THE DIGITAL WAY TO SUBMIT, SHARE, PREPARE, AND REVIEW EXHIBITS AND EVIDENCE

Case Center gives judges, court staff, and litigants an efficient and digital platform to share, review, and present exhibits and evidence for physical and virtual court hearings and trials.
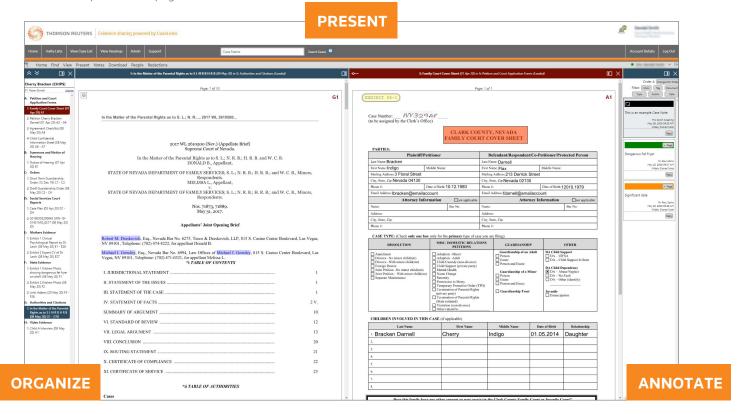

Evidence and exhibits are easily uploaded into organized folders from any device, including mobile phones and tablets. The easy to use annotation tools allow parties to search, bookmark, take notes, and mark-up exhibits before and during hearings, conferences, and trials. Interactive presentation features let the parties "direct" the judge and others to the right document — in real time — significantly reducing time spent in shuffling through papers, folders, and PDF's. Trial notebooks come to life with this highly collaborative, easy to use exhibit and evidence sharing platform.

EASY AND SECURE, DOCUMENT ACCESS FOR CASE PARTIES AND THE JUDGE

- Maintain control of case documents
    - Upload all file types including video and audio
    - Use permissions to share selected parts, documents, and pages
    - Access documents wherever you are — from any device
- Powerful search tools
    - Single search for key terms across all case documents
    - Review search results side by side
- Single, centralized case index
    - Quickly jump to document pages
    - Be directed by others to a page

- Redaction suite
    - Search and redact key terms across the bundle
    - Auto redact incoming files
- Secure and scaled
    - Handles document sets too large or too sensitive to send via email
    - Avoids size upload limits of e-filing
    - Gives secure and audited access to all parties
- Integrated experience
    - Gives secure and audited access to all parties

THOMSON REUTERS®

FLEXIBLE DOCUMENT MARKUP TOOLS THAT ADAPT TO HOW YOU WORK

- Web-based, easy-to-use interface
- Paperless preparation tools
  - Draw, highlight, underline, or strikethrough text just like paper
- Compare documents with side-by-side review
- Build notes alongside your documents
  - Keep notes private, share with colleagues or all parties within the case
  - Notes stay in place even as new documents are added
  - Easily return to the page of an annotation directly from the notes bar

INTUITIVE, EASY-TO-USE PRESENTATION TOOLS FOR MORE EFFICIENT HEARINGS

- Direct everyone to the right document, instantly
- Maintain a single page numbering system for fast navigation
- Present evidence alongside case notes and annotations
- Easily locate key case information and join virtual hearings in one place
- Works alongside any video conferencing tool — so no matter how you're communicating you can always access your documents.

OVERALL IMPROVED HEARINGS EXPERIENCE

Easily view, annotate, and present documents wherever you are.

- **Document Review** – review all case documents in one place
- **Multimedia Playback** – watch media within the case file
- **Case Dashboard** – easily move documents and manage document permissions
- **Exhibit Marking** – mark requested exhibits into an exhibits binder to be reviewed by the clerk prior to the hearing
- **Admit Evidence** – stamp documents as 'identified' or 'admitted'
- **Redaction Suite** – search and redact key phrases across case documents
- **Validate Authenticity of Evidence** – view document metadata (images too!) to see date and time of creation.
