect to the designated Booking Agency for processing. The next step is Warrant Processing.

C. LAW ENFORCEMENT IDENTIFIES SUSPECT DURING A TRAFFIC STOP**I. LAW ENFORCEMENT MAKES TRAFFIC STOP**

Law Enforcement Officers detain persons who commit traffic violations or have expired license plates. During these traffic stops, Law Enforcement Officers request the driver of the vehicle for his or her Driver's License and Vehicle Registration. If the driver of the vehicle is unable to produce these documents, the Law Enforcement Officer will ask for the driver's name and other basic identification information that would have been gathered from the Driver's License and/or Vehicle Registration. If the Driver does not produce a Driver's License and/or Vehicle Registration, the Law Enforcement Officer may issue a citation for these violations.

a. Checks driver's license and vehicle registration

If Law Enforcement Officer has a laptop or handheld computer, he/she will check driver's license and vehicle registration online using the information collected. This check verifies that driver is the owner of vehicle, as well as, if driver has any DUIs or is driving on a revoked license. If no such device is available, Officer can contact Dispatcher for query.

II. LAW ENFORCEMENT REQUESTS INCIDENT NUMBER

The Law Enforcement Officer calls the Dispatch office to request an Incident Number. The Incident Number is the same as an event number or complaint number. Every call must have an event number for reporting purposes.

III. LAW ENFORCEMENT ENTERS INCIDENT INTO CAD SYSTEM

The Law Enforcement Dispatcher enters incident information into Computer Aided Dispatch (CAD) system.

IV. LAW ENFORCEMENT CHECKS DRIVER'S LICENSE AND VEHICLE REGISTRATION

If the Law Enforcement Officer does NOT have an online device she/he will use radio communications to contact a Dispatcher and request the Dispatcher to query the Driver's status with the Department of Safety database. The Dispatcher will query to see if the driver has any DUIs or if driving with a revoked license.

a. Law Enforcement has option to check for outstanding Warrants

The Law Enforcement Officer has the option to have Dispatcher check for any outstanding Warrants on the local, TBI's TRAP or FBI's NCIC.

V. LAW ENFORCEMENT ARRESTS AND BOOKS OFFENDER

If the query indicates that a driver is a "wanted person," the Law Enforcement Officer takes the offender into custody and transports him to Booking for processing.

VI. LAW ENFORCEMENT PROVIDES ARREST INFORMATION

The Law Enforcement Officer contacts Dispatch and provides information regarding the arrest.

VII. LAW ENFORCEMENT UPDATES CAD SYSTEM

The Law Enforcement Dispatcher updates the CAD system with arrest information. The next step is Warrant Processing.

Incident & Investigation: Agency Roles & Responsibilities

Criminal justice agencies involved in the **Incident & Investigation** process and their information exchange responsibilities are listed below.

Department of Safety

- Provides Driver's History information to Law Enforcement Agencies.
- Provides Vehicle Registration information to Law Enforcement Agencies.

District Attorney General's Office

- Provides criminal history/background information to Law Enforcement Agencies.
- Reviews Affidavit of Complaint forms for probable cause (upon Law Enforcement Agency request).
- Assists in the completion of Affidavit of Complaint forms (upon Law Enforcement Agency request).

Law Enforcement Agency

- Keeps records of incidents/offenses.
- Records witness testimony and investigation findings.
- Collects and stores physical evidence.
- Checks criminal history and background of suspects and witnesses (if applicable).
- Completes and files Incident/Offense Reports.
- Provides information about cases, incidents, and/or Defendants to other Law Enforcement Agencies.
- Completes Affidavit of Complaint forms.

Tennessee Bureau of Investigation

- Provides state criminal history/background information to Law Enforcement Agencies and District Attorney's Offices.
- Provides information about existing Arrest Warrants to Law Enforcement Agencies and District Attorney's Offices.

Federal Bureau of Investigation

- Provides national criminal history/background information to Law Enforcement Agencies and District Attorney's Offices.
- Provides information about existing Arrest Warrants to Law Enforcement Agencies and District Attorney's Offices.

Incident & Investigation: Information Exchange

The Events that generate inter-agency Information Exchange within the **Incident & Investigation** process are shown in the table below.

Information Exchange during the Incident and Investigation Process

ID	EVENT	INFORMATION EXCHANGED	SEND AGENCY	RECEIVE AGENCY	METHOD	FREQ
	LEA Dispatcher or LEA Officer requests Driver's License and Vehicle Registration information from the Dept. of Safety.	Basic ID Data Name Data Driver's License Data Vehicle Data	LEA	Dept. of Safety	<u>Electronic</u> : Department of Safety computer system(s)	HIGH
	The Dept. of Safety returns Driver's License and Vehicle Registration information to a LEA.	Basic ID Data Driver's License Data Name Data Vehicle Data	Dept. of Safety	LEA	<u>Electronic</u> : Department of Safety computer system(s)	HIGH

Incident & Investigation: Data Elements

The data elements listed below are exchanged between multiple criminal justice agencies and are essential to the **Incident & Investigation** process. See APPENDIX B: DATA ELEMENTS for more details.

ADDR	ADDRESS DATA
ARRS	ARREST DATA
BASC	BASIC IDENTIFICATION DATA
CASE	CASE IDENTIFICATION DATA
CHRG	CHARGE DATA
CONT	CONTACT DATA
CUST	CUSTODY DATA
DISP	DISPOSITION DATA
DRIV	DRIVER'S LICENSE DATA
IDEN	ENHANCED IDENTIFICATION DATA
FING	FINGERPRINT DATA
JUST	JUSTICE OFFICIAL IDENTIFICATION DATA
MEDI	MEDICAL DATA
PHOT	MUG SHOT DATA
NAME	NAME DATA
OFFN	OFFENSE DATA
PARO	PAROLE DATA
PAYM	PAYMENT DATA
PERS	PERSONAL IDENTIFICATION DATA
PLEA	PLEA DATA
PROB	PROBATION DATA
RLSE	RELEASE DATA
SENT	SENTENCE DATA
SOCI	SOCIAL IDENTIFICATION DATA
VEHI	VEHICLE DATA
VIOL	VIOLATION DATA
WARR	WARRANT DATA

Incident & Investigation: Technology

The table below details the primary computer systems and databases used in exchange of information during the **Incident and Investigation** process. See Appendix D for more detailed information about computer systems and applications.

Incident and Investigation – Technology

NAME	DESCRIPTION
Court Information System (CIS)	A court information system is used to manage the daily affairs of the court clerk's office. It contains functionality for Case History, Master Person File, Bill-of-Cost, Case Disposition Rule & Execution, and Reporting System and generates a docket number. Maintained by: Court Clerk's Office
Computer Aided Dispatch (CAD) system	A system used by Law Enforcement to process telephone calls from the public, track calls for service, and facilitate the dispatch of Law Enforcement Officers to the scene of the incident. Maintained by: Law Enforcement Agency
Driver License History Database	The Driver History Database contains driver's license status and driver history information. Maintained by: Department of Safety
National Crime Intelligence Center (NCIC)	A computerized network that connects Law Enforcement Agencies throughout the United States and contains information about crimes that have occurred throughout the country. Criminal History and/or Arrest Warrant status information is commonly requested from NCIC. Maintained by: Federal Bureau of Investigation (FBI)
Records Management System (RMS)	A computer system that captures and stores information about a case and promotes an agency's ability to manage its records. Maintained by: Law Enforcement Agency, District Attorney's Conference/Offices
Tennessee Criminal History Repository (TCHR)	The Tennessee Criminal History Repository (TCHR) contains information about arrests, charges, and final dispositions of individuals who have committed offenses in Tennessee. Maintained by: Tennessee Bureau of Investigation (TBI)
Tennessee Offender Management Information System (TOMIS)	The computer system used by the Department of Correction and Board of Probation Parole to store and process information about sentencing, incarceration, release, Probation and Parole. The system tracks all activities of inmates, probationers and parolees. The Tennessee Department of Correction has recently implemented an Internet-based version of the software. Maintained by: Tennessee Department of Correction, Board of Probation and Parole
Titles & Registration Database	The Titles and Registration Database contains information about vehicle registrations as well as vehicles and their respective owners. Maintained by: Department of Safety

Incident & Investigation: Forms

The primary forms used during the Incident and Investigation process are summarized in the table below. An example of each form follows; however, there are variations of these forms used in different areas in Tennessee.

ID	FORM NAME	FORM DESCRIPTION
F-1	Affidavit of Complaint	A document that sets forth a criminal violation and serves as an instrument for filing for an Arrest Warrant.
F-2	Citation	A notice to a person that he or she is charged with a minor offense such as a traffic violation.
F-3	Citation in Lieu of Arrest	A notice to a person that he or she is charged with an offense that requires an appearance at the court on a specified day. Failure to appear results in an additional contempt of court charge.
F-4	Incident Report	An account of a law enforcement investigation containing information about a reported and/or observed violation of the law.

Affidavit of Complaint

Incident & Investigation: Opportunities for Improvement

The "Opportunities for Improvement" section provides a general list of observations compiled during the ICJ project interview phase. These ideas will be considerations for the development of the "To-Be" Model regarding the **Incident & Investigation** process.

BARCODE ON DRIVER'S LICENSE AND VEHICLE REGISTRATION -- A barcode or magnetic strip on the Defendant's Driver's License would promote electronic transfer of data into a law enforcement computer system. Having these barcodes, along with scanning devices, would reduce the amount of effort and time to gather offender information as well as minimize data entry errors. The current State of Tennessee Driver License formats contain two barcodes on the back of each card produced. One barcode contains the ISO Issuer Identification Number for Tennessee, as well as, the nine-digit Driver License number. The other barcode contains the same information as on the front of the Driver License and a great deal more pertaining to the driver. A barcode on the vehicle registration would allow Officers to "scan" information into their Laptops as opposed to typing.

LICENSE PLATES -- Tennessee is in the process of converting our license plate process to a digitized system. Digitized plates have several security features that include a process called Ensure, rim dye, and a bar code that contains the license plate number which can be read by anybody with a CCD scanner. Ensure is a process in which a unique identifier is embedded into the plate that can be seen from the angle that someone would be looking at the plate on the back of the vehicle. The embedded picture also has the date the plate was manufactured included. 3-M is planning to add a second safety feature of this type in the near future.

CRIMINAL HISTORY -- Law Enforcement has a need for more comprehensive Criminal History. This includes name, date of birth, social security, state identification number, charges, convictions, time served, Probation/Parole status, arrests, dispositions and outstanding warrants from all counties. The Automated Final Disposition project will support this opportunity.

DIGITAL PHOTOGRAPHS -- The ability to quickly retrieve digital photographs currently collected by the Department of Safety, TBI, and Tennessee Offender Management Information System (TOMIS) would promote Law Enforcement identification efforts. A secure website to search and obtain photos would be helpful to Law Enforcement. The Department of Safety plans on developing a browser-based system that will make their digital photographs available to law enforcement agencies.

INTER-CITY INFORMATION SHARING -- Large metropolitan areas have difficulty obtaining information from nearby municipalities. For example, in Memphis, it is cumbersome to obtain information from Bartlett, Germantown, Kerrville, and Millington. Also, it is difficult to share information outside the state with adjoining states.

MOBILE COMPUTER DEVICES -- Handheld computers and wireless laptops in law enforcement vehicles would minimize re-keying. Improved integration can help but funding is needed to move ahead.

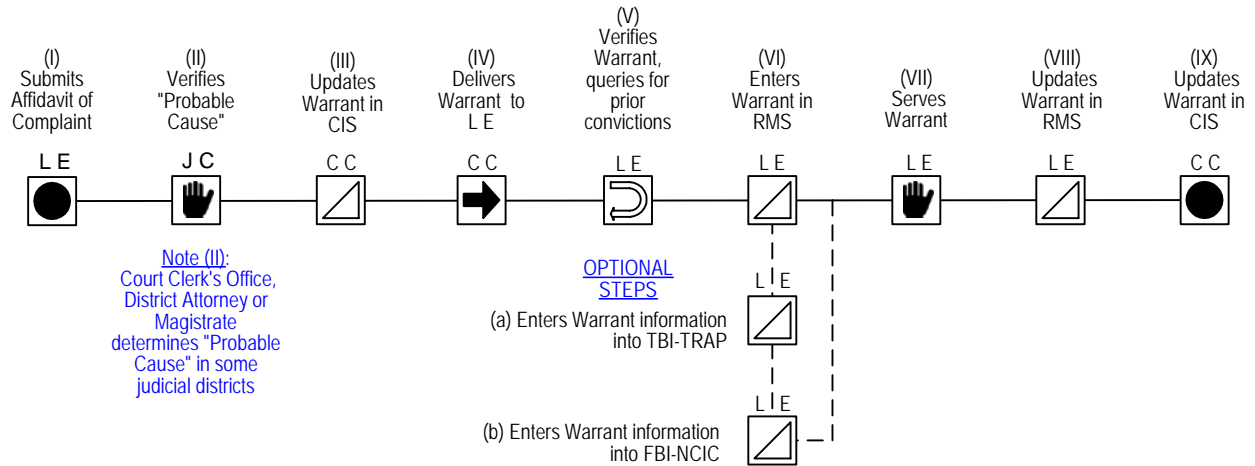

ONLINE PAWN SHOP SYSTEM -- Law enforcement would benefit from a system to search pawnshops from surrounding counties and cities for stolen items.

STANDARDS -- Adopting National Justice eXtensible Markup Language (XML) standards for forms and data such as Citations, Affidavit of Complaint, Offense Codes & Descriptions, Case Identification and State Identification (SID) Number would benefit the State of Tennessee Criminal Justice System. Justice XML is a tool to facilitate interoperability and information sharing among agencies and systems. It involves data, text, documents, transmission protocols and standards. More specifically, XML is a structured language for describing information — such as an Arrest/Incident Report — being sent electronically by one agency to another. XML sets a standard for electronic information exchange and describes the data contained in documents and electronic transactions.

WARRANT PROCESSING

Warrant Processing: Process Diagram

"As-Is" Model: Arrest Warrant

Warrant Processing: Process Overview

An Arrest Warrant is a document that formally charges a person with having committed a crime. This warrant authorizes law enforcement to arrest the individual against whom it has been issued.

Note: The process for Criminal Summons is similar to that of an Arrest Warrant. The primary difference is that when a Criminal Summons is served the person named in the summons is ordered to appear before the court on a specified date but is not taken into custody by the serving Law Enforcement Officer. A Criminal Summons is traditionally issued in a case where a lesser offense has been committed, insufficient evidence for an Arrest Warrant is available or the person requesting is not a Law Enforcement Officer.

Key information exchange events that occur during **Warrant** process are described below.

I. Law Enforcement Submits Affidavit of Complaint

The Arrest Warrant process is initiated by the submission of an Affidavit of Complaint from a Law Enforcement Officer or an individual to a Court Clerk Official. The Court Clerk Official reviews the Affidavit of Complaint and takes a sworn statement of facts from the Law Enforcement Officer. Upon entering the required information into the Court Clerk's Court Information System, the Court Clerk Official presents the Affidavit of Complaint to a Judicial Commissioner.

II. Judicial Commissioner Verifies Affidavit of Complaint for Probable Cause

Prior to the issuance of an Arrest Warrant, the Affidavit of Complaint is reviewed by a Judicial Commissioner to determine if the offense merits the issuance of an Arrest Warrant. If the Judicial Commissioner determines that the Affidavit of Complaint information supports an arrest, he documents their Probable Cause findings on the Affidavit of Complaint and signs it. The Judicial Commissioner returns the Affidavit of Complaint to the Court Clerk Official.

Note: Court Clerk's Office, District Attorney or Magistrate makes determination of probable cause in some jurisdictions.

III. Court Clerk's Office Updates Warrant in Court Information System

The Court Clerk Official updates the record for the Affidavit of Complaint with the Probable Cause findings in the Court Clerk's Court Information System. The Court Clerk Official then issues and prints the Arrest Warrant.

IV. Court Clerk's Office Delivers Warrant to Law Enforcement

The Court Clerk's Office provides copies of the Arrest Warrant to: (1) the Law Enforcement Agency that requested the Warrant and/or (2) the Law Enforcement Agency that manages the Booking Process for the county in which the Arrest Warrant was issued. The Court Clerk's Office gives a copy of the Arrest Warrant to the requesting Law Enforcement Officer upon its completion.

V. Law Enforcement Verifies Warrant and Queries for Prior Convictions

Upon receipt of an Arrest Warrant, the Law Enforcement Agency that requested the Warrant will verify that the information on the Warrant is correct. The Law Enforcement Agency will perform queries on TBI's Tennessee Repository for Apprehension of Persons (TRAP) and FBI's National Crime Information Center (NCIC) for any prior convictions.

VI. Law Enforcement Enters Warrant into Records Management System

The Law Enforcement Agency enters a record of the Arrest Warrant into the agency's Records Management System. The Law Enforcement Agency ensures that the Warrant is entered into the appropriate Wanted Person File within either NCIC or TRAP, but never simultaneously into both systems.

When an Arrest Warrant meets the criteria for entry into the National (FBI) Wanted Person File, the Law Enforcement Agency enters the Arrest Warrant information into NCIC. When an Arrest Warrant meets the criteria for the Tennessee Wanted Person File, the Arrest Warrant information is entered into TRAP. Law Enforcement Agencies store Arrest Warrants in file cabinets and/or manage electronic copies with document imaging software.

VII. Law Enforcement Serves Arrest Warrant

When the person named in an Arrest Warrant is apprehended, the warrant has been "served". The Law Enforcement Officer that "served" the Warrant updates the document with the particulars ("Who", "When") of its service. In most jurisdictions, the Booking Agency will be provided with a copy of the Arrest Warrant to be placed in the Defendant's Booking File.

The Law Enforcement Officer returns the updated Arrest Warrant to the administrative division of his agency. Law Enforcement Agencies return "served" Arrest Warrants to the Court Clerks Office.

VIII. Law Enforcement Updates Warrant in Records Management System

After an Arrest Warrant is "served", the Law Enforcement Agency updates the agency Records Management System with the particulars of the Warrant's service. If the Law Enforcement Agency entered a record of the Arrest Warrant in a Wanted Person File, it updates the record with the particulars of the Warrant's service.

IX. Court Clerk's Office Updates Warrant in Court Information System

The Court Clerk's Office reviews the Arrest Warrants returned by Law Enforcement and updates the Court Clerk's Court Information System with the particulars of the warrant's service. Court Clerk Offices store Arrest Warrants in file cabinets and may also manage electronic copies with document imaging software.

Warrant Processing: Agency Roles & Responsibilities

Criminal justice agencies involved in the **Warrant** process and their information exchange responsibilities are listed below.

Court Clerk's Office

- Collects and processes Affidavit of Complaint forms received from Law Enforcement Agencies.
- Keeps records of Affidavit of Complaint submissions.
- Keeps records of issued, served, and outstanding Arrest Warrants.
- Facilitates the distribution of Arrest Warrants to the appropriate Law Enforcement Agencies for service.
- Updates Warrant service status in Court Information System and/or court files.

Law Enforcement Agency

- Prepares and files Affidavits of Complaint with the Court Clerk's Office.
- Keeps records of Affidavits of Complaint prepared.
- Receives Arrest Warrants from the Court Clerk's Office.
- Keeps records of Arrest Warrants requested by the Law Enforcement Agency.
- Serves/Executes Arrest Warrants.
- Updates Arrest Warrants with the details ("Who", "When") of their service/execution.
- Keeps records of Arrest Warrants served by the Law Enforcement Agency.
- Returns served/executed Arrest Warrants to the Court Clerk's Office.
- Maintains Arrest Warrant records that the Law Enforcement Agency is responsible for within the National Wanted Person File (NCIC).
- Maintains Arrest Warrant records that the Law Enforcement Agency is responsible for within the Tennessee Wanted Person File (TRAP).

Judicial Commissioner

- Reviews submitted Affidavits of Complaint for probable cause.
- Records probable cause findings on Affidavits of Complaint.
- Keeps records of Affidavits of Complaint reviewed.

Warrant Processing: Information Exchange

The Events that generate inter-agency Information Exchange within the **Warrant** process are shown in the table below.

Information Exchange during the Warrant Process

NAME NAME DATA
PERS PERSONAL IDENTIFICATION DATA
WARR WARRANT DATA

Warrant Processing: Technology

The table below details the primary computer systems and databases used in exchange of information during the Arrest Warrant Processing process. See Appendix C for more detailed information about computer systems and applications.

Warrant Processing – Technology

NAME	DESCRIPTION
Court Information System (CIS)	A court information system is used to manage the daily affairs of the court clerk's office. It contains functionality for Case History, Master Person File, Bill-of-Cost, Case Disposition Rule & Execution, and Reporting System and generates a docket number. Maintained by: Court Clerk's Office
National Crime Intelligence Center (NCIC)	A computerized network that connects Law Enforcement Agencies throughout the United States and contains information about crimes that have occurred throughout the country. Criminal History and/or Arrest Warrant status information is commonly requested from NCIC. Maintained by: Federal Bureau of Investigation (FBI)
Records Management System (RMS)	A computer system that captures and stores information about a case and promotes an agency's ability to manage its records. Maintained by: Law Enforcement Agency
Tennessee Repository for the Apprehension of Persons (TRAP)	A repository for outstanding Tennessee Arrest Warrants which do not meet the criteria for entry into the FBI's NCIC Wanted Person File. Maintained by: Tennessee Bureau of Investigation (TBI)

Warrant Processing: Forms

The primary forms used during Warrant Processing are summarized in the table below. An example of each form follows; however, there are variations of these forms used in different areas in Tennessee.

ID	FORM NAME	FORM DESCRIPTION
F-5	Affidavit of Complaint	A document that sets forth a criminal violation and serves as an instrument for filing for an Arrest Warrant.
F-6	Arrest Warrant	A document issued to law enforcement that empowers the arrest/apprehension of the person named in the warrant.
F-7	Summons	A document that summons a Defendant to appear before a court to answer a minor criminal charge; issued in lieu of an Arrest Warrant.

Warrant Processing: Opportunities for Improvement

The "Opportunities for Improvement" section provides a general list of observations compiled during the ICJ project interview phase. These ideas will be considerations for the development of the "To-Be" Model regarding the **Warrant** process.

LAW ENFORCEMENT ACCESS TO COURT INFORMATION -- Law Enforcement would like immediate computer access to review the Affidavit of Complaint and to see if the Arrest Warrant has been served.

STATE CONTROL NUMBER -- If the Sheriff Deputies and Police Officers would write the State Control Number on the Warrant, the Court Clerk's Office could enter it into the Court information System. This would set the groundwork for the Final Dispositions to be sent electronically to the Tennessee Bureau of Investigation (TBI). This would enhance the criminal history database, as well as, eliminate the need for manually processing the R-84 Final Disposition Green Sheets.

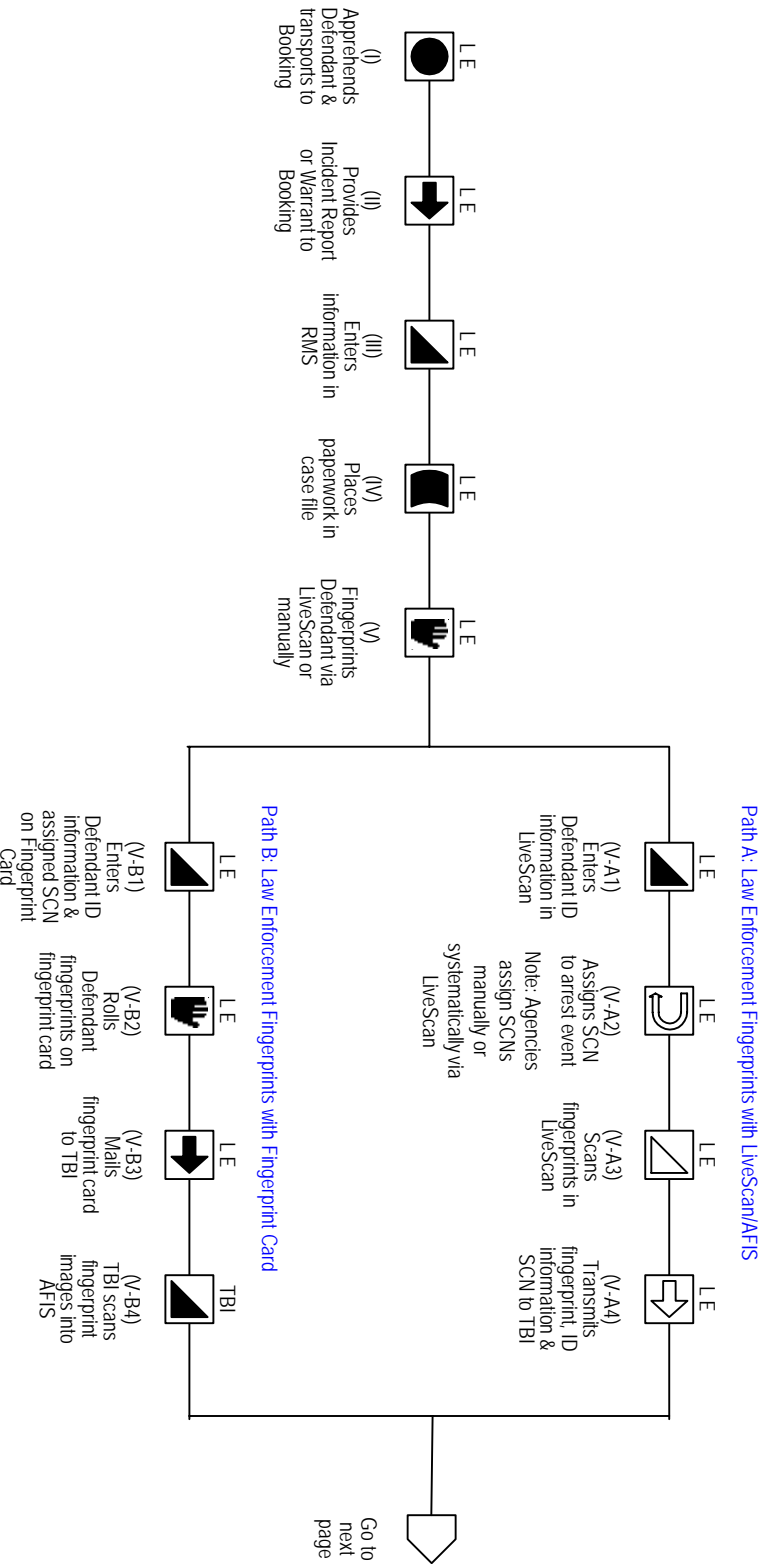

WARRANT REPOSITORY -- Enhance the processes associated with entering, accessing, archiving and purging the Tennessee Repository for Apprehension of Persons (TRAP) database.

AUTOMATED WORKFLOW FOR WARRANTS -- Utilize a computer process to create Warrants. The online data fields could contain drop-down lists that enforce business rules. The system would send information from one agency to another based upon "online approvals."

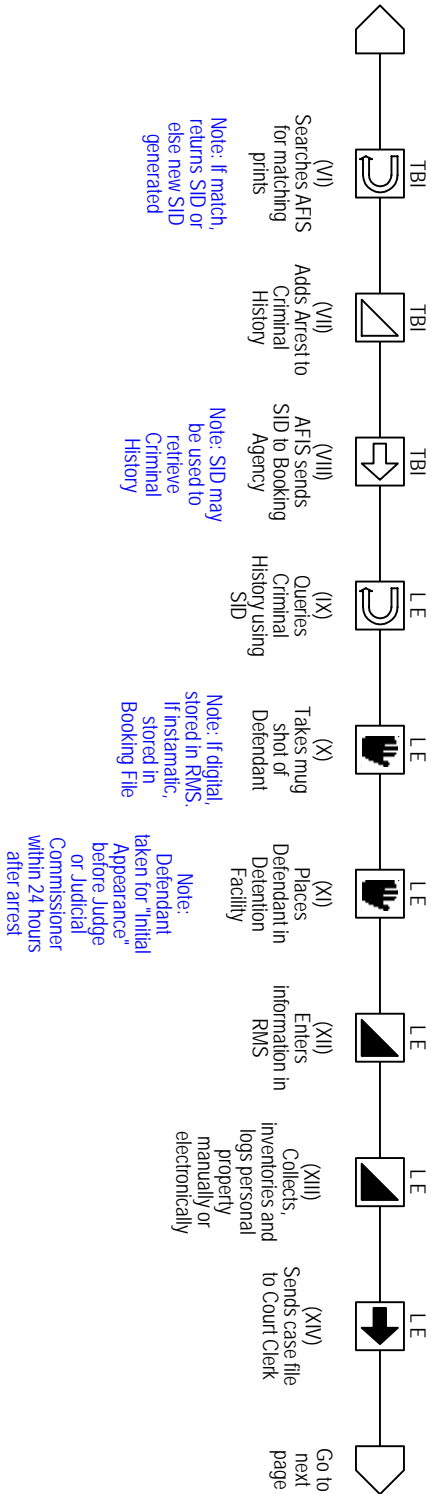

ARREST & BOOKING

Arrest & Booking: Process Diagram

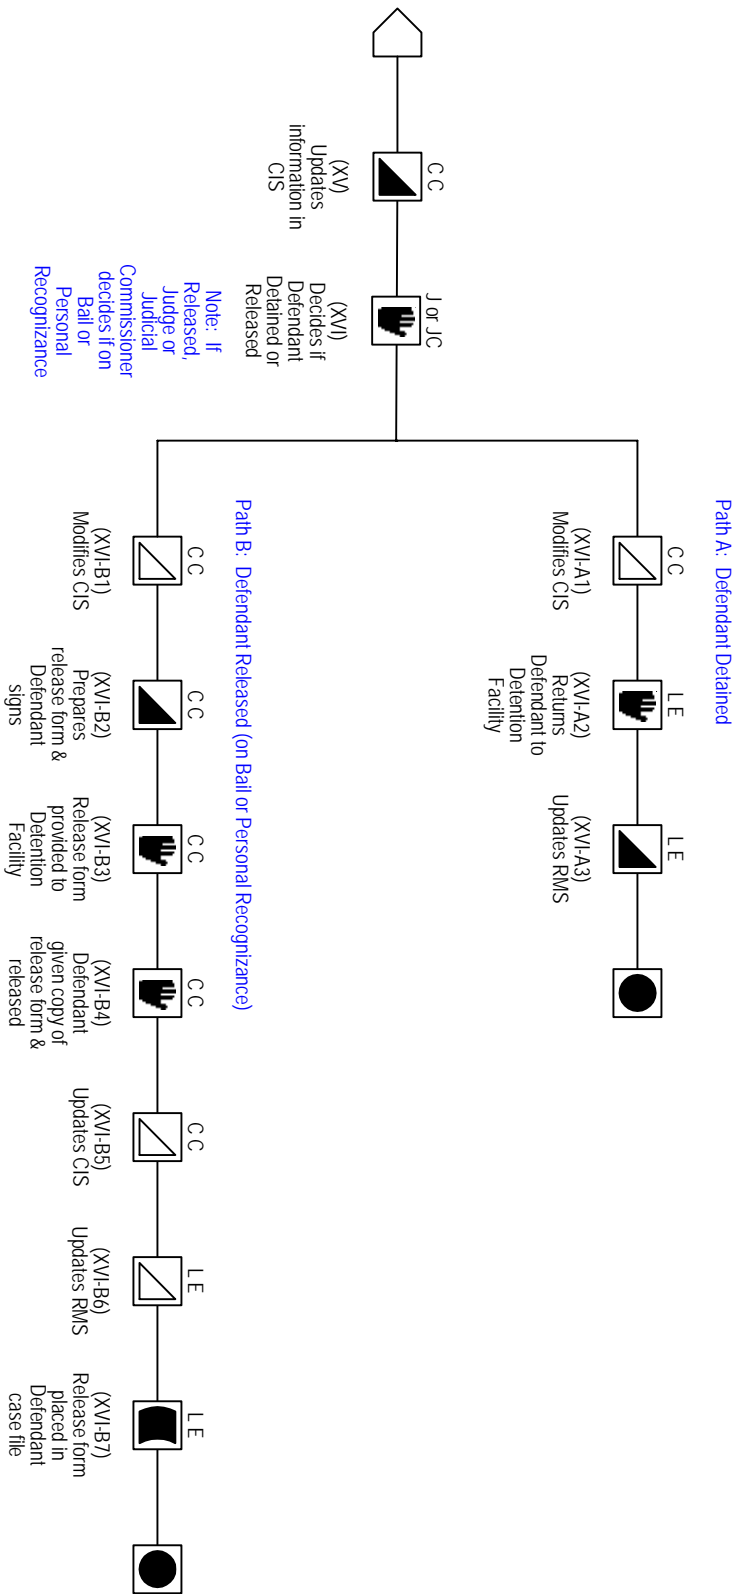

"As-Is" Model: Arrest & Booking (Page 1 of 3)

"As-Is" Model: Arrest & Booking (Page 2 of 3)

"As-Is" Model: Arrest & Booking (Page 3 of 3)

Arrest & Booking: Process Overview

A Defendant may be arrested on the basis of an outstanding Arrest Warrant or immediately following the commission of a crime. Upon arrest by Law Enforcement Officer, the Defendant is typically taken to the County Jail to be booked. During the Booking process, demographic information is collected and a photograph (i.e., mug shot) is taken by the Booking agency. The Defendant is fingerprinted and the fingerprints are submitted to the Tennessee Bureau of Investigation (TBI). Upon receipt of the information, the TBI performs a Criminal History Check and return the results of the check to the Booking agency. Based on the nature of the Defendant's crime and criminal history, the Defendant may be released, placed in jail, or permitted to post bail.

Key information exchanges that take place during the **Arrest & Booking** process are described below:

I. Law Enforcement Apprehends Defendant and Transports to Booking

A Law Enforcement Officer takes the Defendant into custody and transports him to a Booking Agency such as the County Jail.

II. Law Enforcement Provides Incident Report or Warrant to Booking

The arresting Officer provides a completed Incident Report and/or Arrest Warrant to the Officer who is responsible for the Booking process.

III. Law Enforcement Enters Information in Records Management System

The Booking Officer enters information about the Defendant into the Booking Agency's Records Management System. The information is gathered from: (1) the documents provided by the arresting Officer, (2) the arresting Officer's testimony, (3) Observations made by the Booking Officer, and/or (4) the Defendant's testimony.

IV. Law Enforcement Places Paperwork in Case File

The information received by the Booking Officer is placed in the Defendant's paper case file (i.e., Booking File). The Booking File contains a variety of information about the arrest and is maintained by the Booking Agency while the Defendant is in their custody.

V. Law Enforcement Fingerprints Defendant

Most Booking Agencies capture and transmit fingerprint information electronically to the TBI using LiveScan devices. Booking Agencies that do not use LiveScan devices capture and transmit fingerprint information with ink and paper fingerprint cards.

A. LAW ENFORCEMENT FINGERPRINTS WITH LIVESCAN/AFIS

1. The Booking Officer enters the Defendant's basic identification information into a LiveScan device.
2. A State Control Number is assigned to the current arrest event (i.e., fingerprint submission event). Booking Agencies with LiveScan devices may configure the device to systematically assign a State Control Number to each subsequent fingerprint submission or they may assign State Control Numbers manually.
3. The Booking Officer scans the Defendant's fingerprints into the LiveScan device. The Booking Officer verifies that the fingerprint images meet the standards for classification.

4. The LiveScan device sends the Defendant's fingerprint images, basic identification information, and the assigned State Control Number electronically to the TBI.

B. LAW ENFORCEMENT FINGERPRINTS WITH FINGERPRINT CARD

1. The Booking Officer assigns a State Control Number to the current arrest event. The Booking Officer writes the Defendant's basic identification information and State Control Number onto a Fingerprint Card.
2. The Booking Officer "rolls" the Defendant's fingerprints in ink and captures their images on a paper fingerprint card. The Booking Officer verifies that the fingerprint images meet the standards for classification.
3. The Booking Agency mails the fingerprint card to the TBI.
4. Since the fingerprint images were received on a fingerprint card, the TBI must scan a digital image of the fingerprint images into its computer system.

VI. *TBI Searches AFIS for Matching Fingerprints*

The TBI checks the Defendant's fingerprints against the Automated Fingerprint Identification System (AFIS) database. If a match for the submitted fingerprints is found in AFIS, the Defendant's criminal history record is retrieved from the Tennessee Criminal History Repository (TCHR). The Defendant's name and State Identification Number (SID) are gathered from the record. If there is no match found for the submitted fingerprints in AFIS, the system will generate a new SID number for the Defendant.

VII. *TBI Adds Arrest to Criminal History*

The TBI adds the new arrest information to the Tennessee Criminal History Repository. Submitted fingerprint images are added to AFIS when: (1) a new Criminal History record is created or (2) the submitted fingerprint images are deemed superior to the currently stored fingerprint images. The superior images are stored in AFIS and the previous images are discarded by the system.

VIII. *TBI (AFIS) Sends SID to Booking Agency*

The TBI sends either the previously assigned SID number and Defendant's name or a newly generated SID number to the Booking Agency. When fingerprints are submitted to the TBI with a LiveScan device, the SID Number is returned to the Booking Agency shortly after submission. When fingerprints are submitted on a fingerprint card, the SID Number may be returned to the Booking Agency via mail, telephone or fax.

IX. *Law Enforcement Queries Criminal History using SID*

When the Defendant's identity is determined to be different than originally disclosed or the Booking Officer needs additional information, a query of the Tennessee Criminal History Repository may be conducted using the SID number returned by the TBI. The Criminal History check will provide information about the Defendant's prior arrests, case dispositions, and/or outstanding warrants. The Booking Agency uses this information to determine if a Defendant is eligible to be released on bail, or if they should contact other Law Enforcement Agencies that are seeking the Defendant.

X. Law Enforcement Takes Mug Shot of Defendant

The Booking Officer will take a mug shot of the Defendant. Some Booking Agencies have the technology to capture a digital photograph image and store it along with demographic information in a Records Management System or database. Many Booking Agencies use an instamatic camera and store the physical photographs in the Defendant's Booking File.

XI. Law Enforcement Places Defendant in Detention Facility

The Booking Agency places the Defendant in a Detention Facility at the County Jail until the "Initial Appearance" before the Judge or Judicial Commissioner. This "Initial Appearance" must take place within 24 hours after the arrest.

XII. Law Enforcement Enters Information in Records Management System

The Booking Agency enters information about the Defendant into the Detention Facility's Records Management System.

XIII. Law Enforcement Collects, Inventories and Logs Personal Property

A Law Enforcement Officer collects the Defendant's personal property, inventories the items and enters a description of the property into a manual or electronic log.

XIV. Law Enforcement Sends Case File to Court Clerk

The Booking Agency notifies the Court Clerk's Office of the arrest by sending the Defendant's paper case file to the Court Clerk's Office.

Note: In some of Tennessee's larger jurisdictions, the Booking Agency and the Court Clerk's Office share a common Records Management System. In these instances, the entry of an arrest record into the Booking Agency's sub-system results in the simultaneous creation of an arrest record in the Court Clerk's Office sub-system.

XV. Court Clerk Updates Information in Court Information System

The Court Clerk's Office updates the Court Information System with a record of the arrest including the State Control Number and Offender's State ID.

XVI. Judge or Judicial Commissioner Decides if Defendant Detained or Released

The Defendant is taken before a Judge or Judicial Commissioner for an "Initial Appearance". The Judge or Judicial Commissioner reviews the arrest information and decides whether the Defendant should be: (A) Detained by the Booking Agency or (B) Released on Bail/Personal Recognizance. During the "Initial Appearance", the Defendant is advised of the Law Enforcement Agency's charges against him and is afforded the right to counsel. In many instances, the "Initial Appearance" is combined with a Bail/Release On Recognizance hearing.

A. DEFENDANT DETAINED

1. The Court Clerk's Office modifies its Court Information System to reflect that the Defendant will be detained.
2. The Law Enforcement Agency that has custody of the Defendant will return him to the Detention Facility.

3. The Detention Facility's Records Management System is updated to reflect the denial of the Defendant's release.

B. DEFENDANT RELEASED (ON BAIL OR PERSONAL RECOGNIZANCE)

1. The Court Clerk's Office modifies the record of the case within its Court Information System to reflect that the Defendant is eligible to be released on bail and the bail provisions or recognizance.
2. The Court Clerk's Office prepares a release form for the Defendant. If the Defendant is able to post bail, the Court Clerk Official who is authorized to collect bail updates the release form with information about the release (date, time, payer, other) and returns the form to the Court Clerk's Office. The Defendant must sign the written agreement to appear when required and to comply with the conditions of the bail bond.
3. The release form is given to the Law Enforcement Agency that has custody of the Defendant.
4. The Defendant is given a copy of the release form and is released.
5. The Court Clerk's Office modifies the record of the case within its Court Information System to reflect the details of the release.
6. The Defendant's record within the Detention Facility's Records Management System is updated to reflect the Defendant's release on bail or recognizance.
7. A copy of the release form is placed in the Defendant's paper case file.

Arrest & Booking: Agency Roles & Responsibilities

Criminal justice agencies involved in the **Arrest & Booking** process and their information exchange responsibilities are listed below.

Court Clerk's Office

- Receives arrest information from Law Enforcement Agencies.
- Keeps records of arrest information received from Law Enforcement Agencies.
- Provides information to Judges/Judicial Commissioners that administer a Defendant's initial appearance.
- Keeps records of the outcome of a Defendant's initial appearances.
- Completes Confinement Authorizations or Release Authorizations following a Defendant's initial appearance.
- Provides Law Enforcement Agencies with Confinement Authorization and Release Authorization forms (when applicable).
- Collects and records payments (bond, fees, fines, other) received from Defendants.

Judge or Judicial Commissioner

- Receives and reviews information provided by the Court Clerk's Office for the administration of a Defendant's "initial appearance".
- Administers various information exchanges associated with a Defendant's "initial appearance" proceedings.

Law Enforcement Agency

- Provides Booking Agencies and Court Clerk's Offices with information about an arrest.
- Receives and processes information from arresting Law Enforcement Agencies in order to facilitate the booking of a Defendant.
- Keeps records of information collected from Defendants and arresting Law Enforcement Agencies during the Booking process.
- Collects and stores Defendant's fingerprint images and basic identification information.
- Submits Defendant's fingerprint images and basic identification information to the Tennessee Bureau of Investigation (TBI).
- Captures and stores a Defendant's mug shot/photograph.
- Receives a Defendant's State Identification Number from the TBI.
- Obtains a Defendant's criminal history/background by querying the TBI's Tennessee Criminal History Repository.
- Receives Confinement Authorization and Release Authorization forms from the Court Clerk's Office (when applicable).

Tennessee Bureau of Investigation

- Receives and processes Defendant's fingerprint images and basic identification information submitted by Booking Agencies.
- Checks a Defendant's fingerprint images against the Automated Fingerprint Identification System (AFIS) and determines a Defendant's State Identification Number.
- Returns a Defendant's State Identification Number to a requesting Booking Agency.
- Provides criminal history/background information to a Law Enforcement Agencies via the Tennessee Criminal History Repository.

Arrest & Booking: Information Exchange

The Events that generate inter-agency Information Exchange within the **Arrest & Booking** process are shown in the table below.

Information Exchange during the Arrest & Booking Process

ID	EVENT	INFORMATION EXCHANGED	SEND AGENCY	RECEIVE AGENCY	METHOD	FREQ

Arrest & Booking: Technology

The table below details the primary computer systems and databases used in exchange of information during the **Arrest & Booking** process. See Appendix D for more detailed information about computer systems and applications.

Arrest & Booking – Technology

NAME	DESCRIPTION
Automated Fingerprint Identification System (AFIS)	A computer system that is housed at the TBI. It contains all of the digital fingerprints of criminal offenders in Tennessee. LiveScan fingerprints are sent to AFIS via LiveScan. The prints are compared to prints that are in the AFIS database. If a match is found, the system returns the State ID Number and identifying information of the offender. Maintained by: Tennessee Bureau of Investigations
Court Information System (CIS)	A court information system is used to manage the daily affairs of the court clerk's office. It contains functionality for Case History, Master Person File, Bill-of-Cost, Case Disposition Rule & Execution, and Reporting System and generates a docket number. Maintained by: Court Clerk's Office
LiveScan	LiveScan is a computer system that digitally captures fingerprint images and information about the person being printed and then electronically transmits that data to a law enforcement repository for identification purposes. Maintained by: Federal Bureau of Investigations
Records Management System (RMS)	A computer system that captures and stores information about a case and promotes an agency's ability to manage its records. Maintained by: Law Enforcement Agency, Detention Facility
Tennessee Criminal History Repository (TCHR)	The Tennessee Criminal History Repository (TCHR) contains information about arrests, charges, and final dispositions of individuals who have committed offenses in Tennessee. Maintained by: Tennessee Bureau of Investigation (TBI)

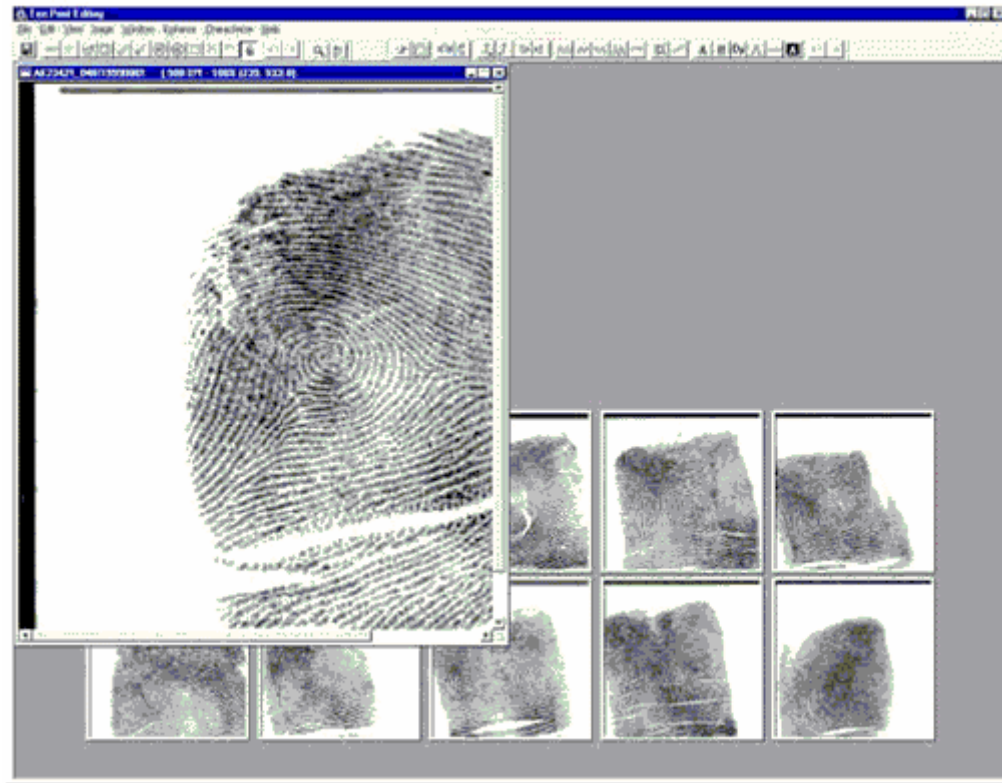

Arrest & Booking: Forms

ID	FORM NAME	FORM DESCRIPTION
F-8	Fingerprint Card	The FD-285 Fingerprint Card is provided by the FBI.
F-9	AFIS Input	The LiveScan/Automated Fingerprint Identification System (AFIS) is an online version of the fingerprint card. It is available at many of the Booking agencies in Tennessee.

LiveScan/Automated Fingerprint Identification System (AFIS)

Arrest & Booking: Opportunities for Improvement

The "Opportunities for Improvement" section provides a general list of observations compiled during the ICJ project interview phase. These ideas will be considerations for the development of the "To-Be" Model regarding the **Arrest & Booking** process.

LIVESCAN/AFIS -- Implement LiveScan and AFIS technology at all Booking Agencies in Tennessee. This would promote automated digital fingerprinting, and create efficiencies in searching the TBI's criminal database. It would eliminate the need to submit fingerprints to the TBI via the mail, and reduce paperwork.

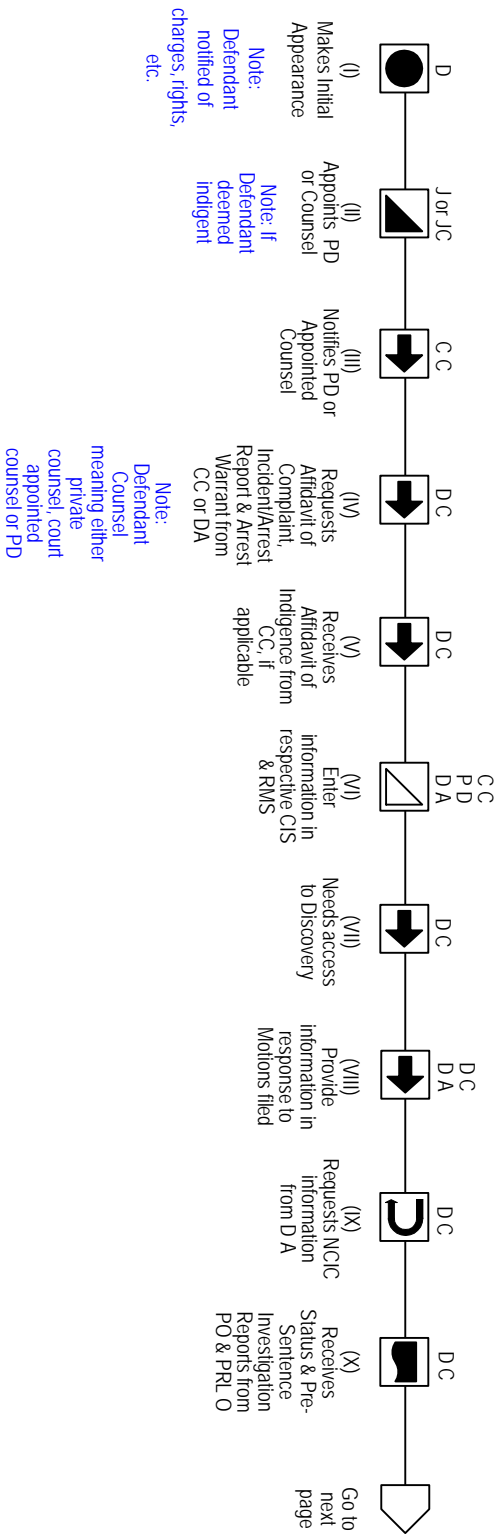

AFIS -- Implement process whereby AFIS pushes criminal history to Booking Agencies automatically when a fingerprint match is found. Today, only the State Identification number is returned to the Booking Agencies and a separate query has to be initiated by the Booking Agencies.

RMS -- Determine an agreed upon format to push basic identification information to the various Records Management Systems throughout the Criminal Justice System. There is considerable duplication of effort in entering the same information on each separate system.

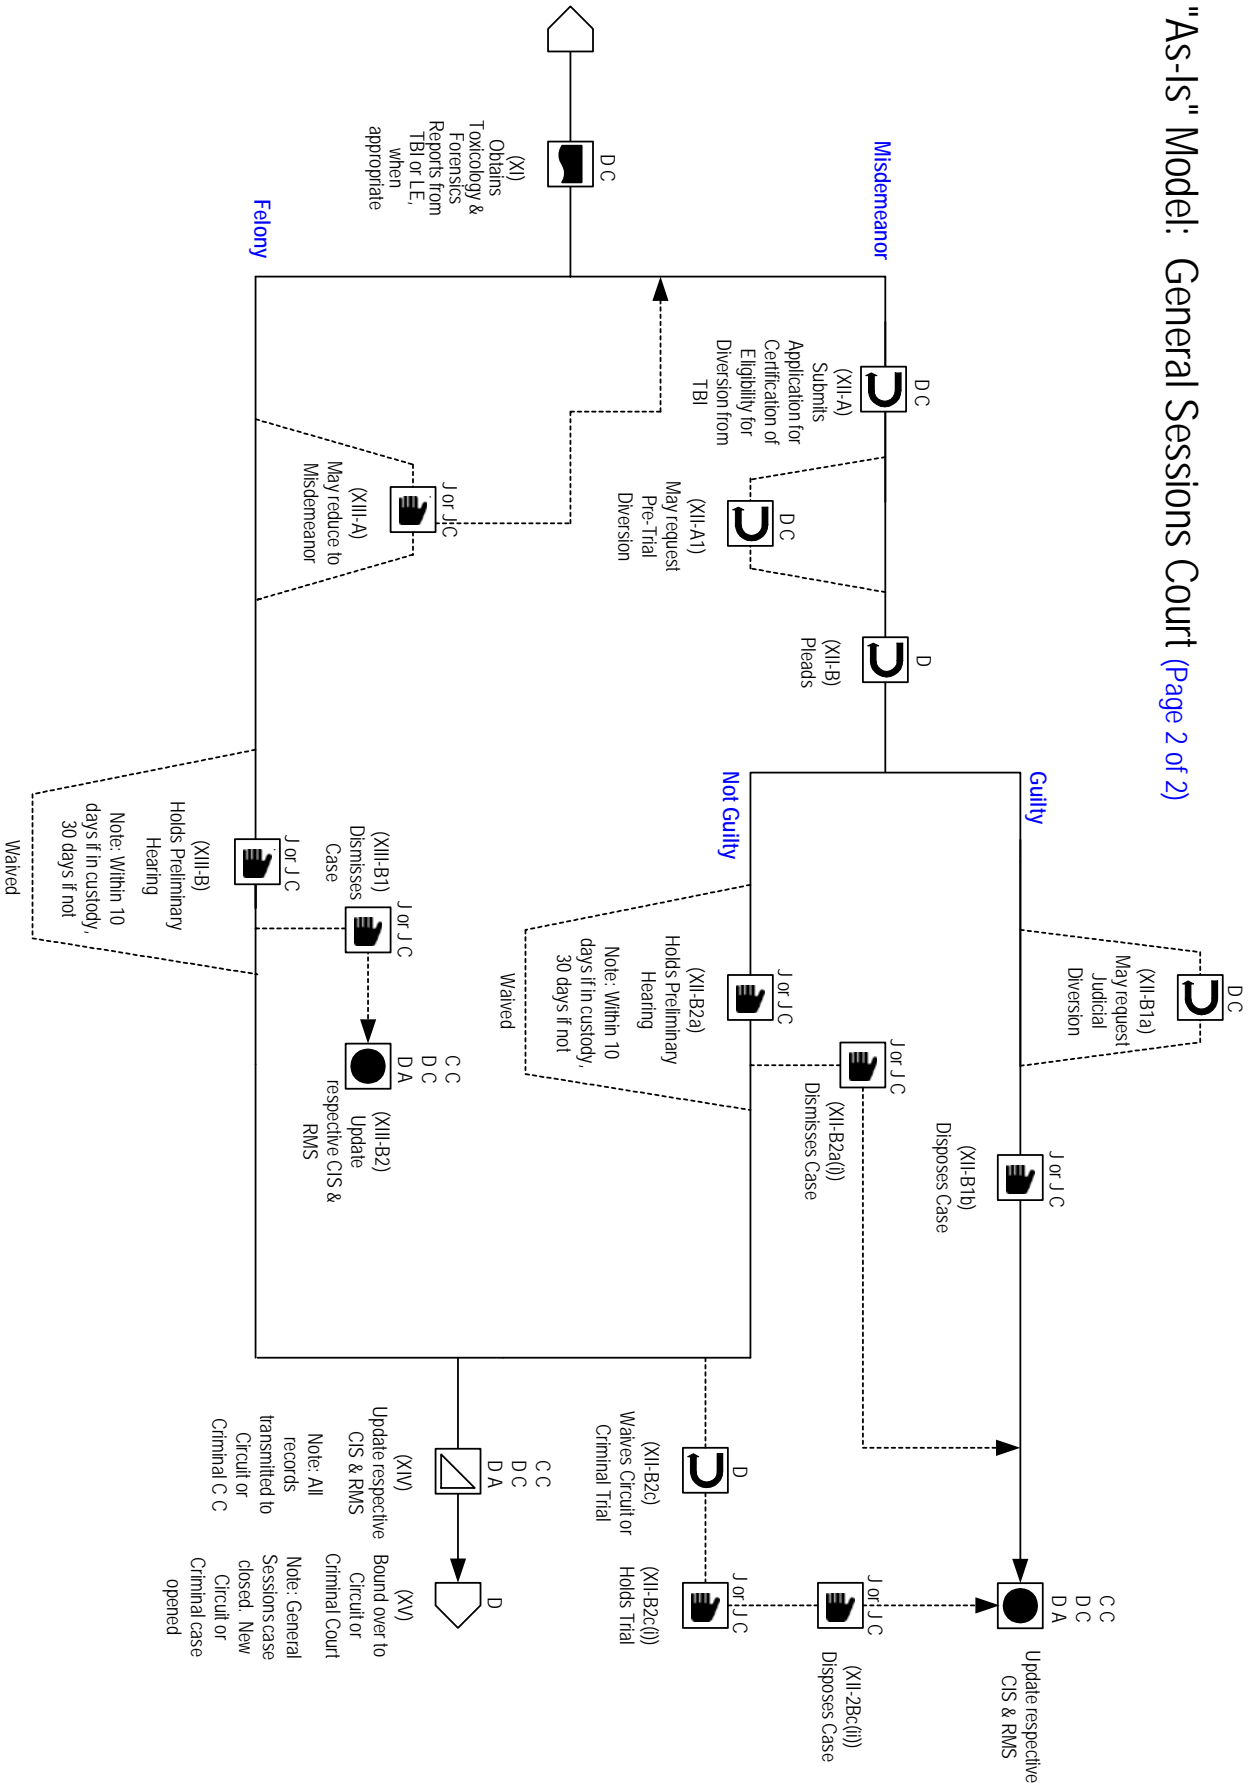

GENERAL SESSIONS COURT

General Sessions Court: Process Diagram

"As-Is" Model: General Sessions Court (Page 1 of 2)

"As-Is" Model: General Sessions Court (Page 2 of 2)

General Sessions Court: Process Overview

Whether a Defendant has been arrested with an Arrest Warrant or asked to appear in court via a Criminal Summons, he must stand before a Judge or Judicial Commissioner (Magistrate or Clerk) for an Initial Appearance without delay (usually within 48 hours). During this Initial Appearance, the Defendant is notified of the charges and all of his rights including the right to Counsel. If the Defendant is determined to be indigent and has not acquired a private attorney, the court will appoint a Public Defender or Private Counsel to represent him in these proceedings.

A Preliminary Hearing to determine Probable Cause may occur in General Sessions Court before a Judge or Judicial Commissioner (Magistrate or Clerk) but the Defendant has the right to waive this Preliminary Hearing. The Defendant may have other options depending on whether the offense charged is a misdemeanor or felony.

If the offense is a misdemeanor, the Defendant can waive the right to a Circuit or Criminal Trial, in which case, the Judge or Judicial Commissioner holds the trial and disposes case. Otherwise, the case will be bound over to Circuit or Criminal Court for disposition.

Felonies cannot be adjudicated in General Sessions Court; therefore, they must be bound over to Circuit or Criminal Court, or reduced to misdemeanors via plea-bargaining.

Key information exchanges that take place during the **General Sessions Court** process are described below:

I. Defendant Makes Initial Appearance

Within approximately 48 hours, a Defendant who has been detained by Law Enforcement has the right to face a Judge or Judicial Commissioner. The Defendant is notified of his charges and rights, including his right to counsel (Private or Public).

II. Judge or Judicial Commissioner Appoints Public Defender or Counsel

If the Defendant is determined to be indigent and has not acquired a private attorney, the court will appoint a Public Defender or Private Counsel to represent him.

III. Court Clerk Notifies Public Defender or Appointed Counsel

The Court Clerk notifies the Public Defender or Court Appointed Counsel of the new Defendant. In some jurisdictions, a Public Defender representative is present at the Initial Appearance and aware of newly appointed counsel.

IV. Defendant Counsel Requests Affidavit of Complaint, Incident/Arrest Report & Arrest Warrant from Court Clerk or District Attorney

Throughout this document, Defendant Counsel is used to indicate either private counsel, court appointed counsel or public defender. Defendant Counsel requests and reviews the Affidavit of Complaint, Incident/Arrest Report and Arrest Warrant from Court Clerk or District Attorney to learn details of the Defendant's charges.

V. Defendant Counsel Receives Affidavit of Indigence from Court Clerk, if Applicable

The Defendant Counsel receives a hard copy of the Affidavit of Indigence from the Court Clerk, if applicable.

VI. *Court Clerk, Public Defender and District Attorney Enter Information in Respective Court Information System & Records Management System*

The various agencies enter information about the defendant and the case in their respective court information and records management systems.

VII. *Defendant Counsel Needs Access to Discovery*

Defendant Counsel needs access to Discovery that includes:

- Court information
- Criminal History
- Dispositions
- Driver Information
- Mental Health Information
- NCIC
- Personal Information
- Photos
- Physical Descriptors
- Prior Convictions
- Prison Data
- Respective Case Information
- Witness Information

VIII. *Defendant Counsel and District Attorney Provide Information in Response to Motions Filed*

Defendant Counsel and District Attorney provide information in response to motions filed by either side.

IX. *Defendant Counsel Requests NCIC Information from District Attorney*

Defendant Counsel requests NCIC criminal history and warrants information from the District Attorney.

X. *Defendant Counsel Receives Status & Pre-Sentence Investigation Reports from Probation & Parole Officers*

The Pre-Sentence Investigation is entered on Tennessee Offender Management Information System (TOMIS) and the report is created. If the Offender has previously been incarcerated and a TOMIS ID was assigned, that same ID should be used to enter this new information. Otherwise, a new TOMIS ID is assigned. Defendant Counsel receives and reviews status and Pre-Sentencing Investigation reports from local Probation and Parole Officers.

XI. Defendant Counsel Obtains Toxicology & Forensics Reports from TBI or Law Enforcement, when Appropriate

When appropriate, Defendant Counsel obtains hard copy Toxicology and Forensics reports from the TBI or other Law Enforcement agency.

XII. If Offense is a Misdemeanor

A. DEFENDANT COUNSEL SUBMITS APPLICATION FOR CERTIFICATION OF ELIGIBILITY FOR DIVERSION FROM TBI

Defendant Counsel submits application for certification that defendant has no prior disqualifying Felony or Class A Misdemeanor convictions to the TBI. This form is used in determining eligibility for Pretrial or Judicial Diversion.

1. Defendant Counsel May request Pre-Trial Diversion

Pre-Trial Diversion is a form of probation with conditions that the Defendant must meet. If the conditions are met, the Judge or Judicial Commissioner can dismiss the charges and no record will appear for the Defendant. The Judge or Judicial Commissioner will only accept Diversion if the Defendant has no prior Felony or Class A Misdemeanor convictions and with the District Attorney's approval.

B. DEFENDANT PLEADS

1. If Defendant pleads Guilty

a. Defendant Counsel May request Judicial Diversion

Judicial Diversion is similar to Pre-Trial Diversion above except that the Defendant has pleaded guilty and sentencing is what is held pending the Defendant meeting the conditions set.

b. Judge or Judicial Commissioner Disposes Case

c. Court Clerk, Defendant Counsel and District Attorney update their respective Court Information System and Records Management System

2. If Defendant pleads Not Guilty

a. Judge or Judicial Commissioner holds Preliminary Hearing

The Judge or Judicial Commissioner must hold a Preliminary Hearing to determine probable cause within 10 days if Defendant is in custody, within 30 days if not in custody. The Defendant has the right to waive this Preliminary Hearing.

i. Judge or Judicial Commissioner May Dismiss Case

The Judge or Judicial Commissioner may dismiss the case during the Preliminary Hearing if it is determined that there is no probable cause.

ii. Court Clerk, Defendant Counsel and District Attorney update their respective Court Information System and Records Management System

b. The Defendant May Waive the Preliminary Hearing

c. The Defendant May Waive Trial by Circuit or Criminal Court

i. Judge or Judicial Commissioner holds Trial

ii. Judge or Judicial Commissioner disposes case

iii. Court Clerk, Defendant Counsel and District Attorney update their respective Court Information System and Records Management System

- d. Skip forward to XIV. Court Clerk, Defendant Counsel and District Attorney update their respective Court Information System and Records Management System

XIII. If Offense is a Felony

- A. JUDGE OR JUDICIAL COMMISSIONER MAY REDUCE CHARGE TO MISDEMEANOR
- B. JUDGE OR JUDICIAL COMMISSIONER HOLDS PRELIMINARY HEARING

The Judge or Judicial Commissioner must hold a Preliminary Hearing to determine probable cause within 10 days if Defendant is in custody, within 30 days if not in custody. The Defendant has the right to waive this Preliminary Hearing.

1. Judge or Judicial Commissioner May Dismiss Case

The Judge or Judicial Commissioner may dismiss the case during the Preliminary Hearing if it is determined that there is no probable cause.

2. Court Clerk, Defendant Counsel and District Attorney update their respective Court Information System and Records Management System

- C. THE DEFENDANT MAY WAIVE THE PRELIMINARY HEARING

XIV. Court Clerk, Defendant Counsel and District Attorney Update their Respective Court Information System and Records Management System

XV. The Defendant is Bound Over to Circuit or Criminal Court

The Defendant is bound over to the Circuit or Criminal Court for adjudication. The General Sessions case is closed and a new Circuit or Criminal Court case is opened. All General Sessions records are forwarded to the Circuit or Criminal Court Clerk.

General Sessions Court: Agency Roles & Responsibilities

Agencies involved in the **General Sessions Court** process and their primary information exchange responsibilities are listed below.

Court Clerk's Office

- Issues the Arrest Warrants and Criminal Summons.
- Notifies the District Attorney's Office and Public Defender's Office about their respective assignments to a new case.
- Provides the District Attorney's Office and Public Defender's Office with information about a case.
- Provides copies of Court Appearance Schedules to Law Enforcement Agencies that have custody of Defendants.
- Keeps records of various motions/filings made by the District Attorney's Office and Public Defender's Office.
- Keeps records of the Judge's Findings and other information exchanged during court proceedings.
- Collects and processes completed Case Judgment Documents received from the Judge.
- Distributes copies of completed Case Judgment Documents to the Administrative Office of the Courts, the District Attorney's Office, Department of Correction, and Law Enforcement Agencies (when applicable).
- Submits final disposition information to the TBI (when applicable).
- Collects payments and ensures that Victim(s) receive restitution when a Defendant is ordered to pay fines and/or restitution.
- Captures verbatim record of speeches, conversations, legal proceedings, meetings and other events.

Law Enforcement Agency

- Serves the Arrest Warrants and/or Criminal Summons.
- Takes Offenders to Booking for processing.
- Provides the District Attorney's Office with information about a case, incident/offense, and/or arrest.
- Provides the District Attorney's Office with information about a specific Defendant, Victim, and/or Witness.
- Collects and processes Court Appearance Schedules received from the Court Clerk's Office.
- Collects and processes copies of Case Judgment Documents received from the Court Clerk's Office.
- Submits Final Disposition Report (R-84) information to the TBI.

County Jail

- Collects and processes copy of Case Judgment Document received from the Court Clerk's Office.
- Keeps records of Case Judgment Documents received from the Court Clerk's Office.

District Attorney's Office

- Collects and processes case information received from the Court Clerk's Office.
- Collects and processes case information received from Law Enforcement Agencies.
- Collects and processes information related to a specific Defendant, Victim, and/or Witness received from Law Enforcement Agencies.
- Facilitates plea bargain/agreement proceedings.
- Files various motions/forms with the Court Clerk's Office.
- Presents evidence to a Jury, Judge or Judicial Commissioner.
- Completes and submits drafts of Case Judgment Documents to the Judge.
- Collects and processes copy of Case Judgment Document received from the Court Clerk's Office.

Public Defender's Office

- Receives information related to an assigned case from the Court Clerk's Office.
- Participates in plea agreement/bargain proceedings.
- Represents Defendant at Preliminary Hearing or Trial on merits.
- Collects and files copy of Plea Agreement received from the District Attorney's Office.
- Presents evidence to a Jury, Judge or Judicial Commissioner.
- File various motions/forms with the Court Clerk's Office.

Judge and/or Judicial Commissioner

- Administers court proceedings.
- Reviews information/documents related to a specific case.
- Requests and reviews Pre-Sentence Investigation reports.
- Reviews drafts of Case Judgment Documents submitted by the District Attorney's Office.
- Makes modifications to drafts of Case Judgment Document submitted by the District Attorney's Office (when necessary).
- Records Judicial Notes and Opinions.
- Submits completed Case Judgment Documents to the Court Clerk's Office.

Administrative Office of the Courts

- Collects and processes copies of Case Judgment Documents received from the Court Clerk's Offices.
- Keeps records of felony cases and their corresponding judgment.

General Sessions Court: Opportunities for Improvement

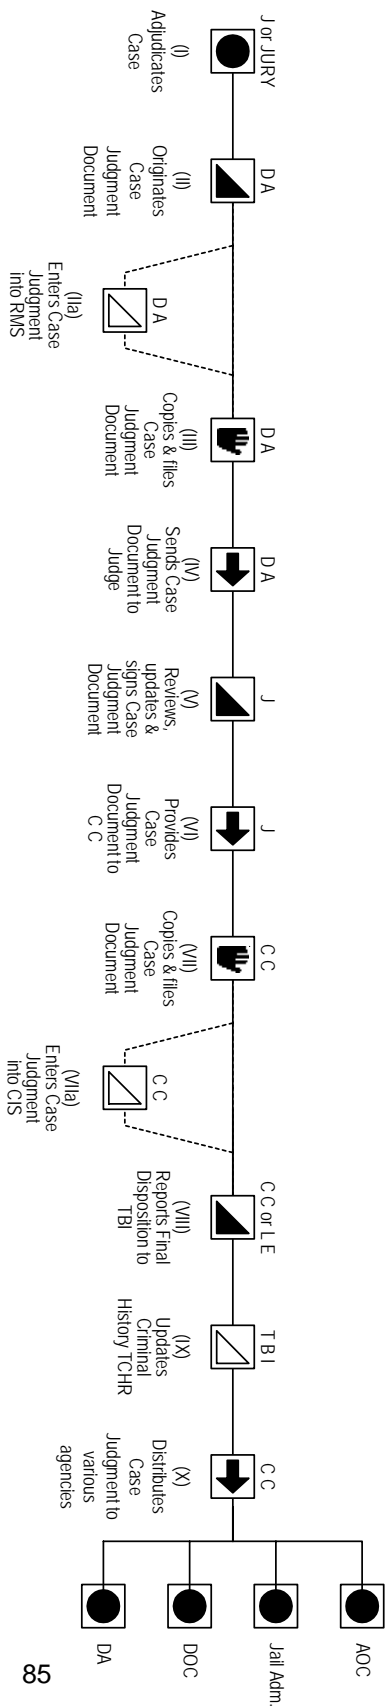

The "Opportunities for Improvement" section provides a general list of observations compiled during the ICJ project interview phase. These ideas will be considerations for the development of the "To-Be" Model regarding the **General Sessions Court** process.

INTEGRATE COURT INFORMATION SYSTEM & RECORDS MANAGEMENT SYSTEM – Improve these systems to allow sharing of duplicate information. This would eliminate duplicate entry of information and keying errors.

CIRCUIT OR CRIMINAL COURT

Circuit or Criminal Court: Process Diagram

"As-Is" Model: Circuit or Criminal Court

Circuit or Criminal Court: Process Overview

The purpose of the As-Is Model is to highlight the information exchanges that occur between state, county and/or municipal criminal justice agencies. There are many internal processes within an organization that can be improved with technology or reengineering that we will not cover in this document. The court system is very complex in nature, and has an abundance of variables that affect its internal processes. In this section, we will only look at the processes that initiate data exchanges with agencies outside of the court.

Key information exchange events that occur during the **Circuit or Criminal Court** process are described below.

I. Judge or Jury Adjudicates Case

During a criminal trial, the District Attorney and the Public Defender present evidence to a Jury and/or Judge, witnesses testify, and closing statements are made.

If the defendant is found "not guilty," the case is dismissed. When a "guilty" verdict is reached, the Judge sets a sentencing date.

Prior to sentencing, the Judge will request that Probation & Parole perform a Pre-Sentence Investigation. This includes research of criminal history resources, Law Enforcement Agencies, employers, victims, family members and witnesses. The Pre-Sentence Investigation results and sentencing recommendations are made before the Judge.

At the Sentencing Hearing, the Defendant is given his sentence. If the Defendant is given Probation in lieu of incarceration, the Judge completes the Order of Probation form.

The Court Clerk's Office, the District Attorney's Office, and the Public Defender's Office record the sentence.

II. District Attorney Originates Case Judgment Document

The District Attorney's Office records the verdict and sentencing information on the Case Judgment Document.

- b. The District Attorney's Office enters information from the Case Judgment Document into their Records Management System.

III. District Attorney Copies and Files Case Judgment Document

The District Attorney's Office makes copies of the Case Judgment Document and files the document in their file cabinet.

IV. District Attorney Sends Case Judgment Document to Judge

The District Attorney's Office sends the draft of the Case Judgment Document to the Judge.

V. Judge Reviews, Updates and Signs Case Judgment Document

The Judge reviews the case judgment document draft, makes any modifications deemed necessary, documents associated notes and signs the Case Judgment Document.

VI. Judge Provides Case Judgment Document to Court Clerk

The Judge sends the signed Case Judgment Document and the associated notes to the Court Clerk's Office.

VII. Court Clerk Copies and Files Case Judgment Document

The Court Clerk's Office makes copies of the Case Judgment Document and files the original in a file cabinet.

- c. The Court Clerk's Office enters the judgment and sentencing data into the Court Clerk's Court Information System.

VIII. Court Clerk or Law Enforcement Reports Final Disposition to TBI

Upon receipt of a Case Judgment Document, the Court Clerk's Office or the Booking Agency completes a Final Disposition Report (R-84) form. The R-84 is sent to the TBI. The Booking Agency is responsible to send the R-84 to the TBI.

IX. Tennessee Bureau of Investigation Updates Criminal History (TCHR)

Upon receipt of a Final Disposition Report (R-84), the TBI updates the Tennessee Criminal History Repository record with the final disposition information. If the TBI personnel have any questions about the R-84, they have to contact the Court Clerk's Office to clarify the data on the form.

X. Court Clerk Distributes Case Judgment Document to Various Agencies

The Court Clerk's Office sends copies of the Case Judgment Document to the Administrative Office of the Courts, Jail Administrators (when appropriate), Department of Correction and District Attorney's Office.

The Administrative Office of the Courts, Jail Administrators, Tennessee Department of Correction and District Attorney's Office enter judgment and sentencing data into their respective Records Management Systems.

Circuit or Criminal Court: Agency Roles & Responsibilities

Agencies involved in the **Circuit or Criminal Court** process and their primary information exchange responsibilities are listed below.

Administrative Office of the Courts

- Collects and processes copies of Case Judgment Documents received from the Court Clerk's Offices.
- Keeps records of felony cases and their corresponding judgment.

Board of Probation & Parole

- Completes and provides Pre-Sentence Investigation Reports to the Judge.

Court Clerk's Office

- Notifies the District Attorney's Office and Public Defender's Office about their respective assignments to a new case.
- Provides the District Attorney's Office and Public Defender's Office with information about a case.
- Provides copies of Court Appearance Schedules to Law Enforcement Agencies that have custody of Defendants.
- Keeps records of various motions/filings made by the District Attorney's Office and Public Defender's Office.
- Keeps records of the Judge's Findings and other information exchanged during court proceedings.
- Collects and processes completed Case Judgment Documents received from the Judge.
- Distributes copies of completed Case Judgment Documents to the Administrative Office of the Courts, the District Attorney's Office, Department of Correction, and Law Enforcement Agencies (when applicable).
- Submits final disposition information to the TBI (when applicable).
- Collects payments and ensures that Victim(s) receive restitution when a Defendant is ordered to pay fines and/or restitution.
- Captures verbatim record of speeches, conversations, legal proceedings, meetings and other events.

Department of Correction

- Collects and processes copy of Case Judgment Document received from the Court Clerk's Office.
- Keeps records of Case Judgment Documents received from the Court Clerk's Office.

District Attorney's Office

- Collects and processes case information received from the Court Clerk's Office.
- Collects and processes case information received from Law Enforcement Agencies.

"As-Is" Model

Integrated Criminal Justice Project

- Collects and processes information related to a specific Defendant, Victim, and/or Witness received from Law Enforcement Agencies.
- Facilitates plea bargain/agreement proceedings.
- Files various motions/forms with the Court Clerk's Office.
- Presents evidence to a Jury and/or Judge.
- Completes and submits drafts of Case Judgment Documents to the Judge.
- Collects and processes copy of Case Judgment Document received from the Court Clerk's Office.

Law Enforcement Agency

- Provides the District Attorney's Office with information about a case, incident/offense, and/or arrest.
- Provides the District Attorney's Office with information about a specific Defendant, Victim, and/or Witness.
- Collects and processes Court Appearance Schedules received from the Court Clerk's Office.
- Collects and processes copies of Case Judgment Documents received from the Court Clerk's Office.
- Submits Final Disposition Report (R-84) information to the Tennessee Bureau of Investigation.

Judge

- Administers court proceedings.
- Reviews information/documents related to a specific case.
- Requests and reviews Pre-Sentence Investigation reports.
- Reviews drafts of Case Judgment Documents submitted by the District Attorney's Office.
- Makes modifications to drafts of Case Judgment Document submitted by the District Attorney's Office (when necessary).
- Records Judicial Notes and Opinions.
- Submits completed Case Judgment Documents to the Court Clerk's Office.

Public Defender's Office

- Receives information related to an assigned case from the Court Clerk's Office.
- Participates in plea agreement/bargain proceedings.
- Collects and files copy of Plea Agreement received from the District Attorney's Office.
- Presents evidence to a Jury and/or Judge.
- File various motions/forms with the Court Clerk's Office.

Circuit or Criminal Court: Information Exchange

The Events that generate inter-agency Information Exchange within the **Circuit or Criminal Court** process are shown in the table below.

SUBP	Subpoena Data
VIOL	Violation Data
WARR	Warrant Data

Circuit or Criminal Court: Technology

The table below details the primary computer systems and databases used in exchange of information during the **Circuit or Criminal Court** process. See Appendix D for more detailed information about computer systems and applications.

Circuit or Criminal Court – Technology

NAME	DESCRIPTION
Case Management System (CMS)	<p>A case management system is used to manage the proceedings of a court case. Attorneys from the District Attorney's Office and the Public Defender's Office often use it.</p> <p>Maintained by: District Attorney's Office, Public Defender's Office</p>
Court Information System (CIS)	<p>A court information system is used to manage the daily affairs of the court clerk's office. It contains functionality for Case History, Master Person File, Bill-of-Cost, Case Disposition Rule & Execution, and Reporting System and generates a docket number.</p> <p>Maintained by: Court Clerk's Office</p>
Records Management System (RMS)	<p>A computer system that captures and stores information about a case and promotes an agency's ability to manage its records.</p> <p>Maintained by: Administrative Office of the Courts, Law Enforcement Agency, Detention Facility, District Attorney's Office</p>

Circuit or Criminal Court: Forms

ID	FORM NAME	FORM DESCRIPTION
F-12	Case Judgment Document	The Judgment Sheet is generated by the District Attorney, and is completed by the court upon the final sentencing of the Defendant.
F-13	R-84 Final Disposition Report	The Booking agency has to provide the Final Disposition on this card and provide to the TBI.
F-14	Order of Probation	There are times when the judge issues a suspended sentence and places a Defendant on Probation. In some judicial districts, the judge completes a Probation form rather than the Judgment Sheet.

R-84 Final Disposition-Green Sheet

R-84 (Rev. 7-1-96)

FINAL DISPOSITION REPORT

Leave Blank

Note: This vital report must be prepared on each individual whose arrest fingerprints have been forwarded to the FBI Criminal Justice Information Services Division without final disposition noted thereon. If no final disposition is available to arresting agency, also obtain subject's right four finger impressions on this form, complete left side and forward the form when case referred to prosecutor and/or courts. Agency on notice as to final disposition should complete this form and submit to: **FBI, CJIS Division, Clarksburg, WV 26306.** (See instructions on reverse side)

FBI No.		Final Disposition & Date (If convicted or subject pleaded guilty to lesser charge, include this modification with disposition.)
Name on Fingerprint Card Submitted to FBI Last First Middle		
Date of Birth _____ Sex _____		
Henry Fingerprint Classification _____ From FBI 1-B Response		
State Bureau No. (SID)	Social Security No. (SOC)	This Form Submitted By: (Name, Title, Agency, ORI No., City & State)
Contributor of Fingerprints (Include complete name and location of agency, together with ORI number.)		
<div style="display: flex; justify-content: space-between;"> <div>Signature _____</div> <div>Date _____</div> </div> <div style="text-align: center;">Title _____</div>		
Arrest No. (OCA)	Date Arrested or Received	<input type="checkbox"/> COURT ORDERED EXPUNGEMENT: Return Arrest Fingerprint Card to Contributing Agency; Certified or Authenticated Copy of Court Order Attached.
Offenses Charged at Arrest		

If additional space is needed, check ☐ and continue on reverse side of this form.

R-84 Final Disposition-Green Sheet (Continued)

INSTRUCTIONS

1. The purpose of this report is to record the initial data of an individual's arrest and thereafter secure the **final disposition** of the arrest at the earliest possible time from either the arresting agency, the prosecutor or the court having jurisdiction. (INTERIM DISPOSITION INFORMATION, e.g., RELEASED ON BOND, SHOULD NOT BE SUBMITTED.) The SUBJECT'S NAME, CONTRIBUTOR AND ARREST NUMBER should be exactly the same as they appear on the fingerprint card IN THE FILES OF THE FBI. The FBI number should be indicated, if known. Agency ultimately making final disposition will complete and mail form to: **FBI Criminal Justice Information Services Division, Clarksburg, WV 26306.**
2. **The arresting agency** should fill in all arrest data on left side of form and obtain the finger impressions of the right four fingers simultaneously. This should be done at the same time as the full set of fingerprints are taken on the arrest fingerprint card. If the arrest is disposed of by the arresting agency, as where the arrestee is released without charge, then the arresting agency should fill in this final disposition and mail form to FBI Criminal Justice Information Services Division. Of course, if final disposition is known when arrest fingerprint card is submitted it should be noted thereon and this form is then unnecessary. In the event the case goes to the prosecutor, this form should be forwarded to the prosecutor with arrestee's case file.
3. **The prosecutor** should complete the form to show final disposition at the prosecution level if the matter is not being referred for court action and thereafter submit form directly to FBI Criminal Justice Information Services Division. If court action required, the prosecutor should forward form with case file to court having jurisdiction.
4. **The court** should complete this form as to final court disposition such as when arrested person is acquitted, case is dismissed, on conviction and when sentence imposed or sentence suspended and person placed on probation.
5. When arrested person convicted or enters guilty to lesser or different offense than that charged when originally arrested, this information should be clearly indicated.
6. If subsequent action taken to seal or expunge record, attach certified or authenticated copy of court order to this form so that FBI can return arrestee's fingerprints to original contributor.
7. It is **vitaly important** for completion of subject's record in the FBI Criminal Justice Information Services Division files that **Final Disposition Report** be submitted in every instance where fingerprints previously forwarded without final disposition noted thereon.

FPI-88T

Order of Probation

IN THE GENERAL SESSIONS CRIMINAL COURT
SHELBY COUNTY, TENNESSEE
DIVISION _____

STATE OF TENNESSEE

BOOKING NO. _____

VS.

CHARGE: _____

DEFENDANT _____

SUPPLEMENTAL ORDER OF PROBATION

This cause came on to be heard before the undersigned Judge, the above named defendant having entered a plea of guilty or having been convicted of an offense defined in Tennessee Code Annotated, Title 38, Chapter 13, in which the victim of the offense is a family or household member, as defined in Tennessee Code Annotated, Section 36-3-601. It appearing that the above named defendant is a good candidate to have all or part of the term of incarceration suspended and to be placed on probation. In consideration of the safety and protection of the victim of such offense and of any other member of the victim's family or household, this probation is conditioned upon compliance with one or more of the following conditions in addition to the conditions normally imposed with probation.

_____ The probationer is enjoined from threatening to commit or committing acts of violence against the victim or other household members;

_____ The probationer is prohibited from harassing, annoying, telephoning, contacting or otherwise communicating, either directly or indirectly, with the victim;

_____ The probationer is required to stay away from the residence, school, place of employment or a specified place frequented regularly by the victim and by any designated family or household member;

_____ The probationer is prohibited from possessing or consuming alcohol or controlled substances, and;

_____ The probationer is prohibited from using or possessing a firearm or any other specified weapon and is required to surrender and forfeit any weapon currently possessed;

_____ The probationer shall abide by the following special conditions of probation: _____

Entered this the _____ day of _____, yr. _____.

JUDGE

I, the above named defendant, have read or have had read to me the foregoing Supplemental Order of Probation. I full understand the Order and agree to comply with the terms and conditions set forth therein during my probationary period.

Circuit or Criminal Court: Opportunities for Improvement

The "Opportunities for Improvement" section provides a general list of observations compiled during the ICJ project interview phase. These ideas will be considerations for the development of the "To-Be" Model regarding the Circuit or Criminal Court process.

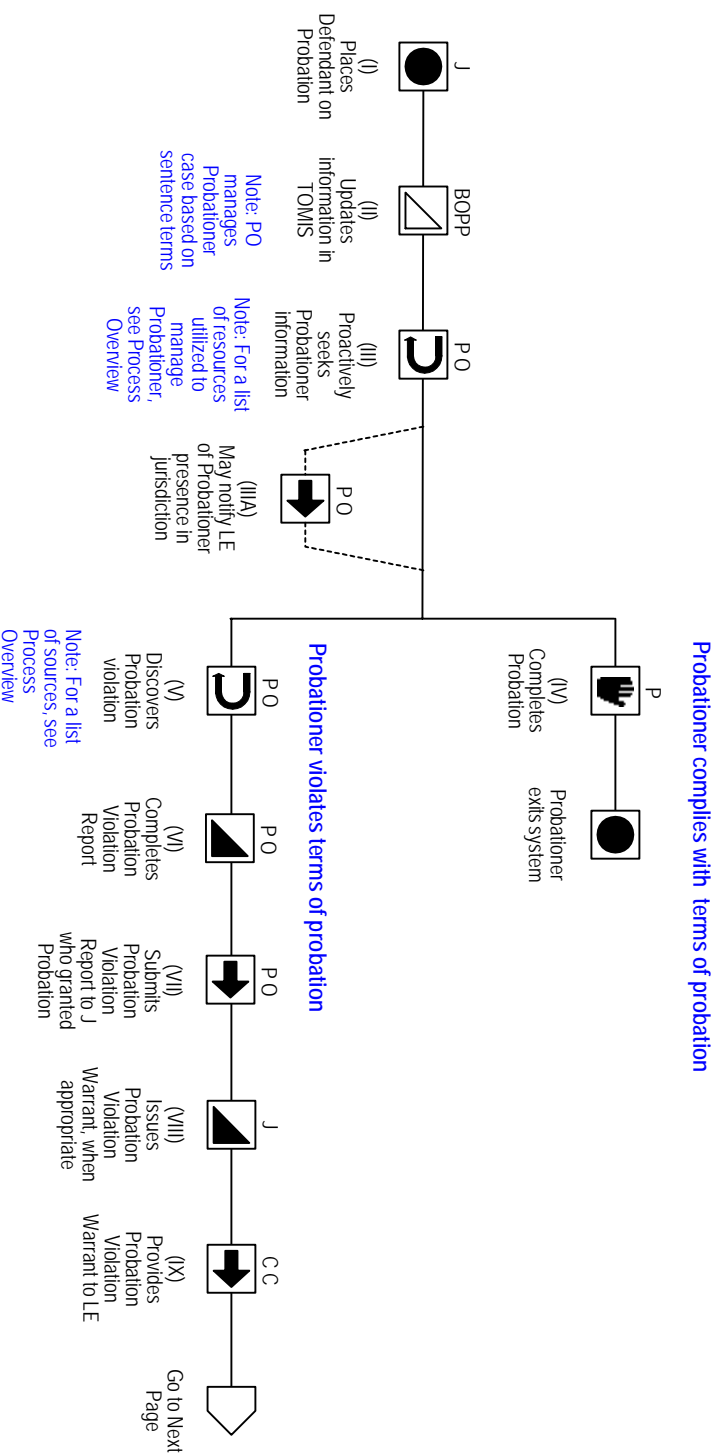

AUTOMATED CASE JUDGMENT DOCUMENT -- The Case Judgment Document is a key document in Tennessee's criminal justice process. In the current state, the Judgment Sheet is created by hand on a standard form. The information that is contained on the Case Judgment Document is copied and delivered by the Court Clerks office to multiple agencies. It is then re-keyed in to multiple agency systems. Many of the documents are illegible, contradictory, misleading or require extensive analysis. Automating the creation, electronic transfer of the information contained within and the digital imaging of the Case Judgment Document could enhance this process and save the state time and money.

INTEGRATE CAIN - Improve the CAIN system to provide an integrated Case Management functionality for the State of Tennessee. Improve the security and scalability of the system.

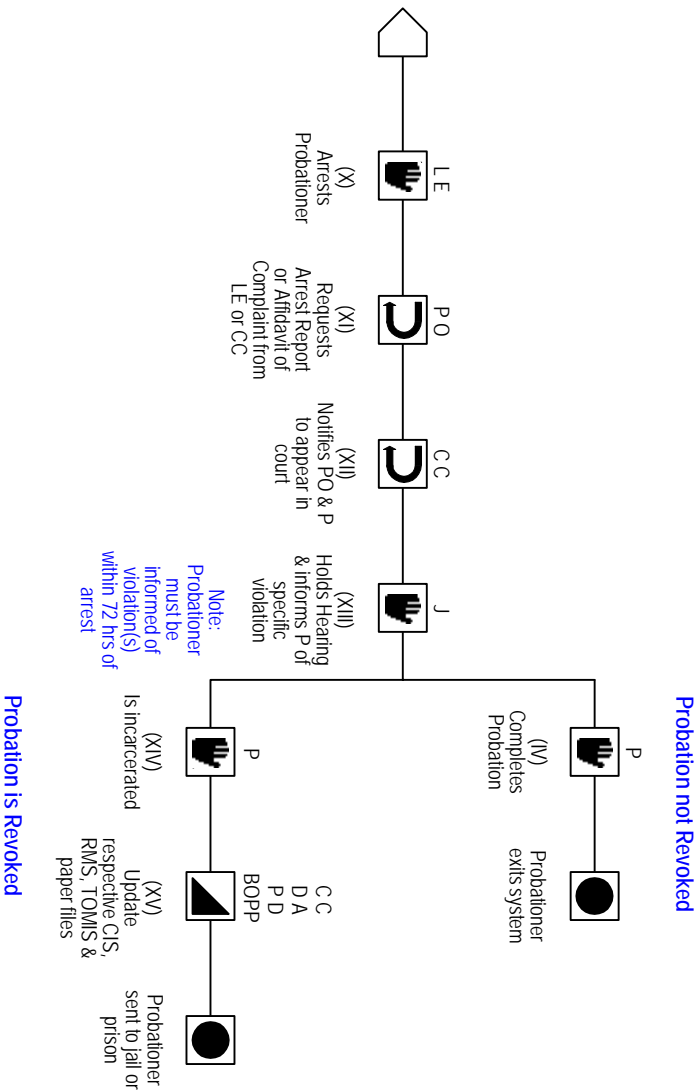

PROBATION

Probation: Process Diagram

"As-Is" Model: Probation (Page 1 of 2)

"As-Is" Model: Probation (Page 2 of 2)

Probation: Process Overview

When a Defendant is sentenced to Probation, he is subject to specific conditions and the supervision of a Probation Officer in lieu of incarceration unless he is sentenced to Unsupervised Probation. Unsupervised Probation is ordered on the Case Judgment Document and does get processed by Probation Officers but no routine contact or supervision is maintained. Probation Officers supervise and investigate the conduct, behavior and progress of those on supervised Probation (i.e., Probationers). If a Probationer violates the terms of Probation, he may be ordered by the Judge to serve the remainder of the term in jail or prison.

If the Defendant is sentenced to Private Probation to be supervised through a private company, the Case Judgment Document is typically not signed or completed indicating such. The Board of Probation and Parole has no information exchange or supervision responsibilities and in most cases, no knowledge that Private Probation was imposed.

Key information exchanges associated with the **Probation** process are described below.

I. Judge Places Defendant on Probation

At a Sentencing Hearing, the judge may place the defendant on Probation with specific terms.

Probation Officers routinely attend these hearings to obtain information about individuals who are placed on Probation.

II. Board of Probation and Parole Updates Information in TOMIS

Probation and Parole uses Tennessee Offender Management Information System (TOMIS) to update information about and track Probationers. Typically, Defendant information is entered in TOMIS during the Pre-Sentence Investigation. A new TOMIS ID is assigned unless the Defendant has been previously incarcerated and already has an existing TOMIS ID. The Probation Office manages the Probationer case based on the terms of the sentence.

III. Probation Officer Proactively Seeks Probationer Information

The Probation Officer gathers information about and manages a Probationer by:

- Reviewing existing information within TOMIS
- Reviewing records within a Court Clerk Office's Court Information System and paper case files
- Reviewing records within a Law Enforcement Agency's Records Management System and paper case files
- Reviewing records within a District Attorney Office's Records Management System and paper case files
- Querying NCIC
- Querying Tennessee's Criminal History Repository
- Interviewing family members
- Interviewing employers
- Obtaining information from the Department of Human Services
- Obtaining information from Department of Correction institutions where the Probationer was previously incarcerated

- A. PROBATION OFFICER MAY NOTIFY LAW ENFORCEMENT OF PROBATIONER PRESENCE IN JURISDICTION

IV. Probationer Completes Probation

When a Probationer stays in compliance and completes the Probation terms, he exits the system.

V. Probation Officer Discovers Probation Violation

The Probation Officer may discover a probation violation from a variety of sources:

- A Probation Officer may query TOMIS to verify a Probationer's status by checking the system for Criminal History, Case Management Violations or other data
- A member of the community reports a problem
- A Law Enforcement Officer reports a problem
- A Probation Officer may read or hear about a Probationer's problem via the media (TV/Newspaper)
- A query of the Court Clerk's Office Court Information System
- A Probation Officer may observe a Probationer's name on a New Arrests Report provided by the Court Clerk's Office. Court Clerk's Offices periodically create reports listing all new arrests within a jurisdiction during a specified period of time. The New Arrests Reports are periodically distributed to Probation and Parole Offices.

VI. Probation Officer Completes Probation Violation Report

When the Probation Officer discovers that a Probation violation has occurred, he completes a Probation Violation Report.

VII. Probation Officer Submits Probation Violation Report to Judge who granted Probation

The completed Probation Violation Report is submitted, when possible, to the Judge who originally granted Probation.

VIII. Judge Issues Probation Violation Warrant, when appropriate

The Judge reviews the Probation Violation Report and if the violation or offense is severe enough, issues a Probation Violation Warrant.

IX. Court Clerk's Office Provides Probation Violation Warrant to Law Enforcement

The Court Clerk's Office will give the Probation Violation Warrant to the Law Enforcement Agency that serves warrants.

X. Law Enforcement Arrest Probationer

The Law Enforcement Agency that serves warrants will seek the Probationer and make an arrest.

XI. Probation Officer Requests Arrest Report or Affidavit of Complaint from Law Enforcement or Court Clerk's Office

Upon being notified of a Probationer's arrest, a Probation Officer requests a copy of the applicable Arrest Report and/or Affidavit of Complaint from the arresting Law Enforcement Agency or the Court Clerk's Office.

XII. Court Clerk's Office Notifies Probation Officer and Probationer to appear in court

The Court Clerk's Office will notify the Probation Officer and the Probationer when to appear in court for a hearing.

XIII. Judge Holds Hearing and Informs Probationer of Specific Violation

During the hearing (or within 72 hours of the arrest), the Probationer will be informed (verbally and in writing) of the alleged Probation violation. Evidence will be presented at the hearing and witnesses may testify. The Judge decides whether to Revoke Probation or not. If the Judge does not revoke Probation, he can alter the conditions of Probation.

When possible, the hearing is held before the Judge whom sentenced the Probationer.

XIV. Probation is Revoked, Probationer is Incarcerated

When Probation is revoked, the Judge issues a court order that Probation is revoked. The Probationer or Public Defender may ask the Judge for alternative penalties to placement in jail or prison. Otherwise, the Probationer is sent to jail or prison.

Note: When **Probation not revoked**, the Probationer continues on Probation, with or without a change in the terms of Probation. Go back to IV. **Probationer Completes Probation.**

XV. Court Clerk's Office, District Attorney, Public Defender and Board of Probation and Parole Update Respective Court Information System, Records Management System, Tennessee Offender Management Information System and Paper Files

The Court Clerk's Office, District Attorney's Office, Public Defender's Office and Probation Office make records of the outcome of Probation violation and the hearing within their respective systems and paper case files.

Probation: Agency Roles & Responsibilities

Agencies involved in the **Probation** process and their primary information exchange responsibilities are listed below.

Board of Probation & Parole

- Keeps a record of each Probationer's case.
- Obtains Probationer background information from Court Clerk's Offices, the Department of Correction, the Department of Human Services, District Attorney's Offices, and/or Law Enforcement Agencies.
- Notifies Law Enforcement Agencies about new Probationers within their jurisdiction.
- Collects and processes listings of new arrests received from the Court Clerk's Office.
- Obtains Affidavits of Complaint and/or Incident/Offense Reports from the Court Clerk's Office or Law Enforcement Agency when a Probationer has been arrested.
- Submits Probation Violation Reports to the District Attorney's Office or the Court Clerk's Office.
- Collects and processes copies of Probation Revocation Orders received from the Court Clerk's Office.

Court Clerk's Office

- Provides background information about a Probationer to the Board of Probation & Parole.
- Compiles and distributes a listing of new arrests to the Board of Probation & Parole.
- Provides a copy of an Affidavit of Complaint forms and/or Incident/Offense Report to a Board of Probation & Parole (upon request).
- Receives and processes Probation Violation Reports distributed by the Board of Probation & Parole.
- Keeps records of Probation Violation Reports received from the Board of Probation & Parole.
- Distributes Probation Violation Reports to the appropriate Judge for review.
- Keeps records of Probation Violation Arrest Warrants issued by Judges.
- Distributes Probation Violation Arrest Warrants to the appropriated Law Enforcement Agencies for service/execution.
- Processes and completes Probation Revocation Order documentation.
- Distributes copies of Probation Revocation Orders to the Board of Probation & Parole and District Attorney's Offices.
- Keeps records of Probation Revocation Orders issued by Judges.

Department of Correction

- Provides Probationer background information to the Board of Probation & Parole.

Department of Human Services

- Provides Probationer background information to the Board of Probation & Parole.

District Attorney's Office

- Provides Probationer background information to the Board of Probation & Parole.
- Keeps records of Probation Violation Reports received from the Board of Probation & Parole.
- Submits Probation Violation Reports to the Court Clerk's Office (when appropriate).
- Receives and processes copies of Probation Revocation Orders sent by the Court Clerk's Office.

Judge

- Reviews Probation Violation reports.
- Issues Probation Violation Arrest Warrants.
- Administers Probation Violation and Probation Revocation Hearings.
- Issues Probation Revocation Orders.

Law Enforcement Agency

- Provides Probationer background information to the Board of Probation & Parole.
- Obtains information from the Board of Probation & Parole regarding new Probationers within the Law Enforcement Agency's jurisdiction.
- Provides copies of Affidavits of Complaint and/or Incident/Offense Reports to the Board of Probation & Parole (upon request).
- Receives and processes Probation Violation Arrest Warrants sent by the Court Clerk's Office.
- Serves Probation Violation Arrest Warrants.

Tennessee Bureau of Investigation

- Provides Probationer background information to the Board of Probation & Parole.

Probation: Information Exchange

The Events that generate inter-agency Information Exchange within the **Probation** process are shown in the table below.

Information Exchange during the Probation Process

Probation: Technology

The table below details the primary computer systems and databases used in exchange of information during the **Probation** process. See Appendix D for more detailed information about computer systems and applications.

Probation – Technology

NAME	DESCRIPTION
Case Management System (CMS)	<p>A case management system is used to manage the proceedings of a court case. Attorneys from the District Attorney's Office and the Public Defender's Office often use it.</p> <p>Maintained by: District Attorney's Office, Public Defender's Office</p>
Court Information System (CIS)	<p>A court information system is used to manage the daily affairs of the court clerk's office. It contains functionality for Case History, Master Person File, Bill-of-Cost, Case Disposition Rule & Execution, and Reporting System and generates a docket number.</p> <p>Maintained by: Court Clerk's Office</p>
National Crime Intelligence Center (NCIC)	<p>A computerized network that connects Law Enforcement Agencies throughout the United States and contains information about crimes that have occurred throughout the country. Criminal History and/or Arrest Warrant status information is commonly requested from NCIC.</p> <p>Maintained by: Federal Bureau of Investigation (FBI)</p>
Records Management System (RMS)	<p>A computer system that captures and stores information about a case and promotes an agency's ability to manage its records.</p> <p>Maintained by: Law Enforcement Agency, District Attorney's Office, Public Defender's Office</p>
Tennessee Criminal History Repository (TCHR)	<p>The Tennessee Criminal History Repository (TCHR) contains information about arrests, charges, and final dispositions of individuals who have committed offenses in Tennessee.</p> <p>Maintained by: Tennessee Bureau of Investigation (TBI)</p>
Tennessee Offender Management Information System (TOMIS)	<p>The computer system used by the Department of Correction and Board of Probation Parole to store and process information about sentencing, incarceration, release, Probation and Parole. The system tracks all activities of inmates, probationers and parolees.</p> <p>The Tennessee Department of Correction has recently implemented an Internet-based version of the software.</p> <p>Maintained by: Tennessee Department of Correction, Board of Probation and Parole</p>

Probation: Forms

ID	FORM NAME	FORM DESCRIPTION
F-15	Probation Monthly Reporting Form	This form is completed by the Probation and Parole Officer for each Probationer that is being managed within caseload.
F-16	MITTIMUS	This form is completed by a Judge and serves as the Warrant for a violation of probation.
F-17	Probation Violation Report	The Probation and Parole Officer for a Probationer who has been arrested and has violated the terms of Probation completes this form. The form is submitted to the District Attorney's Office for decision whether to request a Probation Revocation Hearing.
F-18	BOPP TOMIS Transactions	This form is completed by Probation and Parole and is used to collect Probationer or Parolee information for entry into TOMIS.

PROBATION RULE VIOLATION

- _____ 1. I will obey the laws of the United States as well as any municipal ordinances.
- _____ 2. I will report all arrest(s), including traffic violations, immediately, regardless of the outcome, to my Probation Officer.
- _____ 3. If convicted of a felony, I will not receive, own, possess, ship, or transport any firearms, ammunition, or illegal weapon. Reference Gun Control of 1968. Public Law 90-618, Title 1, Section 922 entitled "Unlawful Acts". All other probationers require express permission of the Court for use of firearms.
- _____ 4. I will work at a lawful occupation and support my dependents, if any, to the best of my ability.
- _____ 5. I will inform my probation officer before changing my residence or employment. I will get the permission of my Probation Officer before leaving the State.
- _____ 6. I will allow my Probation Officer to visit my home; employment site, or elsewhere, and will carry out all instructions he/she gives, and report to my Probation Officer as instructed.
- _____ 7. I will not use intoxicants (beer, whiskey, wine, etc.) of any kind, to excess, or use or have in my possession narcotic drugs or marijuana. I will submit to drug screens as directed.
- _____ 8. I will not enter an establishment whose prime purpose is to sell alcoholic beverages (bars, taverns, clubs, etc.).
- _____ 9. I will agree to pay all required fees to the Supervision and Criminal Injuries fund unless waived by appropriate authorities.
- _____ 10. I will observe any special conditions imposed by the Court as listed below:

Probation: Opportunities for Improvement

The "Opportunities for Improvement" section provides a general list of observations compiled during the ICJ project interview phase. These ideas will be considerations for the development of the "To-Be" Model regarding the **Probation** process.

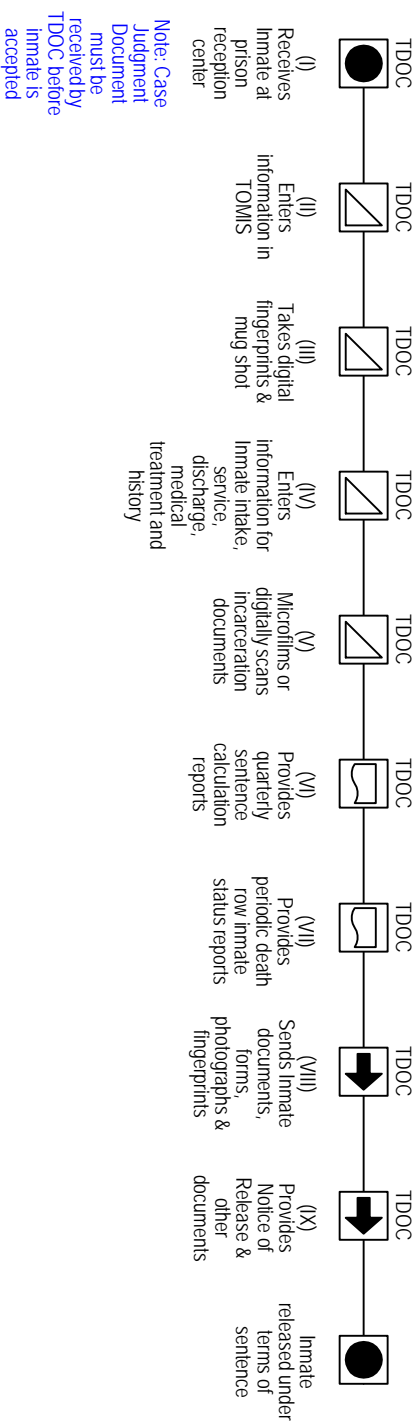

AUTOMATED DAILY ARREST REPORT SEARCH - Currently Probation and Parole Officers have to read through daily arrest reports that are generated by the Court Clerk's Office to search for Probationers and Parolees. An automated computer program that would search the Arrest Report and automatically find Probationers and Parolees would be beneficial to Probation and Parole. This would be a great fit for an event scout on the Portal web page. Authorized users of the web Portal could set up their own criteria for searches including when the automatic searches could be run (daily, weekly, monthly). This event scout could automatically email the results of the search to a user's or departmental email address.

TOMIS AND PRIVATE PROBATION – Currently, when a Defendant is sentenced to private probation, no Case Judgment Document is signed and thereby TOMIS does not get updated with the most updated information. Probation Officers also have no way to track status of Probationers since there is no information exchange between private probation companies and TOMIS.

CORRECTION

Correction: Process Diagram

"As-Is" Model: Correction

Correction: Process Overview

When an Offender's sentence involves incarceration, he may be confined at a County Jail, Workhouse or a State Prison. The Offender is committed to the custody of the Department of Correction as an Inmate and is sent to a Reception Center for evaluation and classification. Correction staff evaluates information (physical, psychological, educational, other) about the Inmate and recommends levels of supervision, custody and programs. The process of evaluation occurs continually throughout an Inmate's period of incarceration.

Throughout the incarceration period, an Inmate's activities are managed and recorded by the supervising agency. When an Offender is sentenced to less than one year of incarceration, his sentence will likely be served at a County Jail or Workhouse. When an Offender is sentenced to serve more than one year of incarceration, he will likely serve a significant portion of the sentence at a State Prison facility. Key information exchange events that occur during the **Correction** process are described below.

I. Tennessee Department of Correction Receives Inmate at Prison Reception Center

Upon a sentence of incarceration, the Court Clerk's Office sends a copy of the Case Judgment Document to the agency (Department of Correction or County Law Enforcement) that will have custody of the Offender. The Case Judgment Document must be received by TDOC before the inmate will be accepted at the prison reception center. The TDOC makes recommendations for supervision, custody and programs based on physical, psychological and educational evaluations of the inmate.

II. Tennessee Department of Correction Enters Information in Tennessee Offender Management Information System

The TDOC enters Offender information into Tennessee Offender Management Information System (TOMIS). If the Offender has previously been incarcerated and a TOMIS ID was assigned, that same ID should be used to enter this new information. Otherwise, the Detention Facility assigns a new TOMIS ID. The Offender's TOMIS record develops as information such as mug shots, scars, marks and tattoos of the Offender is entered during the subsequent processes.

When an Offender is transferred from a County Jail or Workhouse to a State Prison, the Law Enforcement Agency provides the Department of Correction with a report of the amount of time the Offender has served at the local facility prior to transfer to Department of Correction custody.

III. Tennessee Department of Correction Takes Digital Fingerprints and Mug Shot

When performing an intake of an Inmate into a state prison facility, the TDOC captures and stores a digital image of an Offender's fingerprints in its Print Track LLS 2000 LiveScan device. The Department of Correction also captures and stores a digital photograph of the Offender in its Kodak IBS System.

IV. Tennessee Department of Correction Enters Information for Inmate Intake, Service, Discharge, Medical Treatment and History

The TDOC maintains and stores records associated with an Offender's intake, service and discharge from a state prison facility. The TDOC also maintains and stores records of an Inmate's medical treatment and history.

V. Tennessee Department of Correction Microfilms or Digitally Scans Incarceration Documents

The TDOC microfilms and/or makes digital images of many documents and forms associated with an Offender's incarceration. Some of the information microfilmed and scanned includes institutional records, medical records, discharge records, case judgment documents, as well as information about conviction, disciplinary behavior and Parole eligibility. Once documents are filmed or digitally scanned, the hardcopies are destroyed. The digital images of the documents are stored on CDs and are managed using a system called FileNet.

VI. Tennessee Department of Correction Provides Quarterly Sentence Calculation Reports

The TDOC provides quarterly Sentence Calculation Reports to Prison Administrators, County Jails, Workhouses and made available to inmates.

VII. Tennessee Department of Correction Provides Periodic Death Row Inmate Status Reports

The TDOC provides periodic reports of death row Inmate status to the Governor's Office and requesting Public Defender's Offices.

VIII. Tennessee Department of Correction Sends Inmate Documents, Forms, Photographs & Fingerprints

Upon request, the TDOC sends copies of Inmate documents, forms, photographs and fingerprints to Probation and Parole Offices, Public Defender's Offices, District Attorney's Offices, Law Enforcement Agencies or Tennessee Bureau of Investigation. This information is typically sent through email or fax.

IX. Tennessee Department of Correction Provides Notice of Release & Other Documents

When an Inmate is released unconditionally, the TDOC completes and mails a Notice of Release form to the appropriate Judge, Victims, Witnesses, District Attorney's Office and Law Enforcement Agency.

When an Inmate is granted Parole, the TDOC provides the Board of Probation and Parole with copies of specified documents and forms related to the Inmate's incarceration. The TDOC also sends information about the Inmate's medical history to his assigned Parole Officer.

Correction: Agency Roles & Responsibilities

Agencies involved in the **Correction** process and their primary information exchange responsibilities are listed below.

Tennessee Department of Correction

- Receives and processes information related to an Inmate's local jurisdiction incarceration sent by Law Enforcement Agencies.
- Provides information about an Inmate's correction and/or incarceration to Law Enforcement Agencies, District Attorney's Offices and Public Defender's Offices (upon request).
- Provides Law Enforcement Agencies that maintain the custody of Inmates with Sentence Calculation Reports.
- Prepares Inmate's Notice of Release forms.
- Keeps records of an Inmate's release from correction.
- Sends copies of Notice of Release forms to applicable District Attorney's Offices, Judges and Law Enforcement Agencies.
- Collects and reports information about Death Row Inmates to the Governor's Office.

District Attorney's Office

- Receives and processes information related to an Inmate's correction/incarceration received from TDOC.
- Receives and processes Notice of Release forms obtained from the TDOC.

Judge

- Receives and reviews Notice of Release forms obtained from the TDOC.

Public Defender's Office

- Receives and processes information related to an Inmate's correction/incarceration received from the TDOC.

Law Enforcement Agency

- Provides information about an Inmate's incarceration in a County Jail or Workhouse to the TDOC.
- Requests and receives information related to an Inmate's correction/incarceration from the TDOC.
- Collects and processes Sentence Calculation Reports received from the TDOC.
- Collects and processes Notice of Release forms received from the TDOC.

Correction: Opportunities for Improvement

The "Opportunities for Improvement" section provides a general list of observations compiled during the ICJ project interview phase. These ideas will be considerations for the development of the "To-Be" Model regarding the **Correction** process.

AUTOMATED CASE JUDGMENT DOCUMENT - As mentioned in the Circuit or Criminal Court section, the Case Judgment Document is very important to multiple criminal justice agencies including the Department of Correction. An inmate is not received into the prison system without a completed Case Judgment Document that has been signed by the Judge. There are times when the timing of an inmate arriving at a prison and the documentation are out of sync. This could be corrected by automating the process.

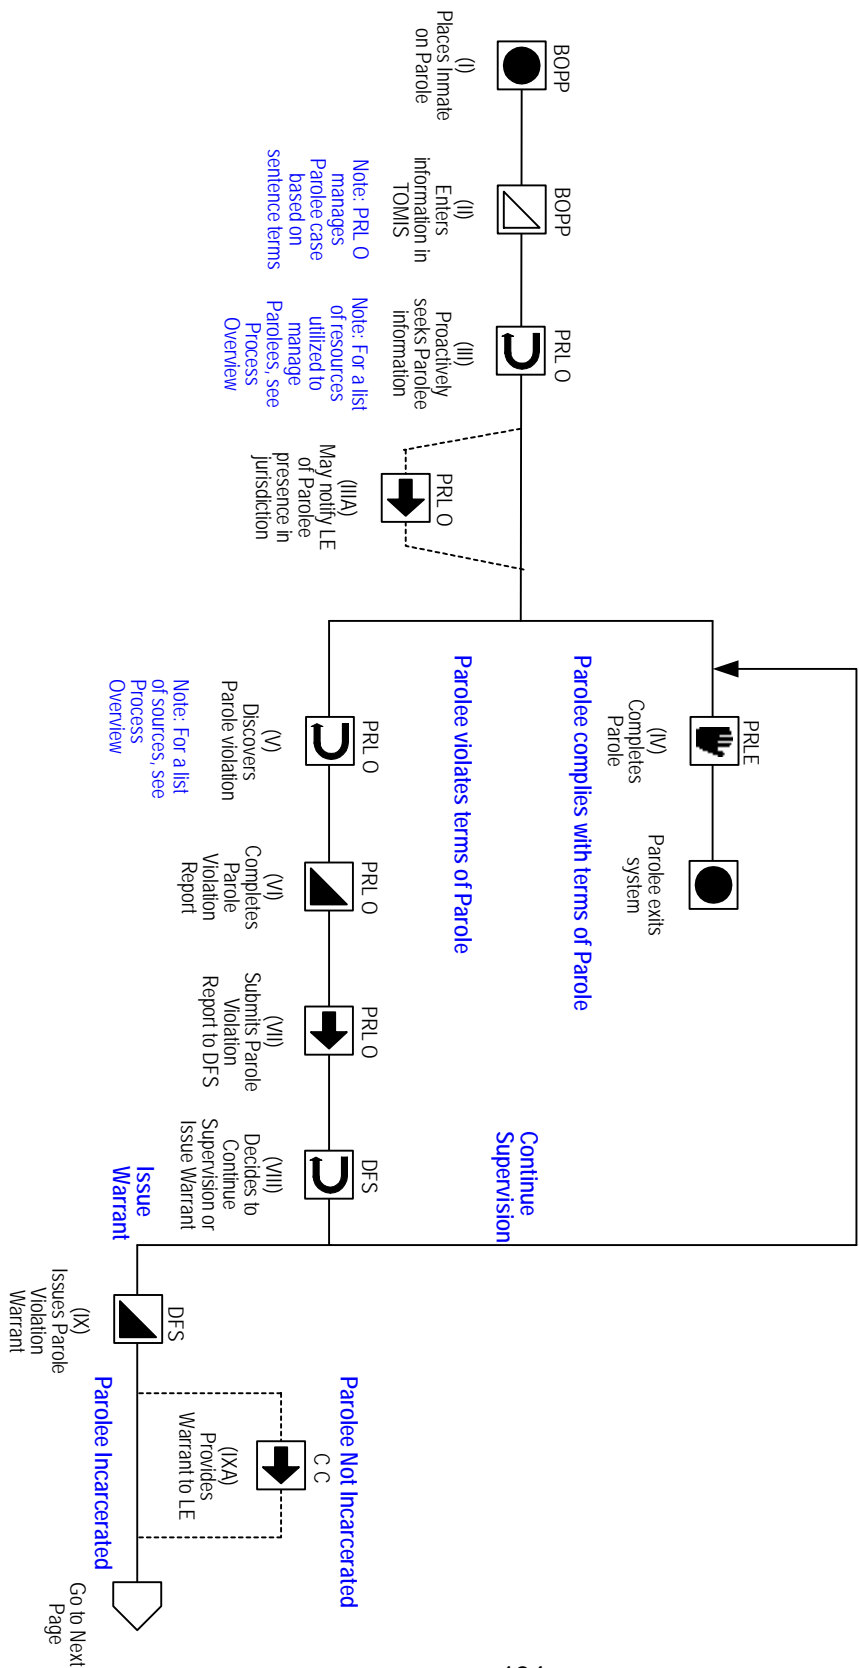

MUG SHOTS - Provide Law Enforcement Agencies with online access to Department of Correction Mug shots.

DOUBLE TOMIS IDS ASSIGNED - When Probation Officers enter/update information in TOMIS, they should use the Offender's previously assigned TOMIS ID, but in many cases it is much easier to create a new record with a new TOMIS ID. This causes the issue of double TOMIS Ids existing for the same Offender. This ongoing problem needs to be addressed and a way of making updates to existing TOMIS Ids much easier for users.

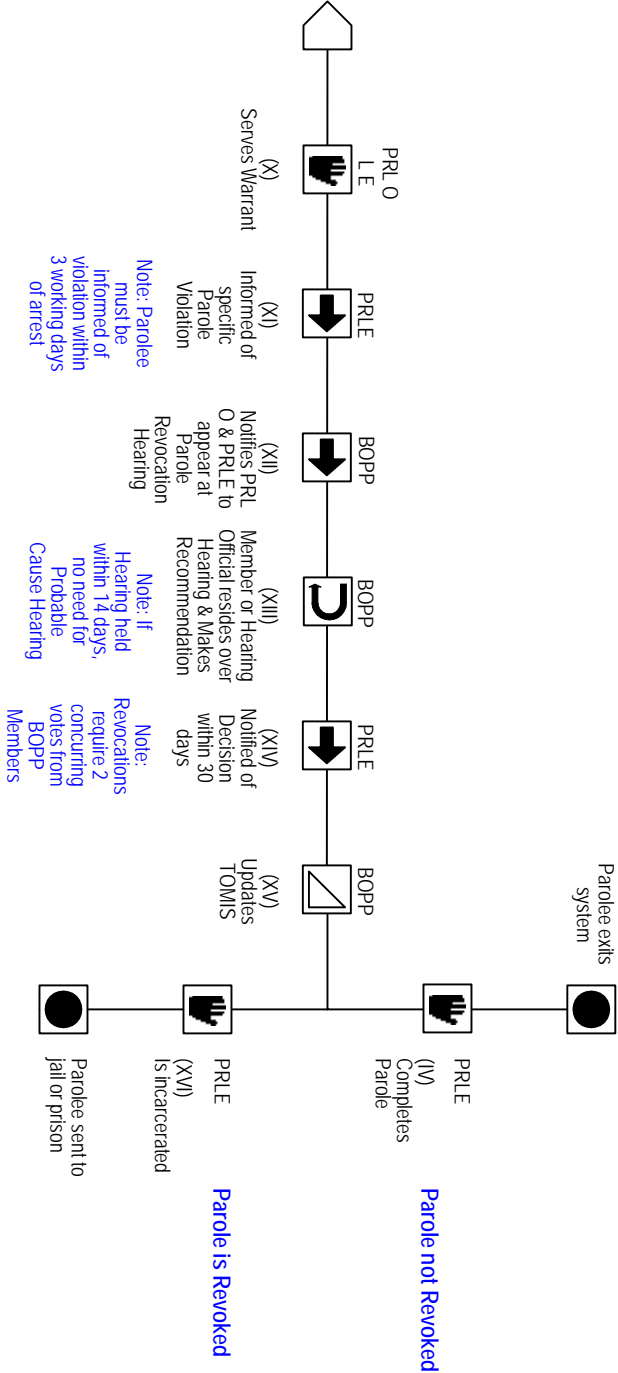

PAROLE

Parole: Process Diagram

"As-Is" Model: Parole (Page 1 of 2)

"As-Is" Model: Parole (Page 2 of 2)

Parole: Process Overview

Parole allows an Inmate to be released from incarceration under certain conditions and restrictions. The Board of Probation and Parole (BOPP) determine if an Inmate will be granted Parole. Upon release, the Parolee is assigned a Parole Officer who will supervise and investigate his conduct, behavior and progress. Violation of the conditions of Parole is a potential cause for revocation or other sanctions.

Key information exchange events that occur during the **Parole** process are described below.

I. Board of Probation and Parole Places Inmate on Parole

At a Parole Hearing, the Board of Probation and Parole (BOPP) may place the Inmate on Parole with specific terms.

Parole Officers routinely attend these hearings to obtain information about individuals who are placed on Parole.

II. Board of Probation and Parole Enters Information in TOMIS

The BOPP uses Tennessee Offender Management Information System (TOMIS) to enter information about and track Parolees. If the Defendant is placed on Parole and does not currently have a TOMIS ID, he is assigned an ID upon the entry of the case into TOMIS. The Parole Office manages the Parolee case based on the terms of the sentence.

III. Parole Officer Proactively Seeks Parolee Information

The Parole Officer gathers information about and manages a Parolee by:

- Reviewing existing information within TOMIS
- Reviewing records within a Court Clerk Office's Court Information System and paper case files
- Reviewing records within a Law Enforcement Agency's Records Management System and paper case files
- Reviewing records within a District Attorney Office's Records Management System and paper case files
- Querying NCIC
- Querying Tennessee's Criminal History Repository
- Interviewing family members
- Interviewing employers
- Obtaining information from the Department of Human Services
- Obtaining information from Department of Correction institutions where the Parolee was previously incarcerated

A. PAROLE OFFICER MAY NOTIFY LAW ENFORCEMENT OF PAROLEE PRESENCE IN JURISDICTION

IV. Parolee Completes Parole

When a Parolee stays in compliance and completes the Parole terms, he exits the system.

V. Parole Officer Discovers Parole Violation

The Parole Officer may be notified of a Parole violation from a variety of sources:

- A member of the community reports a problem
- A Law Enforcement Officer reports a problem
- A Parole Officer reads or hears about a Parolee's problem via the media (TV/Newspaper)
- A query of the Court Clerk's Office Court Information System
- A Parole Officer observes a Parolee's name on a New Arrests Report provided by the Court Clerk's Office. Court Clerk's Offices periodically create reports listing all new arrests within a jurisdiction during a specified period of time. The New Arrests Reports are periodically distributed to Probation and Parole Offices.

VI. Parole Officer Completes Parole Violation Report

When a Parole Violation occurs the Parole Officer completes a Parole Violation Report.

VII. Parole Officer Submits Parole Violation Report to Director of Field Services

The completed Parole Violation Report is submitted to the Director of Field Services or their assistant.

VIII. Director of Field Services Decides to Continue Supervision or Issue Warrant

Director of Field Services or Assistant reviews the Parole Violation Report and decides whether to **Continue Supervision** or **Issue Warrant**. When a Warrant is issued, the next step depends on whether the **Parolee Incarcerated** or not.

Note: When the decision is to **Continue Supervision**, the Parolee continues on Parole, with or without a change in the terms of Parole. Go back to **IV. Parolee Completes Parole**.

IX. Director of Field Services Issues Parole Violation Warrant

When the Director of Field Services decides to issue a Warrant, it is filed with the Court Clerk's Office. If **Parolee Not Incarcerated**:

A. COURT CLERK'S OFFICE PROVIDES WARRANT TO LAW ENFORCEMENT

The Court Clerk's Office will give the Parole Violation Warrant to the Law Enforcement Agency that serves warrants.

X. Parole Officer or Law Enforcement Serves Warrant

If Parolee is already incarcerated, the Parole Officer may serve the Warrant to the Parolee; otherwise, the Law Enforcement Agency that serves warrants will seek the Parolee and make an arrest. Upon being notified of a Parolee's arrest, a Parole Officer requests a copy of the applicable Arrest Report and/or Affidavit of Complaint from the arresting Law Enforcement Agency or the Court Clerk's Office.

XI. Parolee Informed of Specific Parole Violation

The Parolee will be informed (verbally and in writing) of the alleged Parole Violation within 3 working days of arrest (or during the Parole Revocation Hearing).

XII. Board of Probation and Parole Notifies Parole Officer and Parolee to appear at Parole Revocation Hearing

When the Parolee is arrested on a Parole Violation Warrant, the Board of Probation and Parole will request a Parole Officer and the Parolee (via phone or mail) to appear at the Parole Revocation Hearing.

XIII. Board of Probation and Parole Member or Hearing Official resides over Hearing & Makes Recommendation

A member of the BOPP or Hearing Official resides over the Probation Revocation Hearing and makes a recommendation whether to revoke probation or not.

If this hearing is held within 14 days of arrest, there is no need for a Probable Cause Hearing.

XIV. Parolee Notified of Decision within 30 days

The Parolee is notified within 30 days of the BOPP decision to Revoke Parole.

Revocations require 2 concurring votes from BOPP members.

XV. Board of Probation and Parole Updates Tennessee Offender Management Information System

The Parole Office updates records of the outcome of the parole violation and Parole Revocation Hearing within TOMIS and paper case files.

XVI. Parole is Revoked, Parolee is Incarcerated

When Parole is revoked, the Parolee is sent to jail or prison.

Note: When **Parole is not revoked**, the Parolee continues on Parole, with or without a change in the terms of Parole. Go back to IV. **Parolee Completes Parole.**

Parole: Agency Roles & Responsibilities

Agencies involved in the **Parole** process and their primary information exchange responsibilities are listed below.

Board of Probation & Parole

Keeps a record of each Parolee's case.

Obtains Parolee background information from Court Clerk's Offices, the Department of Correction, the Department of Human Services, District Attorney's Offices, and/or Law Enforcement Agencies.

Notifies Law Enforcement Agencies about new Parolees within their jurisdiction.

Collects and processes listings of new arrests received from the Court Clerk's Office.

Obtains Affidavits of Complaint and/or Incident/Offense Reports from the Court Clerk's Office or Law Enforcement Agency when a Parolee has been arrested.

Manages information exchanges associated with Parole Violations.

Issues Parole Violation Arrest Warrants.

Administers Parole Violation and Parole Revocation Hearings.

Issues Parole Revocation Orders.

Processes and completes Parole Revocation Order documentation.

Distributes Parole Revocation Orders to Court Clerk's Offices.

Court Clerk's Office

Provides Parolee background information to the Board of Probation & Parole.

Distributes a listing of new arrests to the Board of Probation & Parole.

Provides a copy of an Affidavit of Complaint forms and/or Incident/Offense Report to the Board of Probation & Parole (upon request).

Keeps records of Parole Violation Reports received from the Board of Probation & Parole.

Collects and processes Parole Violation Arrest Warrants received from the Board of Probation and Parole.

Distributes Parole Violation Arrest Warrants to the appropriate Law Enforcement Agencies for service/execution.

Keeps records of Parole Revocation Orders issued by the Board of Probation and Parole.

Department of Correction

Provides Parolee background information to the Board of Probation & Parole.

Department of Human Services

Provides Parolee background information to the Board of Probation & Parole.

District Attorney's Office

Provides Parolee background information to the Board of Probation & Parole.

Law Enforcement Agency

Provides Parolee background information to the Board of Probation & Parole.

Obtains information from the Board of Probation & Parole regarding new Parolees within the Law Enforcement Agency's jurisdiction.

Provides copies of Affidavits of Complaint and/or Incident/Offense Reports to the Board of Probation & Parole (upon request).

Collects and processes Parole Violation Arrest Warrants received from the Court Clerk's Office.

Serves Parole Violation Arrest Warrants.

Tennessee Bureau of Investigation

Provides Parolee background information to the Board of Probation & Parole.

Parole: Information Exchange

The Events that generate inter-agency Information Exchange within the **Parole** process are shown in the table below.

Parole: Technology

The table below details the primary computer systems and databases used in exchange of information during the **Parole** process. See Appendix D for more detailed information about computer systems and applications.

Parole – Technology

NAME	DESCRIPTION
Case Management System (CMS)	A case management system is used to manage the proceedings of a court case. Attorneys from the District Attorney's Office and the Public Defender's Office often use it. Maintained by: District Attorney's Office, Public Defender's Office
Court Information System (CIS)	A court information system is used to manage the daily affairs of the court clerk's office. It contains functionality for Case History, Master Person File, Bill-of-Cost, Case Disposition Rule & Execution, and Reporting System and generates a docket number. Maintained by: Court Clerk's Office
National Crime Intelligence Center (NCIC)	A computerized network that connects Law Enforcement Agencies throughout the United States and contains information about crimes that have occurred throughout the country. Criminal History and/or Arrest Warrant status information is commonly requested from NCIC. Maintained by: Federal Bureau of Investigation (FBI)
Records Management System (RMS)	A computer system that captures and stores information about a case and promotes an agency's ability to manage its records. Maintained by: Law Enforcement Agency, District Attorney's Office, Public Defender's Office
Tennessee Criminal History Repository (TCHR)	The Tennessee Criminal History Repository (TCHR) contains information about arrests, charges, and final dispositions of individuals who have committed offenses in Tennessee. Maintained by: Tennessee Bureau of Investigation (TBI)
Tennessee Offender Management Information System (TOMIS)	The computer system used by the Department of Correction and Board of Probation Parole to store and process information about sentencing, incarceration, release, Probation and Parole. The system tracks all activities of inmates, probationers and parolees. The Tennessee Department of Correction has recently implemented an Internet-based version of the software. Maintained by: Tennessee Department of Correction, Board of Probation and Parole

Parole: Forms

ID	FORM NAME	FORM DESCRIPTION
F-20	Parole Violation Report	The Probation and Parole Officer completes this form when a Parolee has been arrested and has violated the terms of Parole. The form is submitted to the District Attorney's Office for decision whether to request a Parole Revocation Hearing.

Parole: Opportunities for Improvement

The "Opportunities for Improvement" section provides a general list of observations compiled during the ICJ project interview phase. These ideas will be considerations for the development of the "To-Be" Model regarding the **Parole** process.

AUTOMATED DAILY ARREST REPORT SEARCH - As noted in the Probations section, there is a need for a computer program that would search the Arrest Report and automatically find Probationers and Parolees who have violated Parole and have been arrested.

VICTIM INFORMATION AND NOTIFICATION - Create interfaces between Criminal Justice Agencies and Victim Information and Notification systems to enhance the State of Tennessee's ability to notify and alert Victims of Crimes of the Offender's status.

CONCLUSION

Tennessee's "As-Is" Model of criminal justice information exchange that is contained in this document represents a concerted effort by the Integrated Criminal Justice Steering Committee, ICJ subcommittees, project manager and the project team. The model is a result of a comprehensive, practical project that involved interviewing 176 subject matter experts in a true cross section including 17 counties and 70 criminal justice agencies across the State of Tennessee. The details of the model represent the complexity of a state with 95 counties, and 31 judicial districts. It was a major priority to the ICJ Steering Committee to obtain information from a mixture of staff members of large metropolitan areas, middle sized towns, and rural centers throughout the state. This included state, county and local criminal justice agencies from highly technological organizations to small un-automated agencies that manage their workload with paper forms and files.

The key focus of the research was to understand and document the data exchanges that occurred across agencies rather than how internal processes within each entity worked. However, in order to understand the data exchange, it was important to understand the internal processes with the agencies. Again, the purpose of the "As-Is" Model is to highlight the exchange points between these organizations.

The "As-Is" Model is a depiction of how criminal justice data exchanges occur within Tennessee's current system. It defines how things are being done today rather than how they should be done or how staff members wish they were done. The "To-Be" Model will describe the systems and procedures that could be implemented that will provide improvements, and eliminate redundancies and inefficiencies in the system.

The Gap Analysis will highlight the missing components and requirements to facilitate the implementation of the To-Be model. It will be used to reveal the disparities, constraints and assumptions as Tennessee develops its Road Map for future data integration in the State of Tennessee.

The Roadmap will consist of the plans to move forward to an implementation phase on major projects in Tennessee. It may include projects that range from one to five years in time of implementation. The Roadmap will also include training and retraining requirements as new methodologies and technology solutions are rolled out. In turn, the State of Tennessee will obtain a highly Integrated Criminal Justice system.

APPENDIX A: AGENCIES

AGENCY:	Administrative Office of the Courts (AOC)
WEB ADDRESS:	http://www.tsc.state.tn.us
DESCRIPTION:	The Administrative Office of the Courts provides support services to the state court system. The director, appointed by the Supreme Court, is chief administrative officer for the courts and oversees the AOC. Duties of the office include preparing the court system's annual budget; providing judicial education, law libraries, computers, other equipment, training and technical support for judges and other court personnel; assisting judges with case assignments; administering payroll accounts for the court system; conducting orientation for new judges; administering the official state criminal court reporters system; providing assistance to judicial committees; compiling data; and reviewing and disbursing funds to court-appointed attorneys representing indigents.

AGENCY:	Board of Probation and Parole (BOPP)
WEB ADDRESS:	http://www2.state.tn.us/bopp/home.htm
DESCRIPTION:	<p>The mission of the Board of Probation and Parole to minimize public risk and promote lawful behavior by the prudent, orderly release and community supervision of adult offenders, at the least cost to taxpayers</p> <p>The Board of Probation and Parole is committed to a partnership with the citizens of Tennessee in promoting public safety and will be recognized as a leader in the area of Probation and Parole by:</p> <p>Providing a continuum of services for offenders from pre-sentence investigation through the expiration of sentences.</p> <p>Participating in cooperative efforts such as community policing, multi-purpose service centers, coordinated victim services and interagency efforts.</p> <p>Providing employees with access to and training in the use of advanced technologies.</p> <p>Fostering a highly professional staff that is proficient in offender management and support services.</p> <p>Promoting effectiveness and efficiency through the use of outcome measures and innovative approaches to service delivery.</p>

AGENCY:	Bureau of Justice Assistance
WEB ADDRESS:	http://www.ojp.usdoj.gov/BJA/about/aboutbja.html
DESCRIPTION:	<p>The Bureau of Justice Assistance (BJA) is a component of the Office of Justice Programs, U.S. Department of Justice, which also includes the Bureau of Justice Statistics, the National Institute of Justice, the Office of Juvenile Justice and Delinquency Prevention, and the Office for Victims of Crime.</p> <p>The mission of BJA is to provide leadership and assistance in support of local criminal justice strategies to achieve safe communities. BJA's overall goals are to (1) reduce and prevent crime, violence, and drug abuse and (2) improve the functioning of the criminal justice system.</p> <p>BJA's objectives in support of these goals are to:</p> <ul style="list-style-type: none"> Encourage the development and implementation of comprehensive strategies to reduce and prevent crime and violence. Encourage the active participation of community organizations and citizens in efforts to prevent crime, drug abuse, and violence. Provide training and technical assistance in support of efforts to prevent crime, drug abuse, and violence at the national, state, and local levels. Reduce the availability of illegal weapons and develop strategies to address violence in our communities. Enhance the capacity of Law Enforcement agencies to reduce crime. Improve the effectiveness and efficiency of all aspects of the adjudication process, including indigent defense services. Assist states in freeing prison space for serious and violent offenders through the design and implementation of effective correctional options for nonviolent offenders. Enhance the ability of criminal justice agencies to access and use new information technologies. Encourage and support evaluation of the effectiveness of funded programs and dissemination of program results. <p>BJA has three primary components: Policy, Programs, and Planning. The Policy Office provides national leadership in criminal justice policy, training, and technical assistance to further the administration of justice. It also acts as a liaison to national organizations that partner with BJA to set policy and help disseminate information on best and promising practices. The Programs Office coordinates and administers all state and local grant programs and acts as BJA's direct line of communication to states, territories, and tribal governments by providing assistance and coordinating resources. The Planning Office coordinates the planning, communications, and budget formulation and execution; provides overall BJA-wide coordination; and supports streamlining efforts.</p>

AGENCY:	Department of Correction (TDOC)
WEB ADDRESS:	http://www.state.tn.us/correction
DESCRIPTION:	<p>The mission of the Tennessee Department of Correction is to incarcerate criminal felony offenders in a secure, humane and disciplined institutional environment that meets the standards of the law, while emphasizing public safety, offender rehabilitation and the advancement of strong and efficient criminal justice policy.</p> <p>Currently, there are more than 19,000 Inmates assigned to the State's 15 prisons. The Department operates 12 of those facilities. Corrections Corporation of America manages three privately. Two of the State operated prisons are designated for women.</p> <p>Tennessee's Department of Correction is recognized nationally for its management of prison operations. It was one of the first Departments in the nation to earn national accreditation from the American Correctional Association, and it's a tradition that continues. Only a handful of Departments nationwide are fully accredited.</p> <p>The Tennessee Department of Correction supervises more than 20,000 Inmates and employs more than 5,000 people. There are 15 prisons in the state system, three of which are managed privately by Corrections Corporation of America. Female Inmates in the State of Tennessee are housed in two prisons, one that is located in Nashville and the other in Memphis. Male Inmates are housed in the 13 other prisons located across the state. Those Inmates in need of acute or continuing medical care are housed at the Lois M. DeBerry Special Needs Facility in Nashville.</p>

AGENCY:	Department of Safety: Criminal Investigations Division
WEB ADDRESS:	http://www.tennessee.gov/safety/cid.html
DESCRIPTION:	<p>The Criminal Investigations Division of the Tennessee Highway Patrol is charged with the investigation and prosecution of violations of Tennessee's auto and identity theft laws. Areas of responsibility include covert and overt investigation of suspect cases of auto and identity theft, stolen vehicle parts trafficking, and odometer fraud.</p>

AGENCY:	Department of Safety: Tennessee Highway Patrol
WEB ADDRESS:	http://www.tennessee.gov/safety/thp.html
DESCRIPTION:	<p>The Tennessee Highway Patrol and its highly trained state troopers and enforcement Officers are responsible for safety on more than 15,000 miles of state and federal highways.</p> <p>The Tennessee Highway Patrol (THP) is responsible for the enforcement of all federal and state laws relating to traffic. Serving the entire state of Tennessee with substations in each of its 95 counties, the THP has district headquarters in the following eight locations: Knoxville, Chattanooga, Nashville, Memphis, Fall Branch, Cookeville, Lawrenceburg, and Jackson.</p> <p>The THP has recently absorbed the abolished Capitol Police and Commercial Vehicle Enforcement Divisions.</p>

AGENCY:	District Attorneys General Conference (TNDAGC)
WEB ADDRESS:	http://www.tndagc.com
DESCRIPTION:	<p>The Tennessee District Attorneys General Conference was created by the General Assembly in 1961 to provide for a more prompt and efficient administration of justice in the courts of this state. It is comprised of the District Attorneys General from the state's 31 judicial districts. The District Attorneys General is elected for a term of eight years and is responsible for the prosecution of criminal cases on behalf of the state.</p> <p>The Office of the Executive Director, which was created in 1972, serves as the central administrative office for the District Attorneys General Conference. The office is responsible for budgeting, accounting, payroll, personnel, property management and the administration of all fiscal matters pertaining to the District Attorneys General and their staff. Other duties include providing law libraries to each District Attorney's office, coordination of prosecution efforts, development and implementation of training programs and automation support. This office is also responsible for maintaining liaison between the District Attorneys General and other governmental agencies, including the courts, the General Assembly, the executive branch, and the Office of the Attorney General and Reporter.</p> <p>The Executive Director is elected by the District Attorneys General for a term of four years and serves as a member of the Tennessee Judicial Council.</p>

AGENCY:	District Public Defender's Conference
WEB ADDRESS:	http://www.state.tn.us/sos/bluebook/online/section3/pdc.pdf
DESCRIPTION:	<p>The District Public Defenders fulfill the state's obligation under the U.S. Constitution to provide a lawyer to person's accused of crimes that cannot afford a lawyer. District Public Defenders are attorneys elected in each judicial district who serve, as appointed by the courts, to represent indigent persons facing deprivation of liberty in criminal matters. The statewide system of public defenders was created by the General Assembly in 1989 as an alternative to the practice of court-appointed private attorneys. The Office of the Executive Director serves as the central administrative office for each of the 31 District Public Defenders. The Executive Director is responsible for budgeting, payroll, purchasing, personnel, and administration of all fiscal matters pertaining to the operation of District Public Defender offices. Other duties include coordinating defense efforts of the various District Public Defenders, development of training programs, and maintaining liaison with various state government agencies. The Executive Director is elected by the District Public Defenders for a four-year term and serves as a member of the Judicial Council and other judicial planning groups.</p>

AGENCY:	Federal Bureau of Investigation (FBI)
WEB ADDRESS:	http://www.fbi.gov
DESCRIPTION:	<p>The FBI's priorities include protecting the U.S. from terrorist attacks, from foreign intelligence operations, and from cyber-based attacks and high-technology crimes; combating public corruption at all levels; protecting civil rights; combating international and national organized crime, major white-collar crime, and significant violent crime; supporting our Law Enforcement and intelligence partners; and upgrading FBI technology.</p>

AGENCY:	International Association of Chiefs of Police (IACP)
WEB ADDRESS:	http://www.theiacp.org
DESCRIPTION:	The International Association of Chiefs of Police is the world's oldest and largest nonprofit membership organization of police executives, with over 19,000 members in over 89 different countries. IACP's leadership consists of the operating chief executives of international, federal, state and local agencies of all sizes.

AGENCY:	Justice Information Sharing Professionals (JISP)
WEB ADDRESS:	http://www.jisp.us
DESCRIPTION:	<p>Justice Information Sharing Professionals is a national organization that is interested in promoting best practices, standards and resources for solving the issues of information sharing within Criminal and Juvenile Justice, at local, state and national levels.</p> <p>JISP exists today as a group of committed justice information systems practitioners from various projects and jurisdictions across the nation who works together to help facilitate communication and assistance among project and program managers.</p> <p>The JISP Board of Directors is comprised of ten experienced and reputed project/program leaders from various local and state criminal justice information sharing initiatives in the United States. Together, they have begun to shape a forum for centralizing and standardizing issues and solutions for integration justice information systems embracing an enterprise-wide and national view.</p> <p>JISP has approximately 200 members from across the United States criminal justice community who share ideas, concepts, standards, experiences and resources within its peer network.</p>

AGENCY:	National Criminal Justice Association (NCJA)
WEB ADDRESS:	http://www.ncja.org
DESCRIPTION:	The National Criminal Justice Association exists to promote the development of justice systems in states, tribal nations, and units of local government that enhance public safety; prevent and reduce the harmful effects of criminal and delinquent behavior on victims, individuals and communities; adjudicate defendants and sanction offenders fairly and justly; and that are effective and efficient.

AGENCY:	National Sheriff's Association (NSA)
WEB ADDRESS:	http://www.sheriffs.org
DESCRIPTION:	The National Sheriffs' Association is now in its sixty-second year of serving the Law Enforcement/criminal justice professionals of the nation. The NSA a non-profit organization dedicated to raising the level of professionalism among those in the criminal justice field. Through the years, NSA has been involved in numerous programs to enable sheriffs, their deputies, chiefs of police, and others in the field of criminal justice to perform their jobs in the best possible manner and to better serve the people of their city/counties or jurisdictions.

AGENCY:	Office of Criminal Justice Programs (OCJP)
WEB ADDRESS:	http://www.state.tn.us/finance/rds/ocjp.htm
DESCRIPTION:	The Office of Criminal Justice Programs is committed to a safer Tennessee for all of its citizens. OCJP functions as a strategic planning agency that secures, distributes and manages federal and state grant funds for Tennessee. While collaborating with other public and non-profit agencies, OCJP utilizes these grant monies to support innovative projects statewide in efforts to reduce criminal activity, provide services for victims of crime and promote overall enhancement of the criminal justice system in Tennessee.

AGENCY:	Office of Information Resources (OIR)
WEB ADDRESS:	http://www.state.tn.us/finance/oir
DESCRIPTION:	<p>The Office for Information Resources provides direction, planning, resources, execution and coordination in managing the information systems needs of the State of Tennessee.</p> <p>OIR is a division within the Department of Finance & Administration (F&A), guided by a Deputy Commissioner and Chief Information Officer. OIR's clients primarily consist of State agencies, departments and commissions.</p> <p>OIR serves as staff to the Information Systems Council (ISC), and under the ISC's guidance, provides technical direction, services, and infrastructure to the State of Tennessee.</p>

AGENCY:	SEARCH - National Consortium for Justice Information and Statistics
WEB ADDRESS:	http://www.search.org
DESCRIPTION:	<p>SEARCH is a nonprofit membership organization created by and for the States, which is dedicated to improving the criminal justice system and the quality of justice through better information management, the effective application of information and identification technology, and responsible law and policy.</p> <p>Since 1969, SEARCH's primary objective has been to identify and help solve the information management problems of State and local justice agencies confronted with the need to exchange information with other local agencies, State agencies, agencies in other States, or with the Federal government.</p> <p>SEARCH is governed by a Membership Group comprised of one gubernatorial appointee from each of the 50 States, the District of Columbia, Puerto Rico and the Virgin Islands. Members are primarily State-level justice officials responsible for operational decisions and policymaking concerning the management of criminal justice information, particularly criminal history information.</p> <p>A staff of professionals works from SEARCH headquarters in Sacramento, California, to implement solutions identified by the Membership Group. Through its staff and with the direction of the Membership, SEARCH provides justice agencies with diverse products, services and resources through three interlocking programs: Systems and Technology, Law and Policy, and Research and Statistics.</p> <p>Funding for SEARCH activities is provided by annual fees from Member States for the operation of the consortium and Board of Directors; grants from such U.S. Department of Justice agencies as the Bureau of Justice Assistance, Bureau of Justice Statistics and National Institute of Justice; State grants; and Federal, State and local contracts.</p>

AGENCY:	State Court Clerks Association of Tennessee
WEB ADDRESS:	NA
DESCRIPTION:	<p>The purpose of the State Court Clerks Association of Tennessee is to affect a closer and more workable union of the State Court Clerks Association of Eastern, Middle and Western Tennessee; to promote legislation to the best interest of the clerks of the various counties; to conduct seminars relating to common problems and office procedures of the members; and to promote and encourage good fellowship among the members.</p>

AGENCY:	Tennessee Association of Chiefs of Police (TACP)
WEB ADDRESS:	NA
DESCRIPTION:	<p>The International Association of Chiefs of Police focuses on advancing the science and art of police services; developing and disseminating improved administrative, technical and operational practices and promote their use in police work; to foster police cooperation and the exchange of information and experience among police administrators throughout the world; to bring about recruitment and training in the police profession of qualified persons; and to encourage adherence of all police Officers to high professional standards of performance and conduct.</p> <p>It also is hereby declared to be the policy of the Association to cooperate with existing police organizations of recognized professional and technical standing. The Executive Board may arrange for joint research projects, publications, secretarial assistance and participation in.</p>

AGENCY:	Tennessee Bureau of Investigation (TBI)
WEB ADDRESS:	http://www.tbi.state.tn.us
DESCRIPTION:	<p>The Tennessee Bureau of Investigation provides up-to-date investigative, forensic science and crime information services in support of Tennessee's entire criminal justice system. The TBI takes pride in the fact that it has evolved over the years into a respected Law Enforcement organization with highly trained, dedicated, professional employees. The Bureau takes particular pride in being one of the few Law Enforcement agencies in the country to achieve the level of accreditation that it has, with both CALEA and ASCLD/LAB, and continues its commitment to maintain those accreditations.</p> <p>In July 2000, the TBI moved into a new consolidated headquarters building in Nashville and December 2001 saw the grand opening of a consolidated facility in Memphis. These facilities are allowing the TBI to remain at the forefront of the application of new technologies in criminal investigations, in working to improve communication among other state and local Law Enforcement agencies, and in vigorously pursuing the ultimate goal summed up in the Bureau's mission statement, to ensure "that guilt shall not escape, nor innocence suffer. The TBI is organized into five major divisions: the Criminal Investigation Division, the Drug Investigation Division, the Forensic Services Division, the Information Systems Division, and the Administrative Services Division.</p>

AGENCY:	Tennessee Sheriffs Association (TSA)
WEB ADDRESS:	NA
DESCRIPTION:	<p>The Tennessee Sheriffs Association (TSA) is a statewide organization that consists of the Sheriff's of most of the 95 Tennessee Counties. The group has a Board of Directors and a chairperson who leads the group. They hold board meetings and general assembly meetings periodically throughout the year to disseminate relevant criminal justice information.</p>

AGENCY:	US Department Of Justice - Office Of Justice Programs
WEB ADDRESS:	http://www.it.ojp.gov
DESCRIPTION:	<p>www.it.ojp.gov is an easy-to-use, free access Web site designed to give practitioners a centralized place to find information sharing and technology integration resources. The Web site is specifically designed to serve the justice and public safety communities. The Web site offers a variety of ways to access information and aims to assist practitioners as they search to find needed information.</p>

APPENDIX B: DATA ELEMENTS

The fundamental data elements captured, modified and transferred to other agencies within the criminal justice process are listed below.

Data elements frequently exchanged between two or more Tennessee's criminal justice agencies are listed below. The data elements have been organized into logical data sets based on the regularity in which the elements are exchanged as a group. The information below is not a comprehensive listing of data exchanged during criminal justice processing. It is a summary of data elements having the greatest frequency of exchange amongst Tennessee's criminal justice agencies.

ADDR	ADDRESS DATA <i>Applies to Agencies, Defendants, Suspects, Victims & Witnesses</i>
ADDR1	Address Line #1
ADDR2	Address Line #2
ADDR3	City
ADDR4	State
ADDR5	Zip Code

Address Data is exchanged during:

Incident & Investigation

Warrant Processing

General Sessions Court

Circuit or Criminal Court

ARRS	ARREST DATA
ARRS1	Arrest Date
ARRS2	Arrest Time
ARRS3	Arrest Location
ARRS4	Arrest Type
ARRS5	Arrest Reason
ARRS6	Arrest Comments

Arrest Data is exchanged during:

Incident & Investigation

Arrest & Booking

General Sessions Court

Circuit or Criminal Court

BASC	BASIC IDENTIFICATION DATA <i>Applies to Officials, Defendants, Victims & Witnesses</i>
BASC1	Sex
BASC2	Race
BASC3	Ethnicity
BASC4	Date of Birth

Basic ID Data is exchanged during:

Incident & Investigation

Warrant Processing

Arrest & Booking

General Sessions Court

Circuit or Criminal Court

Probation

Correction

Parole

BOND	BOND DATA
BOND1	Bail/Bond Amount
BOND2	Bail/Bond Conditions
BOND3	Bond Type
BOND4	Receipt Number
BOND5	Date Bond Set
BOND6	Date Bond Posted
BOND7	Surety Name
BOND8	Termination Date
BOND9	Termination Type Code
BOND10	Comments

Bond Data is exchanged during:

Arrest & Booking

General Sessions Court

Circuit or Criminal Court

BOOK	BOOKING DATA
BOOK1	Booking Agency Name
BOOK2	Booking Officer
BOOK3	Booking Number
BOOK4	Booking Date
BOOK5	Booking Time
BOOK6	Comments

Booking Data is exchanged during:

Arrest & Booking

CASE	CASE IDENTIFICATION DATA <i>Applies to various justice agencies case files</i>
CASE1	Agency Type/Name
CASE2	Agency Identification Number/Division
CASE3	Case Number
CASE4	Case Type
CASE5	Case Status
CASE6	Case Filed Date
CASE7	Case Closed Date
CASE8	Comments

Case ID Data is exchanged during:

Incident & Investigation

Warrant Processing

CHRG	CHARGE DATA <i>Applies to charges filed by LEA & District Attorneys</i>
CHRG1	Agency Name
CHRG2	Offense Description
CHRG3	Code Section Number
CHRG4	Code Subsection Number
CHRG5	Code Description
CHRG6	Charge Count
CHRG7	Amended Code
CHRG8	Filed Date
CHRG9	Weapon Involved Indicator
CHRG10	Weapon Type
CHRG11	Habitual Offender Indicator
CHRG12	Gang Affiliation Indicator
CHRG13	Bias Indicator
CHRG14	Comments

Charge Data is exchanged during:

Incident & Investigation

Warrant Processing

Arrest & Booking

General Sessions Court

Circuit or Criminal Court

Probation

Correction

Parole

CONT	CONTACT DATA <i>Applies to Officials, Defendants, Victims, & Witnesses</i>
CONT1	Contact Type/Name
CONT2	Residence Telephone Number
CONT3	Business Telephone Number
CONT4	Cell Phone Number
CONT5	Pager Number
CONT6	Fax Number
CONT7	E-Mail Address

Contact Data is exchanged during:

Incident & Investigation

Warrant Processing

Arrest & Booking

General Sessions Court

Circuit or Criminal Court

Probation

Parole

CUST	CUSTODY DATA <i>Applies to custody in County Jails, Workhouses, & Prisons</i>
CUST1	Custody Term
CUST2	Custody Start Date
CUST3	Custody Start Time
CUST4	Custody Facility
CUST5	Custody Status
CUST6	Reason Confined
CUST7	Inmate Number
CUST8	Credit for Time Served Amount
CUST9	Time Served
CUST10	Custody Comments

Custody Data is exchanged during:

Arrest & Booking
 Probation
 Correction
 Parole

DISP	DISPOSITION DATA
DISP1	Disposition Type
DISP2	Disposition Description
DISP3	Disposition Date
DISP4	Verdict
DISP5	Disposition Comments

Final Disposition Data is exchanged during:

Incident & Investigation
 General Sessions Court
 Circuit or Criminal Court
 Probation
 Correction
 Parole

DRIV	DRIVER'S LICENSE DATA
DRIV1	Driver's License Number
DRIV2	Driver's License State
DRIV3	Driver's License Status
DRIV4	Driver's License Status Date

Driver's License Data is exchanged during:

Incident & Investigation
 Warrant Processing

"As-Is" Model**Integrated Criminal Justice Project**

IDEN	ENHANCED IDENTIFICATION DATA <i>Applies to Defendants, Victims, & Witnesses</i>
IDEN1	Height
IDEN2	Weight
IDEN3	Eye Color
IDEN4	Hair Color
IDEN5	Alias
IDEN6	Maiden Name
IDEN7	Place of Birth
IDEN8	Citizenship
IDEN9	Scars/Marks/Tattoos/Amputations
IDEN10	Date of Death
IDEN11	Disability
IDEN12	Deformity
IDEN13	Blood Type
IDEN14	Enhanced Identification Comments

Enhanced ID Data is exchanged during:

Incident & Investigation

Warrant Processing

Arrest & Booking

General Sessions Court

Circuit or Criminal Court

Probation

Correction

Parole

FING	FINGERPRINT DATA <i>Applies to fingerprints collected by LEA & TDOC</i>
FING1	Fingerprints (Images)
FING2	Date Fingerprinted
FING3	Reason fingerprints were collected
FING4	Name of Agency submitting fingerprints
FING5	Name of Officer that collected fingerprints

Fingerprint Data is exchanged during:

Incident & Investigation

Arrest & Booking

Correction

JUST	JUSTICE OFFICIAL IDENTIFICATION DATA <i>Applies to personnel from various justice agencies</i>
JUST1	Agency Type/Name
JUST2	Official Type/Rank
JUST3	Official Identification/Badge Number

APPENDIX D: SYSTEMS IN ALPHABETICAL ORDER

APPLICATION:	Automated Fingerprint Identification System (AFIS)
CATEGORY:	Law Enforcement
CONTACT INFO:	Tennessee Bureau of Investigation 901 R.S. Gass Blvd Nashville, TN 37216-2639 (615) 744-4000 Fax: (615) 744-4599 http://www.tbi.state.tn.us
DESCRIPTION:	<p>The Automated Fingerprint Identification System (AFIS) is a computer system and database that is housed at the TBI. It contains digital fingerprint images and other information to establish an individual's identity and criminal history in Tennessee. Digital fingerprint images and other identification information are sent to AFIS via LiveScan. The fingerprints are compared to those that are already in the AFIS database. If a match is found, AFIS returns the State Identification Number (SID) and other identifying information of the individual. A criminal history may be queried based on the SID number.</p> <p>The TBI AFIS is not the only one in the state: Davidson, Hamilton, Knox and Shelby Counties all have their own AFIS system as well. Each system forwards the information to TBI's AFIS, and TBI forwards information on to the FBI IAFIS.</p>

APPLICATION:	Bridge Court Management Software
CATEGORY:	Court Information System
CONTACT INFO:	Bridge Computer Systems Inc. 6421 Kingsport Highway Gray, TN, 37615 (423) 239-9497 www.bridgeweb.org
DESCRIPTION:	Bridge is a vendor-developed Court Information System that supports Circuit, Civil, Criminal, Chancery, General Sessions, and Juvenile Courts. Key features of Bridge include Case History, Master Person File, Bill-of-Cost, Dockets, Case Disposition Rule & Execution, and Reporting.

APPLICATION:	Case&Point
CATEGORY:	Case Management
CONTACT INFO:	Corporate Legal Solutions, Inc. 2305 S. Highway 121, Suite 175 Lewisville, TX 75067 (214) 488-2626 (800) 597-4361 www.caseandpoint.com
DESCRIPTION:	Case&Point software is designed by corporate attorneys to manage all types of case matters. Case&Point Enterprise Edition includes the following modules: Case Management, General Matter Management, Contract Management, Trademark Management, Patent Management, Real Estate Management, Outside Counsel Expense Tracking, Budget Management, e-Document Management, Physical File Control, Internal Timekeeping, Event Tracking / Calendaring, Report System with 5 report wizards, Report Development Kit, Full text search on key fields, data warehouse for budget vs. actual analysis.

APPLICATION:	CITED
CATEGORY:	Court Information System
CONTACT INFO:	Knox County Information Systems Shirley Walker 400 West Main Knoxville, TN 37902 (865) 215-3786
DESCRIPTION:	CITED is a custom-developed FoxPro program that is used by the General Sessions Court Clerk's Office. The system allows users to enter, process, and store Citation information. The system assigns a Docket Number to the Citation. Knox County enters a variety of Citations into the system and manages the numbers in such a way that there are no duplicate citation numbers.

APPLICATION:	COPSRMS
CATEGORY:	Law Enforcement
CONTACT INFO:	Capella Systems, Inc. 208 Second Avenue Cedar Rapids, IA 52406 319.366.3155 Fax: 319.366.6552 info@capellasystems.com http://www.newdawntech.com/capella.htm
DESCRIPTION:	COPSRMS is a Records Management System that is designed to collect and provide information regarding Law Enforcement Agencies with incident and crime reporting. It provides Administration personnel with information regarding the frequency, duration, time period, call types and response times of their services. System coordinators are able to obtain a summary of their patrol activities including incident types, procedures performed, arrest rates, citations issued and patrol strategy effectiveness. Command staff members are able to evaluate the effectiveness of prevention and suppression procedures for use in future planning and education. It also provides regulatory agencies with data from these agencies.

APPLICATION:	Criminal Activities Intelligence Network (CAIN)
CATEGORY:	Case Management
CONTACT INFO:	Tennessee District Attorneys General Conference Jay Palmer, Director of Information Systems 226 Capitol Boulevard, Suite 800 Nashville, TN 37243 jay@tndagc.com www.tndagc.com Pam Ackerman pla711@aol.com
DESCRIPTION:	CAIN is a custom-developed Case Management program that was built in FoxPro for the Tennessee District Attorney Offices. The CAIN application is used to: collect, store, and display data associated with the workflow of the DA's office; search for and display TCA information; create and print letters or forms; ability to collect data while in the courtroom and download the data collected into the master database; design and produce custom reports; share designated information with the central repository of the District Attorney conference; and develop and manage a calendar of events. Local CAIN users store their case data in their local environments. Each morning, the local data is copied to data files and moved to a FTP Site. Data files are retrieved from the FTP Sites and downloaded into the central database in the DA conference office in Nashville. The central database in Nashville is in a SQL Server environment. All CAIN users have access to the central database via the State WAN.

APPLICATION:	Criminal Justice Information System (CJIS)
CATEGORY:	Law Enforcement Court Information System
CONTACT INFO:	Justice Integration Services (JIS) of Davidson County Kevin Sanders, Project Lead 211 Union St., Suite 515 Nashville, TN 37201 (865) 215-4431 kevinsanders@jis.nashville.org http://www.jis.nashville.org
DESCRIPTION:	<p>The Criminal Justice Information System (CJIS) is a Court Information System that was developed with PowerBuilder on a Unisys computer with an Oracle database. CJIS is designed to meet the business processing requirements of the Davidson County Metro/State Criminal Courts and criminal justice agencies. These requirements include records management functions, calendaring, Grand Jury case processing, financial processing, and Police interface functions.</p> <p>The records management functions include affidavit, charging instrument, bond, and case management. The calendaring requirements consist of the ability to set up calendar docket sessions in which cases can be scheduled. The ability to set caps for the number of Defendants and cases is included as well as conflict checking for judges, police Officers and attorneys. The system meets the reporting requirements of the Administrative Office of the Courts (AOC) and the Tennessee Bureau of Investigation (TBI).</p> <p>CJIS contains Offender's Criminal History, Arrest Summary, Jail Summary, Case Dispositions, Pending issues, Court Dockets, and Disposition Forms. The CJIS application also handles financial processing for Criminal Court, General Sessions and Juvenile cases. Financial processing includes the assessment of fines and costs through case events, collection of fines and costs, automatic posting of received funds to the General Ledger (GL), and disbursement of collected funds to the appropriate entities. There are plans to store images of the Citations within CJIS in the near future.</p> <p>The Justice Integration Services (JIS) is the agency that oversees CJIS project. JIS is one of the major JIS projects.</p>

APPLICATION:	Criminal Justice Kiosk
CATEGORY:	Law Enforcement
CONTACT INFO:	<p>Memphis Police Department Lieutenant Jim Harvey Organized Crime Unit, Division of Police Services (901) 528-2338 jharvey@memphispolice.org</p> <p>Memphis Sheriff Office John Harvey Lieutenant/Director, Information Systems (901) 545-5901 john.harvey@shelby-sheriff.org</p>
DESCRIPTION:	<p>The Criminal Justice Kiosk is a web-enabled search engine originally developed in FoxPro by John Harvey of the Memphis Sheriff's Office. The source code was provided to the Memphis Police Department where Jim Harvey helped to create the Criminal Justice Kiosk for the Memphis Police. The team developed an interface that gathers information from multiple agency databases including: Memphis Police Department, Shelby County Sheriff's Department, Pawn Shops, Local Utility Company, and Shelby County's JMS & JSS.</p> <p>Basically, the Kiosk is a series of web-enabled databases that are shared within the Shelby County Sheriff's Office, Memphis Police Department, and the Attorney General's Office. Criminal justice agencies in Mississippi, Arkansas, and Tipton County have been granted access as well.</p>

APPLICATION:	Criminal Justice System (CJUS)
CATEGORY:	Court Information System Jail Management Law Enforcement
CONTACT INFO:	Hamilton County Information Technology Services Bart McKinney, Programming Manager Hamilton County Info. Tech. Services 115 East 7th Street Chattanooga, TN 37402 (423) 209-6250
DESCRIPTION:	<p>Hamilton County's Criminal Justice (CJUS) System is a custom application that was written in COBOL, CICS, and EZTRIEVE PLUS.</p> <p>The Sheriff's Office uses the system to book and track prisoners. It has a module to manage the Commissary inventory, prisoner deposits, purchases and balances. It provides a way to enter and track Medical and Drug information, Visitor information and produces many reports. The system interfaces with a digital fingerprinting and mug shot system.</p> <p>The Criminal Court Clerk uses the system for case management, scheduling, dockets, witnesses, subpoenas and summons, bound over defendants, board bills for the Jury, revocations. The bookkeeping part of the system allows the Clerk's office to create and print receipts while automatically updating the balance of the cases involved, deposit money, disburse money to appropriate agencies, and make journal entries when necessary.</p> <p>The General Sessions Criminal System is similar to the Criminal Court Clerk system for case management and bookkeeping. There is no Grand Jury for General Sessions; however, when cases are bound over to the Grand Jury, bound over records are created for use in Criminal Court. This eliminates duplication of entry and saves time and effort. The bookkeeping system defaults to the correct amounts due based on the charge and disposition of the case.</p> <p>The CJUS System tracks defendants by generating a SPN (system person number) when a defendant is booked, arrested, ticketed, indicted, etc. This SPN is used for the defendant if he or she is entered a second time into the system by allowing the person entering the record to search for the defendant by name, date of birth, age, sex race, or other identifying characteristic. This allows the system to track a defendant's criminal history. A SPN consolidation function exists to allow certain people to consolidate records when it is discovered that a SPN has been created for a defendant that already has one in the system. Other key people involved in the system such as police officers, judges, attorney, and bondsmen are also given SPN numbers for the purpose of tracking cases.</p>

APPLICATION:	DataMaxx
CATEGORY:	Law Enforcement
CONTACT INFO:	DataMaxx Software 700-999-2746 http://www.datamaxx.com
DESCRIPTION:	DataMaxx products provide access to Law Enforcement databases such as NCIC through desktop, mobile and handheld computers, as well as a variety of communication devices.

APPLICATION:	DataQuest Court Docket
CATEGORY:	Court Information System
CONTACT INFO:	Dataquest 805 Nashville Highway. Columbia, Tennessee. Columbia, TN (800)388-8467 joyr@dq.com support@dq.com http://www.dqc.com
DESCRIPTION:	The DataQuest Court Docket system processes Court Documents, AP, GL, Property Tax, and Business License. Point of Sale and the Court Docket. It automates the process of tracking and managing municipal court operations, allowing you to maintain a complete set of docket books on-line, including a comprehensive record for every case. It's features include: Automates entire court docket process; Designed specifically for municipal courts; Records comprehensive defendant records; Maintains detailed vehicle information; Supports complete case and incident descriptions; Manages and tracks warrants, bonds, case schedules, and case dispositions; Automates entry and management of all financial transactions related to a court case; Generates docket reports, court schedules, financial management reports and state required reports; Special options allow you to quickly update case disposition information and case narratives; Displays every transaction posted for specific court docket record; allows you to immediately view the financial status of any case; Interfaces with computerized Police Information system to automate entry of cases and case disposition information.

APPLICATION:	DocSTAR (Document Storage and Retrieval)
CATEGORY:	Document Imaging & Management
CONTACT INFO:	AuthentiDate Holding Corp., dba DocSTAR Schenectady, NY 800.367.5906 partnerinfo@docstar.com www.docstar.com
DESCRIPTION:	DocSTAR, which stands for Document Storage and Retrieval, is an electronic filing system that creates digital images of criminal justice documents such as Citations and Warrants. The information is stored in the system's database. Fingerprint images are also captured within this system. The system offers the following functionality: ease of use; simple transition to a paperless workplace; Safety and security against theft and fraud with our unique AuthentiDate Image Marking technology; dramatic savings in storage and labor costs.

APPLICATION:	DOS Driver's License History
CATEGORY:	Law Enforcement
CONTACT INFO:	Tennessee Department of Safety 1150 Foster Avenue Nashville, TN 37249 (615) 251-5216 Fax: (615) 253-2091
DESCRIPTION:	The Driver's License History system contains information on driver violations, accidents and micrographic actions. The information is obtained from tickets, court abstracts, correspondence and various internal documents. The system is used for the benefit of the Court Clerk, Police, Sheriff's Office and the Department of Safety.

APPLICATION:	DOS Driver's License Issuance
CATEGORY:	Tennessee Department of Safety 1150 Foster Avenue Nashville, TN 37249 (615) 251-5216 Fax: (615) 253-2091

APPLICATION:	Intergraph Computer Aided Dispatch System
CATEGORY:	Law Enforcement
CONTACT INFO:	Intergraph Public Safety (IPS) 241 Business Park Blvd. Madison, AL 35758 1.877.818.4170 http://www.intergraph.com
DESCRIPTION:	<p>Intergraph Dispatch Software (I/CAD) is an "intelligent" interactive mapping and data entry system. It dispatches, monitors, and manages emergency services utilizing expertise in public safety and geographic information systems.</p> <p>Intergraph began development of public safety applications in 1989 under the name Intergraph Dispatch Management. In January 1995, the division's name was changed to Intergraph Public Safety (IPS) and it became an independent business unit. In 1997, the IPS business unit obtained the status of a subsidiary corporation wholly owned by Intergraph.</p>

APPLICATION:	Jail Management System (JMS)-Shelby County
CATEGORY:	Correction
CONTACT INFO:	Shelby County Information Technology Mike Pachis Manager, Information Technology Department, Shelby County (901) 545-4795 mpachis@co.shelby.tn.us
DESCRIPTION:	Jail Management System (JMS) is a custom-developed jail and correction center software application that is supported by the Shelby County Information Services organization. The system utilizes a Tandem computer to provide a minute-by-minute location of each offender throughout the jail and court system, from intake through release. JMS helps to identify where the backlogs are in the process. The ultimate goal is to move entirely to a paperless system that will track offenders from arrest, through release on bond, to prison, all without a paper trail.

APPLICATION:	Justice Information Management System (JIMS)
CATEGORY:	Law Enforcement Court Information System
CONTACT INFO:	Knox County Information Systems Shawn D. Ferguson, Project Manager 400 Main Street, Suite L-114 Knoxville, TN 37902 (865) 215-4431 shawn.ferguson@knoxcounty.org
DESCRIPTION:	Justice Information Management System (JIMS) is a custom-developed application that is used by the Knox County Sheriff's Department, the Public Defender's Office, Probation & Parole, and the 6th Judicial District Attorney General's Office. The system was developed by the Information Systems Department of Knox County. Knox County is migrating its data from a system called CITED to JIMS. Knox County built their integrated system around a shared database, which facilitates a multitude of automated functions. Sheriff's Office enters information at the point of data entry. This may include Warrants or Booking information. The information goes to the Court Clerk's office, the DA's office and the Public Defender's office. Court information is entered into the shared database as a case moves through the system. The prosecutor enters information that is accessible by the Grand Jury. When Criminal Court Clerks issue an indictment, it is accessible through the system. Dismissal of charges informs the jail that a suspect is no longer to be housed in the jail.

APPLICATION:	Justice Support System (JSS)
CATEGORY:	Law Enforcement
CONTACT INFO:	Shelby County Information Systems Mike Pachis Manager, Information Technology Department, Shelby County (901) 545-4795 mpachis@co.shelby.tn.us
DESCRIPTION:	Justice Support System (JSS) is a custom-developed Court Information System that is based on relational database technology and resides on a Tandem mainframe computer. Some of the data contained in the JSS database can be accessed via the web. Some of the functions performed by JSS include: Label generation for Citation case files; Arrest Warrants; Letters to Offenders; Garnishment of Offender Assets; Court Action Reports for the Department of Safety; Online and printed dockets; State warrants. Post conviction-collections; Failure to pay notices; Suspended licenses for Department of Safety.

APPLICATION:	Law Enforcement Records Information System (LERIS)
CATEGORY:	Document Imaging & Management
CONTACT INFO:	Decision Management Company 949-855-6885 FAX 949-458-6004 23361 Madero, Suite 150, Mission Viejo, CA 92691 General Information: sales@dmc-inc.com Customer Support: techsupport@dmc-inc.com www.questys.com
DESCRIPTION:	Law Enforcement Records Imaging System (LERIS) is an electronic imaging process that was developed to capture, distribute, store, and manage documents and related data throughout the Police Department and others who are authorized to obtain it. The system is based upon Questys Text & Image Management System (see http://www.questys.com) to add customized functionality for Law Enforcement agencies. Police and Sheriff departments benefit from document imaging technology as integrated with their existing Mug Shot Systems, Arrest Records databases, Fingerprint Identification Systems and various other mainframe-based Systems for a one-stop Law Enforcement records repository. The system maintains a variety of Law Enforcement document images.

APPLICATION:	LiveScan
CATEGORY:	Networking/Communications
CONTACT INFO:	<p>Tennessee Bureau of Investigation 901 R.S. Gass Blvd Nashville, TN 37216-2639 (615) 744-4000 Fax: (615) 744-4599 http://www.tbi.state.tn.us</p>
DESCRIPTION:	<p>A LiveScan computer is a stand-alone system within a Tennessee Law Enforcement jurisdiction that captures fingerprint images online and electronically transmits them (along with demographic information) to an Automated Fingerprint Identification System (AFIS) repository for identification purposes. In Tennessee, LiveScan devices are found at booking agencies, and used at the time of booking an Offender. The information is sent electronically to the TBI's AFIS. Frasca or Jonathan James 3960 RCA Boulevard, Suite 6001 Palm Beach Gardens, FL 33410 (561) 622-1650 or (770) 541-6325 (561) 622-9938 fax E-mail: sales@crossmatch.net or www.crossmatch.net</p>

APPLICATION:	National Crime Intelligence Center (NCIC)
CATEGORY:	Law Enforcement
CONTACT INFO:	Federal Bureau of Investigation, CJIS Division 1000 Custer Hollow Road Clarksburg, WV 26306 http://www.fas.org/irp/agency/doj/fbi/is/ncic.htm
DESCRIPTION:	<p>National Crime Intelligence Center (NCIC) is a computerized index of criminal justice information including criminal record history, fugitives, stolen properties, and missing persons. NCIC is available to Federal, State, and Local Law Enforcement and other criminal justice agencies. The purpose for NCIC is to provide a computerized database for ready access by a criminal justice agency making an inquiry and for prompt disclosure of information in the system from other criminal justice agencies about crimes and criminals. This information assists authorized agencies in criminal justice and related Law Enforcement objectives, such as apprehending fugitives, locating missing persons, locating and returning stolen property, as well as in the protection of the Law Enforcement Officers encountering the individuals described in the system.</p> <p>Data contained in NCIC is provided by the FBI, federal, state, local and foreign criminal justice agencies, and authorized Courts. The system includes data pertaining to: Wanted Persons; Individuals who have been charged with serious and/or significant offenses; Missing Persons; Individuals designated by the U.S. Secret Service as posing a potential danger to the President and/or other authorized protectees; Members of Violent Criminal Gangs; Members of Terrorist Organizations; and Unidentified Persons.</p> <p>Categories of records in the system include: Stolen Vehicle File; Stolen License Plate File; Stolen Boat File; Stolen Gun File; Stolen Article File; Securities File; Wanted Person File; Foreign Fugitive File; Interstate Identification Index File; Identification records regarding persons enrolled in the United States Marshals Service Witness Security Program who have been charged with serious and/or significant offenses; Bureau of Alcohol, Tobacco, and Firearms (BATF) Violent Felon File; Missing Person File; U.S. Secret Service Protective File; Violent Criminal Gang File; Terrorist File; Unidentified Person File.</p> <p>Approved software vendors that provide NCIC access include:</p> <p>DataMaxx Software (state contract) 700-999-2746</p> <p>Interact Computer Systems 800-768-3911</p> <p>HTE, Inc. 800-727-8088</p> <p>Cerulean Technology 404-266-2971</p> <p>Harmon Technology 978-692-0097</p>

APPLICATION:	National Incident Based Reporting System (NIBRS)
CATEGORY:	Law Enforcement
CONTACT INFO:	Federal Bureau of Investigation, CJIS Division 1000 Custer Hollow Road Clarksburg, WV 26306 www.search.org/nibrs/default.asp
DESCRIPTION:	The National Incident Based Reporting (NIBRS) System is the FBI's Uniform Crime Reporting (UCR) program. NIBRS is used to store information about crimes reported to the police. The system has been enhanced to provide comprehensive and detailed crime statistics.

APPLICATION:	National Law Enforcement Telecommunication System (NLETS)
CATEGORY:	Network/Telecommunications
CONTACT INFO:	Steve Correll, Executive Director 2930 E. Camelback Road, Suite 160 Phoenix, Arizona 85016
DESCRIPTION:	<p>The National Law Enforcement Telecommunications System (NLETS) is a computer-controlled message-switching network linking local, state, and federal agencies for the purpose of Information exchange. Located in Phoenix, Arizona, and operated and controlled by the states, the NLETS is the only national system that provides state and local Law Enforcement agencies with the capability to exchange free-form criminal justice and criminal justice -related Information via an interstate network.</p> <p>NLETS's vision is to continue to be the premier provider of the network, system, and services that will support and encourage a totally standardized, integrated, international justice system. Acting primarily as a network provider, and to the degree required, a data warehouse, NLETS will endeavor to serve every stratum of the justice and public safety communities.</p>

APPLICATION:	NetRMS
CATEGORY:	Law Enforcement
CONTACT INFO:	CRISNet by MEGG Associates Inc. Troy Darrington Account Executive (801) 486-9939 Ext 136 (800) 678-8335 Ext 136 troyd@crisnet.com http://www.crisnet.com
DESCRIPTION:	NetRMS is vendor-developed intranet application for storage, retrieval, and analysis of data collected by Law Enforcement personnel. NetRMS is a records and data management environment for secure, open access by department personnel regardless of their location. NetRMS provides the following features: Based on the Microsoft SQL Server and Internet Information Server, NetRMS serves millions of records at high speeds. The system produces FBI-compliant NIBRS statistics while also automating Summary UCR.

APPLICATION:	Onbase
CATEGORY:	Document Imaging & Management
CONTACT INFO:	Hyland Software, Inc. 28500 Clemens Road Westlake, Ohio 44145 440.788.5000 Fax: 440.788.5100 hyland@onbase.com http://www.onbase.com
DESCRIPTION:	<p>Onbase is an Intranet-based integrated document management application that is used to store and search for digitally stored document images. OnBase is an enterprise content management solution that combines the technologies of document imaging, COLD/ERM, integrated document management, and workflow into a single web-enabled application.</p> <p>OnBase is used to store all kinds of document images, host generated reports, application files, HTML forms, emails, video clips, etc. as well as every stage of the document lifecycle creation/input, storage, retrieval, revision and distribution.</p> <p>OnBase is built upon web-enabled, client/server architecture that leverages the openness and scalability of databases like Oracle and Microsoft SQL Server. The system allows access through a browser, a traditional PC, or other enterprise applications.</p>

APPLICATION:	Printrak Fingerprint Identification System
CATEGORY:	Law Enforcement
CONTACT INFO:	Printrak International Inc. Francine M. Harris Printrak International Inc. 714/238-2000 www.printrakinternational.com/LiveScan_3000.htm
DESCRIPTION:	Printrak's Digital Justice Solution provides networked fingerprint, photo imaging, computer-aided dispatch and automated Records Management Systems. Printrak provides a LiveScan solution that is used by the TBI. The system is an integrated identification and information system and is used to digitally capture fingerprint images and electronically transmit them to a Law Enforcement repository for identification purposes. In Tennessee, LiveScan sends fingerprint images to the Automated Fingerprint Identification System (AFIS) at the TBI.

APPLICATION:	ProLaw
CATEGORY:	Case Management
CONTACT INFO:	ProLaw Software P.O. Box 20628 Albuquerque, NM 87154 Sales: 800/977-6529 Client Services: 888/777-6529 FAX: 505/889-9538 http://www.prolaw.com
DESCRIPTION:	ProLaw is a vendor-developed Case Management software package that provides functionality for tracking cases, relationships, documents, billing and accounting. The system manages contacts, clients, prospects, vendors, and business associations. It helps to locate expert witnesses, and provides full-text document indexing, shadowing and assembly. ProLaw also tracks images, spreadsheets, videos, audio, and charts. It has a feature called rules-based calendaring and has a built-in Legalex Rules for your local jurisdiction. The system integrates with email. ProLaw tracks all the physical files that go with cases, provides time tracking, reporting and analysis, and the ability to bill back to other departments.

APPLICATION:	Sheriffs Office Management System (SOMS)
CATEGORY:	Law Enforcement
CONTACT INFO:	M&M Microsystems Allison Elder (888) 644-5786 x101 (731) 571-0763 cellular 731-644-1738 allison@mmmicro.com http://www.mmmicro.com
DESCRIPTION:	SOMS is often referred to as M&M. SOMS handles case and investigation management, traffic trends and patterns, prioritizes Law Enforcement efforts, and booking. The system offers CAD, calls for service, mobile data and records management. It provides compatibility with the TIBRS and electronically transmits data to TIBRS.

APPLICATION:	Spillman
CATEGORY:	Law Enforcement
CONTACT INFO:	Spillman Technologies, Inc. 843 S. 100 West Logan, Utah 84321 435.753.1610 (800) 860.8026 Fax: 435.753.3031 info@Spillman.com http://www.spillman.com
DESCRIPTION:	Spillman Records Management software reduces the cost and complexity of entering, managing, and extracting critical data. The software's single entry and inquiry structure prevents duplicate entry and ensures efficient access to accurate data, user-defined reports, NIBRS reporting, automatic alerts notify officers of important information, ensuring officer safety. Chain of evidence reduces length of time between establishing probable cause and obtaining a warrant. Customized security. Spillman Technologies was founded in 1983 by Richard Spillman. Headquartered in Utah, the company is privately owned and specializes in Law Enforcement software for CAD, records, jail and mobile.

APPLICATION:	TBI Instant Check System (TICS)
CATEGORY:	Law Enforcement
CONTACT INFO:	Tennessee Bureau of Investigation Brad Truitt, Assistant Director, Information Systems 901 R.S. Gass Blvd Nashville, TN 37216-2639 (615) 744-4008 brad.truitt@state.tn.us www.tbi.state.tn.us
DESCRIPTION:	<p>The TBI Instant Check System (TICS) is used to checks on any person seeking to purchase a firearm from a licensed firearm dealer or to redeem a firearm from pawn from a licensed firearm dealer.</p> <p>The following systems are checked during the process: Computerized Criminal History-Persons who are convicted felons cannot legally possess a firearm. Tennessee Repository for Apprehension of Persons-Fugitives cannot legally possess a firearm. State of Tennessee Orders of Protection-Persons convicted of domestic violence cannot legally possess a firearm. National Crime Information Center-Persons who may pose a threat to the President and/or others afforded protection by the U.S. Secret Service, foreign fugitives; persons currently under supervision of the Federal Bureau of Prisons, Convicted Person on Supervised Release File and the Convicted Sexual Offender Registry cannot legally possess a firearm. Interstate Identification Index-the national repository for criminal history record information. National Instant Check System-the federal instant background check system maintained by the FBI. It houses databases on Denied Persons, Illegal/Unlawful Aliens. Controlled Substance Abusers, Dishonorable Dischargees, Citizenship renunciants and Mental Defectives/Commitments.</p> <p>Note: The Tennessee State Legislature incorporated the Brady Handgun Violence Prevention Act into the Tennessee gun transfer statute with an amendment to T.C.A. 39-17-1316.</p>

APPLICATION:	T-CAST
CATEGORY:	Court Information System
CONTACT INFO:	Local Government Data Processing Corporation 714 Armstrong Lane Columbia, TN 38401 (931) 381-1155 www.lgdpc.com
DESCRIPTION:	Local Government is a Tennessee vendor who has developed case management, accounting and booking applications for the State of Tennessee. Local Government Data Processing Corporation is headquartered in Columbia, TN and was established in 1977. Local Government services are provided on a cost recovery basis, with local governments benefiting from the economies of a large-scale computer organization.

APPLICATION:	Tennessee Applicant Processing Services (TAPS)
CATEGORY:	Law Enforcement
CONTACT INFO:	Tennessee Bureau of Investigation Brad Truitt, Assistant Director, Information Systems 901 R.S. Gass Blvd Nashville, TN 37216-2639 (615) 744-4008 brad.truitt@state.tn.us www.tbi.state.tn.us
DESCRIPTION:	The Tennessee Applicant Processing Services (TAPS) provides a background check for applicants for paid or volunteer employment or licensing in a wide variety of areas such as childcare, teachers, security and armed guards, and security system contractors. Paper fingerprint card systems take several weeks to process. TAPS has been implemented to give employers and licensing agencies an option to complete the process in days rather than weeks. TAPS allows employers and licensing agencies to send applicants to Processing Centers located throughout the state for processing, adding an extra level of security that the fingerprints belong to the person making application.

APPLICATION:	Tennessee Court Information System (TnCIS)
CATEGORY:	Court Information System
CONTACT INFO:	Administrative Office of the Courts Ann Lynn Walker, Assistant Director for Technology Nashville City Center 511 Union Street Nashville TN 37219 (615) 532-7327 x200 FAX: (615) 532-8549 ann.lynn.walker@tscmail.state.tn.us
DESCRIPTION:	The Tennessee Court Information System (TnCIS) is a custom-developed Court Information System that will be used to manage trial court cases. The system is currently in the testing phase of development. The system will integrate case tracking and accounting functions for court clerks, including Circuit, Criminal, Chancery, Probate, Juvenile, and General Sessions Courts.

APPLICATION:	Tennessee Criminal History Repository (TCHR)
CATEGORY:	Law Enforcement
CONTACT INFO:	Tennessee Bureau of Investigation 901 R.S. Gass Blvd Nashville, TN 37216-2639 (615) 744-4000 Fax: (615) 744-4599 http://www.tbi.state.tn.us
DESCRIPTION:	<p>The Tennessee Criminal History Repository (TCHR) system is the official repository for criminal history records for the State of Tennessee. The purpose of this system is to provide a standardized and effective method for users to acquire Criminal History Record Information from state and local Law Enforcement and criminal justice agencies. More specifically, this system allows states that have automated criminal history systems to offer an automated response to uniform inquiries, via NLETS. Those states without automated systems may respond manually. The system is used to retrieve criminal history records that may not be available on NCIC's Interstate Identification Index (III) system. In Tennessee, the TBI is the state repository. Arrest data is based on fingerprint cards that have been submitted by Law Enforcement personnel.</p> <p>When an inquiry is generated to a state, that states' records are checked (either automatically or manually) for a match on the data inquired upon. All criminal history inquiries and resulting responses, whether obtained through NCIC or TCHR, must be documented. Each criminal history transaction must be logged in an adequate manner, using a hard copy log, for audit purposes. Logs must be maintained in a secure file for a minimum of 2 years from date of transaction. Criminal history inquiries are allowed only for authorized purposes. Abuse of this information capability, including curiosity inquiries, is strictly prohibited by law, and will jeopardize TIES network access.</p>

APPLICATION:	Tennessee Incident Based Reporting System (TIBRS)
CATEGORY:	Law Enforcement
CONTACT INFO:	Tennessee Bureau of Investigation Brad Truitt, Assistant Director, Information Systems 901 R.S. Gass Blvd Nashville, TN 37216-2639 (615) 744-4008 brad.truitt@state.tn.us www.tbi.state.tn.us
DESCRIPTION:	<p>Tennessee Incident Based Reporting System (TIBRS) is the method used to collect crime statistics in Tennessee based upon the concept of collecting data on crime incidents and all the elements associated with each incident. The purpose of reporting TIBRS data is to depict the nature and volume of crime in a particular community. It provides the ability to identify when and where crime takes place, what form it takes, characteristics of victims, characteristics of perpetrators. TIBRS is mandated by law in Tennessee.</p>

APPLICATION:	Tennessee Information Enforcement System (TIES)
CATEGORY:	Networking/Telecommunications
CONTACT INFO:	Tennessee Bureau of Investigation Brad Truitt, Assistant Director, Information Systems 901 R.S. Gass Blvd Nashville, TN 37216-2639 (615) 744-4008 brad.truitt@state.tn.us www.tbi.state.tn.us
DESCRIPTION:	The Tennessee Information Enforcement System (TIES) is a fully redundant system that provides for the storing and forwarding of messages concerning crime, criminals and criminal activity. The TIES network provides linkage to NCIC, NLETS, the Tennessee Criminal History Repository, in-state hot files, as well as the State Office of Information Resources (OIR) mainframe allowing access statewide to databases containing motor vehicles, boats and drivers license information. Approximately 300,000 message transactions are processed each day.

APPLICATION:	Tennessee Offender Management Information System (TOMIS)
CATEGORY:	Correction
CONTACT INFO:	Tennessee Department of Correction 320 6th Avenue North 4th Floor, Rachel Jackson Building Nashville, TN 37243-0465 (615) 741-1000 http://www.state.tn.us/correction
DESCRIPTION:	The Tennessee Offender Management Information System (TOMIS) is used to: manage and answer questions about inmate sentences; apply credits to sentences; produce summaries of inmate's incarceration history and background; identify parole eligibility; identify release dates; monitor court dates, warrants, and extradition requests; classify inmates; monitor inmate movements and visitations; manage financial transactions and employment at state prisons; account for inmate property; collect certain medical information about inmates. Access to TOMIS is granted by the Department of Correction to county jails, workhouses, department of human services, district attorney and Law Enforcement agencies.

APPLICATION:	Tennessee Judicial Information System (TJIS)
CATEGORY:	Court Information System
CONTACT INFO:	Administrative Office of the Courts Ann Lynn Walker, Assistant Director for Technology Nashville City Center 511 Union Street Nashville TN 37219 (615) 532-7327 x200 FAX: (615) 532-8549 ann.lynn.walker@tscmail.state.tn.us
DESCRIPTION:	The Tennessee Judicial Information System (TJIS) report is the monthly electronic report generated from all systems to the Administrative Office of the Courts (AOC). The TJIS report is generated for all criminal filings and dispositions, probation violations, Correction violations, writs of habeas corpus, post conviction relief, and various motions.

APPLICATION:	Tennessee Repository for Apprehension of Persons (TRAP)
CATEGORY:	Law Enforcement
CONTACT INFO:	Tennessee Bureau of Investigation Brad Truitt, Assistant Director, Information Systems 901 R.S. Gass Blvd Nashville, TN 37216-2639 (615) 744-4008 brad.truitt@state.tn.us www.tbi.state.tn.us
DESCRIPTION:	The primary purpose of Tennessee Repository for the Apprehension of Persons (TRAP) is to serve, as a central repository for outstanding Tennessee warrants which do not satisfy the criteria for entry into the FBI's NCIC Wanted Person File. Although it is programmatically possible for the subject of any outstanding warrant to be entered into either the NCIC Wanted Person File or the TRAP File, record entry into both systems for the same offense by the same agency is prohibited. The retention period for wanted person records in the TRAP database is five years. The MKE/QW0 command is used to query TRAP. When an inquiry results in a match, that response is to be considered as lead-type information. Before any action is taken, the Warrant must be confirmed with the entering agency.

APPLICATION:	Tiburon
CATEGORY:	Law Enforcement
CONTACT INFO:	Tiburon, Inc. Customer Support Center 39350 Civic Center Dr., Ste. 250 Fremont, CA 94538 (877) 445-2110 (CSC phone) (510) 742-9590 (CSC fax) support@tibinc.com www.tibinc.com
DESCRIPTION:	Tiburon Software is a vendor-developed records management system used by Law Enforcement Records Divisions. Tiburon's supports small to large multi-jurisdiction Law Enforcement environments. Tiburon provides a department-wide solution for information capture, control, dissemination and retrieval. With over 20 independent, integrated functional modules, Tiburon's RMS records all key operational information and includes tools for analysis and management functions. The product provides: comprehensive incident and person records; integrated master name and master location indexes; alerts on persons and locations of interest; reduces data entry and minimizes errors; and manages property and evidence tracking.

APPLICATION:	Victim Notification System (VINE)
CATEGORY:	Correction
CONTACT INFO:	Appriss, Inc. 10401 Linn Station Rd, Suite 200 Louisville, KY 40223-3842 1-866-APPRISS tseigle@appriss.com http://www.appriss.com/VINE.html
DESCRIPTION:	VINE, which stands for Victim Information and Notification allows crime victims across the country to obtain information about criminal cases and the custody status of offenders, 24 hours a day, over the telephone, through the web, or by email. The VINE service is available in 36 states in Departments of Correction to keep victims informed about offenders held in state prisons. Note: In 2002, Tennessee law created the Victims of Crime State Coordinating Council to address and promote awareness of victims' and their families' needs.

APPLICATION:	VisionRMS
CATEGORY:	Law Enforcement
CONTACT INFO:	VisionAIR, Inc. Angela Shepherd Marketing/Operations (910) 602-7457 alshepherd@visionair.com
DESCRIPTION:	VisionRMS is a vender-developed Records Management System that administers the following Law Enforcement Agency records: incidents, arrests, cases, evidence and property, citations, warrants, civil papers, traffic accidents, internal affairs, intelligence, equipment maintenance, and bar coding. VisionAIR produces state-specific Incident-Based (IBASE), UCR, and NIBRS reports that can be directly transferred to the FBI or the TBI. The system uses relational databases in conjunction with a SQL server. Multiple users and agencies can share common data on wide area networks for total community policing. The system features Multi-jurisdictional Capabilities, Client/Server WindowsNT, NIBRS/UCR Reporting, Graphical User Interface, Searching Ability, Security, Integrated Mapping, Object Linking and Embedding, Online Help and Remote Diagnostics.
